**Eisenman Architects** Peter Eisenman, 1995 In both these respects Peter Eisenman differs not only from other architects of his own generation but from nearly all other architects working today *Architectural Possibilities in the Work of Eisenman* Michael Jasper, 2022-11-11 This book examines the central decades of Peter Eisenman's work through a formal and thematic analysis of key architectural projects and writings revealing underlying characteristics and arguing for their productive continuity and transformative role The book explores Eisenman's approach to architectural form generation and thinking It does this through a thematic and formal analysis of projects and writings from the mid 1970s to the mid 1990s Following an introductory chapter addressing the theme of potentialities the book is organised in two parts The first part focuses on key period writings of Eisenman framing the close reading around a practice of resistance the architect's approach to history as analysis and the transformative conceptualisation of time In the second part the book undertakes an analysis of select projects from the 1980s and 1990s Three formal preoccupations and conceptual orientations ground manipulations figuration and spatial events organise this part of the book Previously unpublished material from the Peter Eisenman fonds Canadian Centre for Architecture Montreal provides primary source material A concluding chapter addresses Eisenman's teaching its relation to his larger project and possible legacies for educators practitioners scholars and theorists

**Architecture and Spectacle: A Critique** Gevork Hartoonian, 2016-12-05 Focusing on six leading contemporary architects Peter Eisenman Frank Gehry Bernard Tschumi Zaha Hadid Rem Koolhaas and Steven Holl this book puts forward a unique and insightful analysis of neo avant garde architecture It discusses the spectacle and excess which permeates contemporary architecture in reference to the present aesthetic tendency for image making but does so by applying the tectonic of theatricality discussed by the 19th century German architect Gottfried Semper In doing so it breaks new ground by opening up a dialogue between the study of the past and the design of the present The work of each discussed architect is seen as addressing a historiographical problem To this end and this is the second important aspect of this book the chosen buildings are discussed in terms of the thematic of the culture of building the tectonic of column and wall for example rather than the formal and this through a discussion that is informed by the latest available theories Having set the aesthetic implication of the processes of the digitalization of architecture the book's conclusion highlights strategies by which architecture might postpone the full consequences of digitalization and thus the becoming of architecture as ornament on its own right 2000 Architects Aisha Hasanovic, 2006 Doctor Haydock the resident GP of St Mary Mead hopes to cheer up Miss Marple as she recovers from the flu with a little story The tale revolves around the return of the prodigal son of Major Laxton the devilishly handsome Harry Laxton Harry after leading a life of childish indiscretions and falling head over heels for the village tobacconist's daughter has made good and returned to lay claim to his tumbling childhood home and introduce the village to his beautiful new wife But the villagers are prone to gossip about young Harry's past and one person in particular cannot

forgive him for tearing down the old house Will Miss Marple's acumen be up to the task of solving the story

theory this passionately written book makes valuable reading for any architect

Shoah Presence: Architectural Representations of the Holocaust Eran Neuman, 2016-04-01 Through the analysis of several commemorative acts in space matter and image namely museums and memorials this book reflects on the ways in which architecture as a discipline a practice and a discourse represents the Holocaust In doing so it problematises how one presents an extreme historical case in a contemporary context and integrates the historical into actuality By examining several cases the book defines the issues faced by various architects who dealt with this topic and discusses their separate and distinctive approaches In each case it analyses the ways in which the cultural and political contexts of commemoration led to a different interpretation of the condition Focusing on the Ghetto Fighters House the world's first Holocaust museum Yad Vashem Israel's national Holocaust memorial in Jerusalem the US Holocaust Memorial Museum in Washington and the Holocaust Memorial in Berlin the book discusses how the representation of history by architecture creates a dialectic process in which architecture mediates the past to the present while at the same time creating a present saturated with historical contexts It shows how together they are incorporated into one another and create a new reality past and present intertwined

**Freud for Architects** John Abell, 2020-11-22 Freud for Architects explains what Freud offers to the understanding of architectural creativity and architectural experience with case examples from early modern architecture to the present Freud's observations on the human psyche and its influence on culture and social behavior have generated a great deal of discussion since the 19th century Yet what Freud's key ideas offer to the understanding of architectural creativity and experience has received little direct attention That is partly because Freud opened the door to a place where conventional research in architecture has little traction the unconscious Adding to the difficulties Freud's collection of work is vast and daunting Freud for Architects navigates Freud's key ideas and bridges a chasm between architecture and psychoanalytic theory The book highlights Freud's ideas on the foundational developments of childhood developments on which the adult psyche is based It explains why and how the developmental stages could influence adult architectural preferences and preoccupations spatial intuition and beliefs about what is proper and right for architectural design As such Freud for Architects will be of great interest to students practitioners and scholars in a range of disciplines including architecture psychoanalysis and philosophy

*The Seeds of Time* Fredric Jameson, 1994 Long considered the foremost American Marxist theorist Fredric Jameson continues his investigation of postmodernism under late capitalism in *The Seeds of Time* In three parts Jameson presents the problem of Utopia attempting to diagnose the cultural present and to open a perspective on the future of a world that is all but impossible to predict with any certainty a telling of the future as Jameson calls it with an imperfect deck The Antinomies of Postmodernity highlights the seemingly unresolvable paradoxes of intellectual debate in the age of postmodernity Jameson suggests that these paradoxes revolve around the idea of nature the terms of antifoundationalism and antiessentialism and contemporary society's inability or refusal to consider the idea of Utopia The chapter attempts to sketch the unrepresentable

exterior of these debates which is the locus of the future according to Jameson In *Utopia Modernism and Death* Jameson meditates on the fascinating and terrifying Utopian fiction *Chevangur* written in the 1920s by the Soviet author Andrei Platonov He discusses the unique character of Utopian visions in the Second World of communism where commodity fetishism has not had as profound an effect on social relations as we have seen in the First World under late capitalism *The Seeds of Time* continues in *The Constraints of Postmodernism* with an examination of contemporary architectural trends in an attempt to suggest the limits of the postmodern By delineating these limits Jameson stakes out a prediction of the boundaries of postmodernity the unrepresentable exterior approached in Part One which we need to recognize and surpass
