The Rights of Immigrant Workers in the European Union Joanna Apap, 2002-09-01 This book is one of the very few studies that evaluates the evolving policies towards third country nationals residing and working in the European Union EU Other studies have analysed the existing legal framework of citizenship and migrants rights in the EU and the flow of migrants into the Community However much less comparative research has been carried out about the actual position and the practice of migrants rights in the receiving countries in the context of an ever integrating EU and the removal of internal borders The focus of this book is on the consequences of the increasing number of Maghreb workers residing in Italy and Spain both for EU policy and with respect to these two countries as relatively new receiving states The book examines What public policy implications does the labour immigration from the Maghreb Countries have for the EU as a supranational Community rather than for the Member states individually To what extent can citizenship rights be extended to third country nationals legally residing in a European Union to make their status as close as possible to that of European citizens

*Five Years of an Enlarged EU* Filip Keereman, Istvan Szekely, 2010-07-23 The Fifth Enlargement that took place in 2004 and 2007 was a milestone in the history of the European Union Not only because of the large number of acceding countries but also because of their recent political and economic experience Ten of them had undergone a profound transition from a totalitarian regime to democracy and from a centrally planned economy to a market based system Most of them had income levels significantly below those of the then EU 15 Now 6 years later we can clearly see that the process of European integration both before and after 2004 was what enabled Europe to overcome the gaps between various parts of the continent The enlargement made Europe a better and wealthier place and strengthened its position in the world Integration into the European Union has always been one of the strongest incentives for reform in the new Member States Particularly important in my view have been the development of financial markets through foreign direct investment and capital flows and the opening of labour markets which was a two way phenomenon with markets being opened up in acceding as well as the incumbent Member States The Fifth Enlargement was thus an exercise of globalisation in miniature a practice run for the Union to tackle the challenges of the ever smaller world

**Out of Africa** Giovanni Carbone, 2017-12-15 The EU is struggling to cope with the so called migration crisis that has emerged over the past few years Designing the right policies to address immigration requires a deep understanding of its root causes Why do Africans decide to leave their home countries While the dream of a better life in Europe is likely part of the explanation one also needs to examine the prevailing living conditions in the large and heterogeneous sub Saharan region This Report investigates the actual role of political economic demographic and environmental drivers in current migration flows It offers a comprehensive picture of major migration motives as well as of key trends Attention is also devoted to the role of climate change in promoting migration and to intra continental mobility two thirds of sub Saharan migrant flows start and end within the region Two country studies on Eritrea and Nigeria are also included to get a closer sense of local developments behind large scale migration to Europe

Haines, Karen Rosenblum, 1999-10-30 Few issues have provoked as much controversy over the last decade as illegal immigration While some argue for the need to seal America s borders and withdraw all forms of social and governmental support for illegal migrants and their children others argue for humanitarian treatment including legalization for people who fill widely acknowledged needs in American industry and agriculture and have left home country situations of economic hardship or political persecution The study of illegal immigration necessarily confronts a broad range of migrants from the familiar border crossers to those who enter illegally and overstay their visas to the many unrecognized refugees who enter the country to seek protection under U S asylum law The subject also demands attention to American society s responses to these newcomers responses that often focus on limited elements of a complex issue A comprehensive up to date review of this volatile subject this book provides an accessible balanced introduction to the subject Covering the full range of illegal immigrants from Mexican border crossers to Central American refugees illegal Europeans and smuggled Chinese the book considers the kind of work the migrants do and the public response to them The work is divided into four parts Concepts Policies and Numbers The Migrants and Their Work The Responses and Illegal Immigration in Perspective
