Mileva & Albert Einstein Djordje Krstić,2004 *Albert Einstein, Mileva Maric* Albert Einstein,2020-06-30 In 1903 despite the vehement objections of his parents Albert Einstein married Mileva Maric the companion colleague and confidante whose influence on his most creative years has given rise to much speculation Beginning in 1897 after Einstein and Maric met as students at the Swiss Federal Polytechnic and ending shortly after their marriage these fifty four love letters offer a rare glimpse into Einstein s relationship with his first wife while shedding light on his intellectual development in the period before the annus mirabilis of 1905 Unlike the picture of Einstein the lone isolated thinker of Princeton he appears here both as the burgeoning enfant terrible of science and as an amorous young man beset along with his fiancée by financial and personal struggles among them the illegitimate birth of their daughter whose existence is known only by these letters Describing his conflicts with professors and other scientists his arguments with his mother over Maric and his difficulty obtaining an academic position after graduation the letters enable us to reconstruct the youthful Einstein with an unprecedented immediacy His love for Maric whom he describes as a creature who is my equal and who is as strong and independent as I am brings forth his serious as well as playful often theatrical nature After their marriage however Maric becomes less his intellectual companion and failing to acquire a teaching certificate she subordinates her professional goals to his In the final letters Einstein has obtained a position at the Swiss Patent Office and mentions their daughter one last time to his wife in Hungary where she is assumed to have placed the girl in the care of relatives Informative entertaining and often very moving this collection of letters captures for scientists and general readers alike a little known yet crucial period in Einstein s life

Einstein's Pathway to the Special Theory of Relativity Galina Weinstein, 2015-06-18 This book pieces together the jigsaw puzzle of Einstein's journey to discovering the special theory of relativity Between 1902 and 1905 Einstein sat in the Patent Office and may have made calculations on old pieces of paper that were once patent drafts One can imagine Einstein trying to hide from his boss writing notes on small sheets of paper and according to reports seeing to it that the small sheets of paper on which he was writing would vanish into his desk drawer as soon as he heard footsteps approaching his door He probably discarded many pieces of papers and calculations and flung them in the waste paper basket in the Patent Office The end result was that Einstein published nothing regarding the special theory of relativity prior to 1905 For many years before 1905 he had been intensely concerned with the topic in fact he was busily working on the problem for seven or eight years prior to 1905 Unfortunately there are no surviving notebooks and manuscripts no notes and papers or other primary sources from this critical period to provide any information about the crucial steps that led Einstein to his great discovery In May 1905 Henri Poincaré sent three letters to Hendrik Lorentz at the same time that Einstein wrote his famous May 1905 letter to Conrad Habicht promising him four works of which the fourth one Relativity was a rough draft at that point In the May 1905 letters to Lorentz Poincaré presented the basic equations of his 1905 Dynamics of the Electron meaning that at this point

Poincar and Einstein both had drafts of papers relating to the principle of relativity The book discusses Einstein s and Poincar s creativity and the process by which their ideas developed The book also explores the misunderstandings and paradoxes apparent in the theory of relativity and unravels the subtleties and creativity of Einstein **The New Model of Love**

Charles Lim Wu,2018-05-11 Throughout history weve been conditioned by society media education and family to believe we need love to be happy In The New Model of Love author Charles Lim Wu examines and challenges this tightly held and deep seated belief He shows how love has evolved throughout the years and discusses the importance of realizing and accepting these changes to positively move forward Wu looks at and redefines love He explores the origins of the old model of love and tells how it no longer serves us to remain within its confines The New Model of Love discusses how it can be daunting to confront the old model but once that fear is conquered youll be free to love as youve never loved before Once you accept the new model youll find freedom in love and liberation from the shackles of needing love from others Youll stop seeking love and start creating it for yourself Using his personal experiences and discoveries as a backdrop Wu offers an opportunity to experience abundant joy and happiness in all your relationships with the goal of naturally and freely experiencing infinite love [Rising In Love](#) Osho,2009 **An Einstein Encyclopedia** Alice Calaprice,Daniel Kennefick,Robert

Albert Einstein: Mind Beyond the Universe Fabricio Sales Silva, 2025-05-07 If I stand before you today it is not as a master but as an eternal learner a tireless curious who all his life has pursued the light of understanding in a world often overshadowed by ignorance and fear My journey though punctuated by discoveries that some call genius is more truly a series of lessons learned through questions some answered many still echoing in the vast universe Imagination is more important than knowledge For while knowledge defines everything we already know and understand imagination points to everything we are yet to discover and create Life imposes challenges and questions on us that cannot be answered merely by what is known One must dare to imagine dare to be different and dare to see the world not only as it is but as it could be I grew up in a time that didn't understand my visions I often felt isolated an outsider observing the world from an angle few seemed to share But it was this same isolation that taught me to value deep reflection and creative silence I don't have any special talents but I'm deeply curious My curiosity led me to explore not only science but the complex fabrics of human existence To the young to dreamers of all ages and backgrounds I say do not be afraid of error Just be afraid of getting stagnant Anyone who has never made a mistake has never tried something new It is vital that they maintain the ability to fail and through failure learn and grow

This Perversion Called Love Margherita Long, 2009-10-08 This Perversion Called Love positions one of Japan's most canonical and best translated 20th century authors at the center of contemporary debates in feminism Examining sexual perversion in Tanizaki's aesthetic essays cultural criticism cinema writings and short novels from the 1930s it argues that Tanizaki understands human subjectivity in remarkably Freudian terms but that he is much more critical than Freud about what it means for the possibility of love According to Tanizaki perversion involves not the proliferation of interesting gender positions but rather the tragic absence of even two sexes since femininity is only defined as man's absence supplement or complement In this fascinating work author Margherita Long reads Tanizaki with a theoretical complexity he demands but has seldom received As a critique of the historicist and gender focused paradigms that inform much recent work in Japanese literary and cultural studies This Perversion Called Love offers exciting new interpretations that should spark controversy in the fields of feminist theory and critical Asian studies
