Psychiatry and Neuroscience Update Pascual Ángel Gargiulo, Humberto Luis Mesones Arroyo, 2018-11-28 This broad and thought provoking volume provides an overview of recent intellectual and scientific advances that bridge the gap between psychiatry and neuroscience offering a wide range of penetrating insights in both disciplines The third volume on the topic in the last several years from a varying panel of international experts this title identifies the borders trends and implications in both fields today and goes beyond that into related disciplines to seek out connections and influences Similar to its two Update book predecessors Psychiatry and Neuroscience Volume III presents the current state of the art in the main disciplines psychiatry and neuroscience and attempts to provide deeper comprehension or explication of the normal and diseased human mind its biological correlates and its biographical and existential implications This engaging volume continues the previous style of exploring different disciplines and trying to integrate disciplinary evidence from varying points of view in an organic manner Developed for clinicians and researchers in the fields of medicine psychiatry psychology and biology this third volume also will be of great interest to students and university professors of diverse disciplines

Cinematic Representations of Alzheimer's Disease Raquel Medina, 2018-08-09 This book offers a cross cultural approach to cinematic representations of Alzheimer's disease in non mainstream cinema Even though Alzheimer's disease the most common form of dementia is a global health issue it is not perceived or represented homogeneously around the world Contrary to very well known mainstream films the films discussed do not focus on the negative aspects normally associated with Alzheimer's disease but on the importance of portraying the perspective of the

persons living with Alzheimer's and their personhood. Similarly, this book analyses how the films use Alzheimer's as a trope to address issues relating to different areas of life and society such as, for example, family matters, intergenerational relationships, gender issues, national traditions versus global modernity, and caring for people with dementia. By examining an array of films from crime fiction to documentary that each present non-stigmatising representations of Alzheimer's disease, this in-depth study ultimately demonstrates the power of culture in shaping meaning.

Exile through a Gendered Lens

G. Zinn, 2012-03-14. This interdisciplinary anthology highlights exiled and alienated women in literature, history, and cinema. Contributors investigate when and how women from diverse backgrounds have been relegated to the margins in order to shed light on the state of alienhood that stems from gendered otherness.
