Eight Theories Of Religion 2e:

Eight Theories of Religion Daniel L. Pals, 2006 Why do human beings believe in divinities Why do some seek eternal life while others seek escape from recurring lives Why do the beliefs and behaviors we typically call religious so deeply affect the human personality and so subtly weave their way through human society Revised and updated in this second edition Eight Theories of Religion considers how these fundamental questions have engaged the most important thinkers of the modern era Accessible systematic and succinct the text examines the classic interpretations of religion advanced by theorists who have left a major imprint on the intellectual culture of the twentieth century The second edition features a new chapter on Max Weber a revised introduction and a revised expanded conclusion that traces the paths of further inquiry and interpretation traveled by theorists in the most recent decades Eight Theories of Religion Second Edition begins with Edward Burnett Tylor and James Frazer two Victorian pioneers in anthropology and the comparative study of religion It then considers the great reductionist approaches of Sigmund Freud Emile Durkheim and Karl Marx all of whom have exercised wide influence up to the present day The discussion goes on to examine the leading challenges to reductionism as articulated by sociologist Max Weber new to this edition and Romanian American comparativist Mircea Eliade Finally it explores the newer methods and ideas arising from the African field studies of ethnographer E E Evans Pritchard and the interpretive anthropology of Clifford Geertz Each chapter offers biographical background theoretical exposition conceptual analysis and critical assessment This common format allows for close comparison and careful evaluation throughout Ideal for use as a supplementary text in introductory religion courses or as the central text in sociology of religion and courses centered on the explanation and interpretation of religion Eight Theories of Religion Second Edition offers an illuminating treatment of this controversial and fascinating subject

Cognitive Psychology of Religion Kevin J. Eames, 2016-02-22 Is religion all in our heads Whether you believe that to be true or whether you believe that religion has a corresponding external reality i e God religion at least begins with our heads namely the cognitive architecture that predisposes human beings to belief in the sacred supernatural Cognitive Psychology of Religion explores how research in neuroscience perception cognition child development social cognition and cognitive anthropology provides insight into the development of the cognitive faculties of belief that facilitate the transmission of religion Eames has organized the text into

seven chapters that follow a clear and straightforward progression from the different theories of the origin of religion into an exploration on how our minds perceive the environment form truths spread beliefs and take part in various rituals and experiences Cognitive Psychology of Religion is a concise introduction to the cognitive science of religion and serves as an excellent primary or supplemental text for traditional psychology of religion courses **Theories of Religion** Seth Daniel Kunin,Jonathan Miles-Watson,2006 This book provides a comprehensive selection of readings that relate to and explore the definition of religion The texts come from a wide range of approaches unified both by the questions they are addressing and their broadly social scientific perspective The disciplines covered include anthropology phenomenology psychology and sociology The editors have also included some key texts relating to the feminist approach to and critique of religion The first section of the book includes some of the foundational texts such as materials by Marx Freud and Durkheim The remaining sections look at more recent discussions of the issues from the different disciplinary perspectives Each reading is introduced by a biographical sketch of the author The book also includes introductory discussions to each section that both raise the key issues developed in a particular discipline and address the disciplinary approaches from a more critical stance **Theories of Religion A Reader** is an invaluable critical resource accessible to a broad audience as well as students of theology and religious studies **Religion: The Basics** Malory Nye,2008-05-12 The new edition has been fully revised and updated and includes new discussions of the study of religion and culture in the 21st century texts films and rituals cognitive approaches to religion globalisation and multiculturalism spirituality in the West popular religion **An Archaeology of Religion** Kit W. Wesler,2012-04-20 Archaeologists have been increasingly turning their attention to the study of religion but the field so far has lacked a cross cultural overview This text challenges archaeological conventions by refusing to respect the geographic and temporal boundaries with which archaeologists too often define their field Worldwide in range and comparative in perspective this exploration is guided by several fundamental questions how do we recognize religion in the archaeological record When should we recognize the first activities we call religious What distinguishes a world religion How can we see the formations of modern world religions in the archaeological record An Archaeology of Religion begins with the first glimmers of what might be considered religious expression in the Paleolithic period and concludes with the complexities of world religions today This book is an ambitious attempt to survey how scholars approach the identification of religious sites and practices in the archaeological record **Problematizing Religious Freedom** Arvind Sharma,2011-08-08 The concept of religious freedom is the favoured modern human rights concept with which the modern world hopes to tackle the phenomenon of religious pluralism as our modern existence in an electronically shrinking globe comes to be increasingly characterised by this phenomenon To begin with the concept of religious freedom as embodied in Article 18 of the Universal Declaration of Human Rights seems self evident in nature It is the claim of this book however that although emblematic on the one hand the concept is also problematic on the other and the implications of the concept of religious freedom are far

from self evident despite the ready acceptance the term receives as embodying a worthwhile goal This book therefore problematizes the concept along legal constitutional ethical and theological lines and especially from the perspective of religious studies so that religious freedom in the world could be enlarged in a way which promotes human flourishing

