woman Arla Bay ineluctably drawn to New Mexico by the magnetic power of El Morro a great sandstone outcrop in the heart  
of the Southwest on which travelers throughout four centuries left their names and rubrics in the golden stone Arlo Bay  
becomes the responsibility of William Stone a senior park ranger assigned to escort the deeply troubled woman to her goal

**Transformation of Ancient Zuni Communities** Gregson Schachner, 2012-04-01 Because nearly all aspects of culture  
depend on the movement of bodies objects and ideas mobility has been a primary topic during the past forty years of  
archaeological research on small scale societies Most studies have concentrated either on local moves related to subsistence  
within geographically bounded communities or on migrations between regions resulting from pan regional social and  
environmental changes Gregson Schachner however contends that a critical aspect of mobility is the transfer of people goods  
and information within regions This type of movement which geographers term population circulation is vitally important in  
defining how both regional social systems and local communities are constituted maintained and most important changed  
Schachner analyzes a population shift in the Zuni region of west central New Mexico during the thirteenth century AD that  
led to the inception of major demographic changes the founding of numerous settlements in frontier zones and the initiation  
of radical transformations of community organization Schachner argues that intraregional population circulation played a  
vital role in shaping social transformation in the region and that many notable changes during this period arose directly out  
of peoples attempts to create new social mechanisms for coping with frequent and geographically extensive residential  
mobility By examining multiple aspects of population circulation and comparing areas that were newly settled in the

thirteenth century to some that had been continuously occupied for hundreds of years Schachner illustrates the role of population circulation in the formation of social groups and the creation of contexts conducive to social change **100**

Charles Adams, Andrew I. Duff, 2016-04 In the centuries before the arrival of Europeans the Pueblo world underwent nearly continuous reorganization Populations moved from Chaco Canyon and the great centers of the Mesa Verde region to areas along the Rio Grande the Little Colorado River and the Mogollon Rim where they began constructing larger and differently organized villages many with more than 500 rooms Villages also tended to occur in clusters that have been interpreted in a number of different ways This book describes and interprets this period of southwestern history immediately before and after initial European contact A.D. 1275-1600 a span of time during which Pueblo peoples and culture were dramatically transformed It summarizes one hundred years of research and archaeological data for the Pueblo IV period as it explores the nature of the organization of village clusters and what they meant in behavioral and political terms Twelve of the chapters individually examine the northern and eastern portions of the Southwest and the groups who settled there during the protohistoric period The authors develop histories for settlement clusters that offer insights into their unique development and the variety of ways that villages formed these clusters These analyses show the extent to which spatial clusters of large settlements may have formed regionally organized alliances and in some cases they reveal a connection between

protohistoric villages and indigenous or migratory groups from the preceding period This volume is distinct from other recent syntheses of Pueblo IV research in that it treats the settlement cluster as the analytic unit By analyzing how members of clusters of villages interacted with one another it offers a clearer understanding of the value of this level of analysis and suggests possibilities for future research In addition to offering new insights on the Pueblo IV world the volume serves as a compendium of information on more than 400 known villages larger than 50 rooms It will be of lasting interest not only to archaeologists but also to geographers land managers and general readers interested in Pueblo culture *Hydrogeology of Cibola County, New Mexico* Joe A.
