### ABSTRACT

The development of technology has given rise to various social media platforms, such as Instagram. Instagram offers numerous features to its users for content creation, such as Instagram stories, feeds, Instagram reels, and live Instagram. The use of social media is closely related to digital literacy skills. Social media has a significant impact on society, including changes in parenting patterns, known as "sharenting." Sharenting refers to the activity of parents sharing photos or videos of their children's growth and development on social media, which often makes it difficult to restrict their lives on social media and their children's privacy. This study aims to investigate the influence of parents' digital literacy on their sharing behavior and their children's privacy. The research utilizes a quantitative method by conducting a survey with 400 respondents. The findings of the study reveal that digital literacy has a significant influence on sharenting, with a coefficient of 0.799, a t-statistic of 16.785, and a p-value of 0.000. This indicates that digital literacy has a proven positive and significant impact on sharenting. Furthermore, digital literacy also has a positive and significant influence on children's privacy, as the coefficient of digital literacy's influence on children's privacy is 0.774, with a t-statistic of 16.059 and a p-value of 0.000.

### INTRODUCTION

The development of technology and information has created social media. Indonesian people are active in using social media. According to the results of research by Hootsuite and We Are Social, social media users in Indonesia in early January 2023 amounted to 167 million users, equivalent to 60.4% of the total population of Indonesia (Kemp, 2023a). Currently, various social media platforms have various types of user characteristics. One example is Instagram. Instagram is a social media platform that aims to share photos and videos and can apply digital filters, hashtags, and other digital interactions (Kurniari et al., 2021). Currently, Instagram offers many features for its users to create content, such as Instagram stories, feeds, reels, and live Instagram. Based on the results of the We Are Social survey, Instagram is in second place as the social media platform most used by Indonesians, namely 86.5%, and globally, Indonesians are the fourth most active Instagram users, amounting to 106 million active users (Kemp, 2023b).

**Development According to Parents** W. Andrews Collins,Jacqueline J. Goodnow,2014-01-02 To their everyday life with children parents bring a number of ideas about development and about parenting Some of these ideas are about their own children and about themselves as parents Others are more general ideas for instance about what babies are like how children change with age what kinds of affection and control they need the responsibilities of mothers and fathers or the degree of influence each parent has over the way a child

develops Moreover the ideas that parents hold shape their actions with children and the way they assess both their children and their own performance as parents With the recognition of parental thinking as a powerful factor in family life research has turned to the study of this everyday or informal psychology Some of the studies deal with the nature of parents ideas What ideas are held Which are most widely shared How do these ideas differ from one another Some deal with the sources of parents ideas with the factors that give rise to differences among parents from different backgrounds different cultures different economic groups different degrees of experience with children Others concentrate on the consequences of parents ideas for themselves and for children This monograph summarizes the research with an eye to several audiences researchers clinicians educators and with an emphasis on the questions that remain A major goal is to point not only to significant gaps but also to some specific ways in which they might be addressed by further research

**The Effects of Child Abuse and Neglect** Raymond Starr, David A. Wolfe, 1991-08-09 Research in child abuse has expanded dramatically since the first controlled studies were started in the mid 1970s The fields of developmental psychology and clinical child psychology have progressed in tandem resulting in theoretical richness and increased methodological sophistication With these advances it is now commonly recognized that child abuse and neglect can be fully understood only through the use of longitudinal research methods difficult expensive and time consuming though their application may be THE EFFECTS OF CHILD ABUSE AND NEGLECT reviews the findings from current longitudinal research and also serves as an authoritative guide to the complex methodologic issues involved in conducting such studies The book s introductory chapter examines the intergenerational transmission of abusive behavior and its adult sequelae In depth analyses of three innovative longitudinal investigations follow the first focuses on the value of an at risk approach to research in this area the second evaluates structural equations modeling a relatively new statistical method and the third demonstrates the usefulness of a transactional approach to the longitudinal study of different forms of maltreatment Other contributions focus specifically on the interpretation of existing research and on conducting future studies Provocative discussions on crucial definitional issues are complemented by equally trenchant analyses of as yet unresolved design considerations The remaining chapters deal with basic measurement issues especially the assessment of parental personality and psychopathology psychological abuse parental childrearing belief systems parent child attachment and other domains of parent child interaction and the impact of maltreatment on physical and emotional development An effective synthesis of practical and research issues THE EFFECTS OF CHILD ABUSE AND NEGLECT is essential reading for all child development psychiatry child psychiatry family sociology social work pediatric nursing and other human services professionals responsible for recognizing treating and preventing child abuse as well as for ameliorating its long term consequences

