Bibliography of the History of Medicine ,1984 Literature, Science and Exploration in the Romantic Era Tim Fulford, Debbie Lee, Peter J. Kitson, 2004-09-02 In 1768 Captain James Cook made the most important scientific voyage of the eighteenth century He was not alone scores of explorers like Cook travelling in the name of science brought new worlds and new peoples within the horizon of European knowledge for the first time Their discoveries changed the course of science Old scientific disciplines such as astronomy and botany were transformed new ones like craniology and comparative anatomy were brought into being Scientific disciplines in turn pushed literature of the period towards new subjects forms and styles Works as diverse as Mary Shelley's *Frankenstein* and Wordsworth's *Excursion* responded to the explorers and scientists latest discoveries This wide ranging and well illustrated study shows how literary Romanticism arose partly in response to science's appropriation of explorers encounters with foreign people and places and how it in turn changed the profile of science and exploration Romanticism and Science, 1773-1833 Tim Fulford, 2002 National Library of Medicine Current Catalog National Library of Medicine (U.S.), 1983 The War Against Smallpox Michael Bennett, 2020-06-18 A history of the global spread of vaccination during the Napoleonic Wars when millions of children were saved from smallpox **Letters of Edward Jenner, and Other Documents Concerning the Early History of Vaccination** Edward Jenner, 1983 **Clio Medica : Acta Academiae Internationalis Historiae Medicinae. Wolfe, 2001 Romantics and the Era of Early Flight John Gilroy, 2022-12-08 This book explores the significance of flight to Romantic literature Although the Romantic movement and the age of ballooning coincided there has been a curious and long time tendency to forget that flight was not impossible during this period This study details the importance of this new technology to Romantic authors primarily English Romantic poets It combines accounts of the exploits and experiences of early balloonists with references to Romantic texts using ballooning lore to illuminate a range of Romantic writings The balloonists are seen as not just supplying these writers with a new code of metaphors but as colleagues engaged in similarly imaginative enterprises The book uncovers an aerial imagination shared by a large number of writers in the Romantic period that has its origins in the balloon adventures of the 1780s and following two decades It will appeal to scholars and students of Romantic cultural history as well as those interested in Romantic poetry and the history of early aeronautics
