Egyptian Archaeology, 2004 **Sex and Gender in Ancient Egypt** Carolyn Graves-Brown, 2008-12-31 This volume offers new research on an essential but often controversial aspect of life in Dynastic Egypt Its originality lies in combining research which uses Egyptology's traditional strengths philological and iconographic with reflections on material culture and on the discipline of Egyptology itself The authors are internationally recognized authorities in their fields **The Oxford Handbook of the Archaeology of Childhood** Sally Crawford, Dawn Hadley, Gillian Shepherd, 2018-05-10 Real understanding of past societies is not possible without including children and yet they have been strangely invisible in the archaeological record Compelling explanation about past societies cannot be achieved without including and investigating children and childhood However marginal the traces of children's bodies and bricolage may seem compared to adults archaeological evidence of children and childhood can be found in the most astonishing places and spaces The archaeology of childhood is one of the most exciting and challenging areas for new discovery about past societies Children are part of every human society but childhood is a cultural construct Each society develops its own idea about what a childhood should be what children can or should do and how they are trained to take their place in the world Children also play a part in creating the archaeological record itself In this volume experts from around the world ask questions about childhood thresholds of age and growth childhood in the material culture the death of children and the intersection of the childhood and the social economic religious and political worlds of societies in the past *Archaeology* Brian M. Fagan, 2016 *Remembering the "Nubia Campaign"*, 2024-12-23 The surviving protagonists of the International Campaign to Save the Monuments of Nubia one of the most important enterprises in the field of cultural heritage met many years later at the Nubia Museum of Aswan to celebrate its 50th Anniversary It was March 2009 They recounted their personal experience in Nubia highlighting the success of the technical work carried out but without ever forgetting what has been irremediably lost in this conflict between culture and human development The Campaign transformed the Nubia region not only in a international chantier of new and challenging scientific experiences but also in a theatre of unforgettable human relationships Dynamics reflections evaluations mixed with scientific data make this volume an educational manual in the field of cultural heritage at all levels enriched by

descriptions of natural panoramas no longer visible to our eyes geological observations insights on local flora and fauna Words and images offer a vision of not only what is part of the collective memory of major events almost always scientific academic but also popular memories of ordinary individuals of which history is also made **Empire of Ancient Egypt** Wendy Christensen,2009 Presents a clear detailed picture of the life and history of the ancient Egyptians Explains why religion played such an important part in Egyptian politics who stood atop the Egyptian social pyramid what games Egyptian children played and why Egypt eventually succumbed to the Roman Empire as well as its connections to the modern world