*Child Effects on Adults* Richard Q. Bell, Lawrence V. Harper, 2020-09-10 It is usual to consider the effects parents have on children this title originally published in 1977 reverses the focus and reveals a subject every bit as important and interesting The authors both professional psychologists present their findings under three major headings History Theories and Research Approaches and Concepts and Findings that discuss the social psychological and biological influences children exert on parents Bell and Harper oppose the intellectual apartheid that prevents behavioural scientists from investigating the continuity of interaction processes from other animals to man and include substantial research findings in mammalian biology to show more precisely the reciprocal relations between parents and their offspring Their bidirectional approach to the study of child rearing is meant to offset empirical prejudices that had so far dominated child care sciences at the time

*How Children Learn from Parents and Parenting Others in Formal and Informal Settings:*

International and Cultural Perspectives, 2nd Edition Yvette Renee Harris, Claudio Longobardi, 2020-07-28 For several decades parent child cognitive interaction researchers have acknowledged that children learn cognitive skills in the context of their social and early environments These cognitive skills are often imparted to the children by parents or parenting others in formal or informal settings Thus for example such informal settings as dinner table conversations walks through grocery stores museums or neighborhoods become rich laboratories for children to learn varied cognitive skills ranging from numeracy concepts and language The way in which those learning opportunities are provided by parents structured by parents and scaffolded by parents may well vary depending on culture and other socio demographic variables and may well vary depending on formal or informal settings The aim of this Research Topic is to bring together scholarship from both global north and global south contexts which explores how children learn via parental involvement in formal and informal settings Publisher's note In this 2nd edition the following article has been added Harris YR and Longobardi C 2020 Editorial How Children Learn From Parents and Parenting Others in Formal and Informal Settings *International and Cultural Perspectives Front Psychol* 11 1026 doi 10.3389/fpsyg.2020.01026

**When Your Children Marry** Deborah M. Merrill,2011-05-05 Marriage is an important transition in the life of any adult who marries But often when a son or daughter gets married their relationships with their natal families changes It is often said that a daughter is a daughter all of her life but a son is a son til he takes him a wife This book examines how marriage changes relationships between adult children and their parents and how this differs for sons versus daughters Merrill considers the process by which men get pulled into their wives families and the ways in which men are sometimes more connected to their wives families following marriage than to their own families But what is it about a relationship with a son that changes when he marries And why do daughters tend to stay closer Why do mothers experience greater difficulty in negotiating relationships with married sons than with married daughters Why do daughters tend to stay closer and maintain stronger ties to their natal families than sons do This book answers these questions and offers advice for mothers on how to maintain strong ties with their children when they marry negotiate relationships that may be fraught with new challenges and accept changes when they happen Sharing firsthand accounts from mothers sons and daughters the author sheds new light on this neglected topic The Consequences of COVID-19 on the Mental Well-being of Parents, Children and

Burack,2018-09-21 Executive

function is an umbrella term for various cognitive processes that are central to goal directed behavior thoughts and emotions. These processes are especially important in novel or demanding situations which require a rapid and flexible adjustment of behavior to the changing demands of the environment. The development of executive function relies on the maturation of associated brain regions as well as on stimulation in the child's social contexts especially the home and school. Over the past decade the term executive function has become a buzzword in the field of education as both researchers and educators underscore the importance of skills like goal setting planning and organizing in academic success. Accordingly in initiating this Research Topic and eBook our goal was to provide a forum for state of the art theoretical and empirical work on this that both facilitates communication among researchers from diverse fields and provides a theoretically sound source of information for educators. The contributors to this volume who hail from several different countries in Europe and North America have certainly accomplished this goal in their nuanced and cutting edge depictions of the complex links among various executive function components and educational success.