Da'wa and Other Religions Matthew J. Kuiper,2017-08-14 Da wa a concept rooted in the scriptural and classical tradition of Islam has been dramatically re appropriated in modern times across the Muslim world Championed by a variety of actors in diverse contexts da wa inviting to Islam or Islamic missionary activity has become central to the vocabulary of contemporary Islamic activism Da wa and Other Religions explores the modern resurgence of da wa through the lens of inter religious relations and within the two horizons of Islamic history and modernity Part I provides an account of da wa from the Qur an to the present It demonstrates the close relationship that has existed between da wa and inter religious relations throughout Islamic history and sheds light on the diversity of da wa over time The book also argues that Muslim communities in colonial and post colonial India shed light on these themes with particular clarity Part II therefore analyzes and juxtaposes two prominent da wa organizations to emerge from the Indian subcontinent in the past century the Tabl gh Jam at and the Islamic Research Foundation of Zakir Naik By investigating the formative histories and inter religious discourses of these movements Part II elucidates the influential roles Indian Muslims have played in modern da wa This book makes important contributions to the study of da wa in general and to the study of the Tabl gh Jam at one of the world s largest da wa movements It also provides the first major scholarly study of Zakir Naik and the Islamic Research Foundation Further it challenges common assumptions and enriches our understanding of modern Islam It will have a broad appeal for students and scholars of Islamic Studies Indian religious history and anyone interested in da wa and inter religious relations throughout Islamic history

Religious Studies Gregory D. Alles,2010-03 Drawing on recent developments in the comparative study of religion this book explores the trends of the past sixty years from a global perspective Each of the ten chapters covers the study of religion in a different region of the world from Europe and the Americas to Asia and the Far East Topics covered include local background to the study of religions formation of religious studies in the region important thinkers and writings institutions interregional diversity and interregional connections emerging issues This book is a major contribution to the field of religious studies and a valuable reference for scholars researchers and graduate students

Studying Religion and Disability Emily O. Gravett,2025-08-20 Studying Religion and Disability introduces students to the many compelling and influential intersections between religion and disability The early chapters offer introductions to the two fields defining key terms and definitions tracing their origins and evolutions while also demonstrating some of the biases and baggage they bring The organization of the later chapters is inspired by the formal phenomenological or resemblance approach to understanding religion exposing students to different dimensions that all religions seem to have in common such as practices or places regardless of their specific content Featuring examples from a variety of religions this book considers

how these religions have intersected with a variety of disabilities across space and time This book provokes thought and discussion around important questions including how different disabilities are perceived represented and constructed in different dimensions of religion how and why people with disabilities engage with religion potential or documented barriers that religions present to disabled people and opportunities and insights that result when each is viewed through the lens of the other It will be essential reading for all students of Religion and Disability

The SAGE Handbook of the Sociology of Religion James A Beckford, Jay Demerath, 2007-10-29 In their introduction to this Handbook the editors affirm Many sociologists have come to realise that it makes no sense now to omit religion from the repertoire of social scientific explanations of social life I wholeheartedly agree I also suggest that this wide ranging set of essays should become a starting point for such enquiries Each chapter is clear comprehensive and well structured making the Handbook a real asset for all those engaged in the field Grace Davie University of Exeter Serious social scientists who care about making sense of the world can no longer ignore the fact that religious beliefs and practices are an important part of this world This Handbook is a valuable resource for specialists and amateurs alike The editors have done an exceptionally fine job of incorporating topics that illuminate the range and diversity of religion and its continuing significance throughout the world Robert Wuthnow Princeton University At a time when religions are increasingly affecting and affected by life beyond the narrowly sacred sphere religion everywhere seems to be caught up in change and conflict In the midst of this contention and confusion the sociology of religion provides a rich source of understanding and explanation This Handbook presents an unprecedentedly comprehensive assessment of the field both where it has been and where it is headed Like its many distinguished contributors its topics and their coverage are truly global in their reach The Handbook s 35 chapters are organized into eight sections basic theories and debates methods of studying religion social forms and experiences of religion issues of power and control in religious organizations religion and politics individual religious behaviour in social context religion self identity and the life course and case studies of China Eastern Europe Israel Japan and Mexico Each chapter establishes benchmarks for the state of sociological thinking about religion in the 21st century and provides a rich bibliography for pursuing its subject further Overall the Handbook stretches the field conceptually methodologically comparatively and historically An indispensable source of guidance and insight for both students and scholars Choice Outstanding Academic Title 2009

theories that run through Durkheim's work. This includes Durkheim's attitude towards secularisation and Christian churches as well as his notion of the contemporary cult of the individual.
