Maheshwari, Vineeta Mittal, The early schooling years in a child's life are of extreme importance These are the times when he focuses his eyes and mind on everything that is new and appealing His mind is untrained and he has learned only the basics of communication His vocabulary is limited but he is eager to learn Whatever is presented to him he absorbs like a sponge His attention span is short and he requires constant reinforcement What interests him most is things and events around him This is the golden opportunity to inculcate in him a spirit of adventure and inquiry to teach him to ask to reason and to pick up healthy habits With this in mind our publisher decided to bring out a science series for the junior classes **An Introduction to the history of medicine** Fielding Hudson Garrison, 1914 **An Introduction to the history of medicine, with medical chronology, bibliographic data and test questions** Fielding Hudson Garrison, 1913 **From Empire to Humanity** Amanda B. the story of a generation of American and British activists who transformed humanitarianism as they adjusted to being foreigners American independence put an end to their common imperial humanitarianism but not their friendships their far reaching visions or their belief that philanthropy was a tool of statecraft In the postwar years these philanthropists led by doctor activists collaborated on the anti drowning cause spread new medical charities combatted the slave trade reformed penal practices and experimented with relieving needy strangers The nature of their cooperation however had changed No longer members of the same polity they adopted a universal approach to their benevolence working together for the good of humanity rather than empire Making the care of suffering strangers routine these British and American activists laid the groundwork for later generations global undertakings From Empire to Humanity offers new perspectives on the history of philanthropy as well as the Atlantic world and colonial and postcolonial history
