The Environment And Marxism-leninism Joan Debardeleben, 2019-07-11 In the past two decades environmental pollution and natural resource shortages have evoked increasing concern in the Soviet Union and Eastern Europe The emerging ecological crisis has challenged many common assumptions in the Soviet bloc as in the West This book provides for the first time a detailed and comprehensive analysis of the ecology debate in the USSR and its highly industrialized ally the German Democratic Republic GDR Based on a thorough examination of the Soviet and GDR sources Dr DeBardeleben explores the authorities attempts to explain the problem to their populations She also examines the viewpoints of scientists writers and scholars with special attention to economic dimensions of the ecology debate The study reveals the increasing sophistication of specialists in influencing public policy by adapting official values to support their positions Through comparison of the Soviet and East German cases the study clarifies the impact of natural resource endowment and legitimacy dilemmas on treatment of the ecology issue The book demonstrates that Marxist Leninist values subtly affect Soviet and GDR responses but at the same time the environmental crisis is forcing a reevaluation of some aspects of Marxist Leninist theory and ideology itself

When Ideas Fail Joachim Zweynert, 2017-11-01 In the history of Russian economic ideas a peculiar mix of anthropocentrism and holism provided fertile breeding ground for patterns of thought that were in potential conflict with the market These patterns did not render the emergence of capitalism in Russia impossible But they entailed a deep intellectual division between adherents and opponents of Russia s capitalist transformation that made Russia s social evolution unstable and vulnerable to external shocks This study offers an ideational explanation of Russia s relative failure to establish a functioning market economy and thus sets up a new and original perspective for discussion In post Soviet Russia a clash between imported foreground ideas and deep domestic background ideas has led to an ideational division among the elite of the country Within economic science this led to the emergence of two thought collectives in the sense of Ludvik Fleck with entirely different understandings of social reality This ideational division translated into incoherent policy measures the emergence of institutional hybrids and thus all in all into institutional instability Empirically the book is based on a systematic qualitative analysis of the writings of Soviet Russian economists between 1987 and 2012 This groundbreaking book makes an important contribution to Central Eastern and Eastern European area studies and to the current debate on ideas and institutions in the social sciences

States. Congress. Joint Economic Committee,1966 **A Full-Value Ruble** Kristy Ironside,2021-06-01 A new history shows that despite Marxism's rejection of money the ruble was critical to the Soviet Union's promise of shared prosperity for its citizens In spite of Karl Marx's proclamation that money would become obsolete under Communism the ruble remained a key feature of Soviet life In fact although Western economists typically concluded that money ultimately played a limited role in the Soviet Union Kristy Ironside argues that money was both more important and more powerful than most histories have recognized After the Second World War money was resurrected as an essential tool of Soviet governance Certainly its importance was not lost on Soviet leaders despite official Communist Party dogma Money Ironside demonstrates mediated the relationship between the Soviet state and its citizens and was at the center of both the government's and the people's visions for the maturing Communist project A strong ruble one that held real value in workers' hands and served as an effective labor incentive was seen as essential to the economic growth that would rebuild society and realize Communism's promised future of abundance Ironside shows how Soviet citizens turned to the state to remedy the damage that the ravages of the Second World War had inflicted upon their household economies From the late 1940s through the early 1960s progress toward Communism was increasingly measured by the health of its citizens' personal finances such as greater purchasing power higher wages better pensions and growing savings However the increasing importance of money in Soviet life did not necessarily correlate to improved living standards for Soviet citizens The Soviet government's achievements in raising the people's material welfare continued to lag behind the West's advances during a period of unprecedented affluence These factors combined to undermine popular support for Soviet power and confidence in the Communist project
