Educating Citizens Kenneth Osborne, Ken Osborne, 1988

The Canadian left has over the years paid remarkably little attention to the actual content of education. Apart from occasional bursts of concern about militarism, sexism, racism, or anti-labour bias, the school curriculum has gone largely unquestioned. Socialist values such as cooperation, participation, personal autonomy, and a sense of community do not appear out of thin air. They have to be acquired. Conservatives and liberals have long realized this and have shaped the schools accordingly so that the capitalist ethic of competitive individualism is now strongly entrenched and is learned early in life. If the vision of cooperative commonwealth is to become a reality, then education will have an important role to play. This book is an attempt to outline what this role might be. *Educating Citizens* outlines a working class curriculum designed to prepare students for participation in a socialist democracy. *An Our Schools Our Selves* book **Educating Citizens** Charles Venegoni, 2004-09-20

The United States is in the midst of historic experiments with publicly funded choice in K-12 education, experiments that recently received a green light from the Supreme Court. Other nations have long experience with the funding and regulation of nonpublic schools, including religious schools. This book asks what U.S. policymakers, public officials, and citizens can learn from these experiences. In particular, how do other countries regulate or structure publicly funded educational choice with an eye toward civic values, looking not only for improvements in test scores but also in tolerance, civic cohesion, and democratic values such as integration across the lines of class, religion, and race. The experience of Europe and Canada with school choice is both extensive and varied. In England and Wales, public school choice is widespread as parents play a significant role in selecting the school their children will attend. In the Netherlands and much of Belgium, a majority of students attend religious schools at government expense. In Canada, France, and Germany, state-financed school choice is limited to circumstances that serve particular social and governmental needs. In Italy, school choice has just recently arrived on the policy agenda. In spite of the diversity of national experiences, in all of these countries, choice is regulated by the government in significant and varied ways to promote civic values. In several of these countries, school choice policy itself appears to have played an important role in promoting social cohesion and integration. This book presents a wealth of experience designed to aid policymakers and citizens as they consider historic changes in American public education policy. **Quick Hits for Educating Citizens** James L. Perry, Steven Jones, 2006-06-06

**Research in Global Citizenship Education** Jason Harshman, Tami Augustine, Merry M. Merryfield, 2015-06-01 Globalization is changing what citizens need to know and be able to do by interrupting the assumption that the actions of citizens only take place within national borders If our neighborhoods

and nations are affecting and being affected by the world then our political consciousness must be worldminded The outcomes of globalization have led educators to rethink what students need to learn and be able to do as citizens in a globally connected world This volume focuses on research that examines how K 12 teachers and students are currently addressing the challenge of becoming citizens in a globally interconnected world Although there is an extensive body of literature on citizenship education within national contexts and a growing literature on global education this volume offers research on the work educators are doing across multiple countries to bring the two fields together to develop global citizens *Citizenship and Higher Education* James Arthur, Karen Bohlin, 2005-03-16 This comparative text considers models of higher education in the UK and the US and individuals perceptions about the role of university in society *Teachers' Beliefs about Civic and Citizenship Education in Italian High Schools* Alessandra Santoianni, 2024-11-18 Various social and political actors are responsible to educate citizens to sustain democracy Civic and Citizenship Education CCE addresses this issue and has gained prominence Italy made the subject compulsory in schools with the law n 92 2019 Different conceptualisations of CCE have the notion of citizenship at the centre which can differentiate between traditional and critical approaches Despite this little is known about what teachers believe in terms of citizenship and what the subject should involve in terms of goals content and methods This work aims to understand Italian teachers views on CCE and its implementation and contribute to its systematisation as a scientific discipline The author interviewed Italian high school teachers and analysed the results The results show that teachers beliefs about the goals of CCE relate to broad social and political issues and students learning These beliefs also show civic republican values Three macro areas of content from the 92 2019 law serve as a framework for teachers to select topics they believe are relevant and Lawfulness Education is the key to the content goals and teaching strategies Teachers are unclear whether CCE should be a separate transversal or integrated subject Ultimately they implement what they believe in despite the policy changes introduced by the 92 2019 law **The Palgrave International Handbook of Education for Citizenship and Social Justice** Andrew Peterson, Robert Hattam, Michalinos Zembylas, James Arthur, 2016-10-20 This state of the art comprehensive Handbook is the first of its kind to fully explore the interconnections between social justice and education for citizenship on an international scale Various educational policies and practices are predicated on notions of social justice yet each of these are explicitly or implicitly shaped by and in turn themselves shape particular notions of citizenship education for citizenship Showcasing current research and theories from a diverse range of perspectives and including chapters from internationally renowned scholars this Handbook seeks to examine the philosophical psychological social political and cultural backgrounds factors and contexts that are constitutive of contemporary research on education for citizenship and social justice and aims to analyse the transformative role of education regarding social justice issues Split into two sections the first contains chapters that explore central issues relating to social justice and their interconnections to education for citizenship whilst the second contains chapters that explore
