**Material Imagination in Architecture** David Dernie, Jacopo Gaspari, 2016-07-07 Material Imagination in Architecture draws on history and the visual arts and contemporary architecture to explore this popular theme in architectural practice and education In the context of a discipline increasingly driven by digital production this text explores architecture and making and the diverse influences on the material reality of architectural form it argues that the crafts fabrication and assemblage of its making remain vital elements of contemporary architectural language This broad ranging text bridges the gap between a technical or otherwise fragmentary knowledge of materials of the specialist and the tacit or instinctive understanding of materials that the artist sculptor or architect may have It identifies key material themes pertinent to contemporary architectural debate and develops a discourse about future practice that is framed by environmental imperatives and grounded in a historical understanding of the meaning and use of materials Material iconology in architecture is a well established tradition and this book draws on that background to investigate the possibilities and limits of using materials in contemporary design to communicate the themes and contexts of an architectural project a material s relationship to context and to the history of practices that belong to the traditions of making buildings Each theme is explored in case studies from twelve countries around the world including the UK USA Spain Italy Germany Australia and China

*Learning from Logistics* Clare Lyster, 2016-02-22 In the 19th century railroads and canals provided both structure and motor for city development This role has been taken over today by the global flow of data and products as the author argues Flow of material and communication is the DNA of contemporary environments This development has enormous and partially unfathomable implications for our city fabric Logistics networks and their complex structure increasingly bear upon many urban spheres Counter trends to the ubiquitous internet retail trade to name one of the most palpable phenomena are gaining momentum as well exemplified by the criticism of labor conditions in e commerce and the trend to buy regional products from local stores The author describes the current development and its impact on architecture

landscape architecture and urbanism Aspects such as today's hypermobility of both products and people have repercussions in design work and create new paradigms for architecture and urban design Concepts for the integration of these new issues are introduced by a number of exemplary urban design projects Santiago Calatrava Sergio Polano, Santiago Calatrava, 1996 **Arquitectura COAM.**, 2006 **New Museums** Katharina Beisiegel, Art Centre Basel, 2017 The past decade of both economic crises in Europe and North America as well as an extraordinary museum boom in many Asian countries has led to new questions and concepts for future museum buildings New Museums Intentions Expectations Challenges investigates this paradigm change by presenting 20 recent and future museum projects on all continents Among the projects discussed are the Smithsonian's National Museum of African American History and Culture in Washington D C by Adjaye Associates the Guggenheim Helsinki by Moreau Kusunoki Architects China's Comic and Animation Museum in Hangzhou by MVRDV the Munchmuseet in Oslo by estudio Herreros the Zeitz Museum of Contemporary Art Africa in Cape Town by Heatherwick Studio the Long Museum West Bund in Shanghai by Atelier Deshaus and the extension of the Art Gallery of New South Wales in Sydney by SANAA Critical texts by leading museum and architecture writers Suzanne MacLeod Chris Dercon Karen van den Berg Wolfgang Ullrich Kali Tzortzi and Anke Gruner shed light on the relation of new museum trends and state of the art architecture *Oase #65: Architectural Journal, Winter 2004*, 2004 This issue of OASE examines how figurative architectural traditions can contribute to understanding historic dimensions that affect the everyday lives of contemporary Europeans especially in the Netherlands a place that has contributed to all forms of modernism and is at present involved in an uneasy and moralistic debate on its own traditions Set against the background of artistic production in a highly eclectic age the limited range of references explored by many architects and their focus on the forms and models of modernism produced after the 1920s are remarkably interesting and compelling *Serviços Bibliográficos da Livraria Portugal* Livraria Portugal.
