*El Niño, 1997-1998, in the Midwest* Stanley Alcide Changnon, Steven D. Hilberg, Kenneth Edward Kunkel, 2000 A warm El Nino event developed in the eastern tropical Pacific Ocean during May Aug 1997 Predictions called for a fall winter and early spring in the Midwest that would have above normal temp and below normal precipitation This report presents information about The Midwest Climate Center s activities related to El Nino in 1997 1998 the predictive outlooks issued a climatic assessment of the monthly and seasonal weather conditions during the event and a description of the societal and economic impacts caused in the Midwest Recommendations are offered for addressing future El Nino events and the handling of long range predictions Maps

**El Niño 1997-1998** Stanley A. Changnon, 2000-04-06 This book will cover the time span from the first indications of El Nino May 1997 until its reversal June 1998 The focus will be largely on the United States where El Nino produced widespread changes in how the public perceives weather and in the accuracy of forecasts Among the key issues it will examine are how the news media interpreted and dramatized El Nino and the reaction both of the public and decision makers the latter based on interviews with agribusiness utilities water management agencies etc the scientific issues emerging from the event and the social and economic consequences of the event Finally it will suggest what can and should be done when El Nino occurs in the future

*The Oryx Resource Guide to El Niño and La Niña* Bloomsbury Publishing, 2002-05-30 Fish die Seagulls starve Economies wither And that s just in the coastal villages El Ni o The Christ Child and its climatological opposite La Ni a are global events so powerful and strange they virtually have personalities Many remember the El Ni o seasons of 1982 83 and 1997 98 which brought floods tornadoes droughts and snow to unusual locales Increased study of these Tropical Pacific phenomena also known as ENSO the El Ni o and Southern Oscillation has now enabled scientists to predict the ENSO state as much as 12 to 18 months in advance and has helped to shape weather prediction in general Here the basic causes and effects of El Ni o and La Ni a are carefully chronicled for anyone in search of accurate and current information on these natural phenomena Chapters are devoted to the history of ENSO its influence on global weather and on the United States including the ecosystem and how governments and industries worldwide are utilizing new weather data to harness ENSO s economic impact rather than be saddled by it A chronology tours key events from the 15th century diary observations of colonists in Ecuador and Peru to recent events like the devastating El Ni o of 1997 98 which was responsible for 23 000 deaths and 33 billion in damages Biographies of important researchers illustrations and maps and an extensive bibliography help make this a total guide to these magnificent natural cycles

**El Niño in World History** Richard Grove, George Adamson, 2017-12-11 This book examines the role of the El Ni o Southern Oscillation ENSO in society Throughout human history large or recurrent El Ni os could cause significant disruption to societies and in some cases even contribute to political change Yet it is only now that we are coming to appreciate the significance of the phenomenon In this volume Richard Grove and George Adamson chart the dual history of El Ni o as a

global phenomenon capable of devastating weather extremes and since the 18th century as a developing idea in science and society The chapters trace El Niño's position in world history from its role in the revolution in Australian Aboriginal Culture at 5 000 BP to the 2015 16 Godzilla event It ends with a discussion of El Niño in the current media which is as much a product of the public imagination as it is a natural process

**Flood Hazards and Health** Roger Few, Franziska Matthies, 2013 Flood hazards and the risks they present to human health are an increasing concern across the globe in terms of lives well being and livelihoods and the public resources needed to plan for and deal with the health impacts This book is the first detailed assessment and discussion of the global health implications of flooding and future flood risk It combines an analysis of the human health impacts of flooding with analysis of individual and societal response to those risks and sets these findings in light of potential future increases in flood hazard as a result of climate change Written and edited by leading researchers and practitioners on flood hazards and human health the volume brings together findings from epidemiological environmental social and institutional studies with analysis rooted in an approach that emphasizes the developmental as well as environmental causes of flood risk and the socially differentiated nature of vulnerability and coping capacity The first part of the book sets out the scope of the issues and provides a detailed discussion of the global health impacts of floods and the nature of human response to the health risks posed The second part presents new research evidence on specific health aspects of floods covering mental health infectious diseases local level responses and the responses of health systems drawing on case study material from Europe Africa Asia and North America including the impact of Hurricane Katrina in 2005 The conclusion synthesizes insights from the previous chapters and discusses priorities for policy practice and research It draws out implications for present and future adaptation to flooding and emphasizes the need to integrate action on health with the broader agenda of long term risk reduction This is indispensable reading for professionals and researchers working on hazard and disaster planning risk reduction and public health in all countries and contexts

Late Victorian Holocausts Mike Davis, 2002-06-17 This global environmental and political history will redefine the way we think about the European colonial project Observer sets the triumph of the late 19th century Western imperialism in the context of catastrophic El Niño weather patterns at that time

groundbreaking mind stretching The Independent Examining a series of El Niño induced droughts and the famines that they spawned around the globe in the last third of the 19th century Mike Davis discloses the intimate baleful relationship between imperial arrogance and natural incident that combined to produce some of the worst tragedies in human history Late Victorian Holocausts focuses on three zones of drought and subsequent famine India Northern China and Northeastern Brazil All were affected by the same global climatic factors that caused massive crop failures and all experienced brutal famines that decimated local populations But the effects of drought were magnified in each case because of singularly destructive policies promulgated by different ruling elites Davis argues that the seeds of underdevelopment in what later became known as the Third World were sown in this era of High Imperialism as the price for capitalist modernization was paid in the currency of millions of peasants lives

**Disaster and Human History** Benjamin Reilly, 2022-03-31 Human history is periodically punctuated by natural disasters from Vesuvius eruption to the modern day Covid 19 pandemic Volcanoes have buried entire cities earthquakes have reduced structures to smoldering ruins Floods and cyclones have wreaked havoc on river valleys and coastlines and desertification and climate change have weakened society's underpinnings Death tolls are often escalated by starvation and illness which frequently occur in tandem This second edition assesses natural disasters on human society and the effect of strategies developed to reduce their impact This book addresses the interconnectivity of disaster and human responsibility through 23 updated case studies including a new chapter on the 2011 Tōhoku tsunami and the ensuing Fukushima nuclear disaster

**Publications of the State of Illinois 1994**, *The Complete Idiot's Guide to Global Warming* Michael Tennesen, 2008 The rapid warming of the Earth's climate has been a concern for decades In the past there were sceptics who either doubted global climate change altogether or who at least doubted that humanity was the cause but today almost all scientists agree that a global warming trend is evident and caused by human activity Though many of us understand that this means temperatures will on average rise the science and the resulting social economic and political implications of such a change are far reaching and complex
