Wang, Sandra J. Odell, Renee T. Clift, 2010-07-16 This anthology on teacher induction research is intended for researchers policy makers and practitioners in the field of teacher induction both nationally and internationally This book is the final and major project of the Association of Teacher Educators ATE Commission on Teacher Induction and Mentoring Its importance is derived from three sources 1 careful conceptualization of teacher induction from historical methodological and international perspectives 2 systematic reviews of research literature relevant to various aspects of teacher induction including its social cultural and political contexts program components and forms and the range of its effects 3 substantial empirical studies on the important issues of teacher induction with different kinds of methodologies that exemplify future directions and approaches to the research in teacher induction The content of the book has direct implications for ATE s membership since part of the ATE mission is to provide opportunities for personal and professional growth of the Association membership whether members are researchers policy makers or practitioners in teacher learning and or teacher induction

Brain-powered Science Thomas O'Brien, 2010 How can a long metal needle pass through a balloon without popping it How can water flow at very different rates through two identical funnels How can a stick placed on a table under several sheets of newspaper and extended over the edge of a table snap when quickly struck without lifting or tearing the paper Author Thomas O'Brien takes these and 30 more science inquiry activities to a higher level in this book for educators who love to surprise and challenge their students with unanticipated results Using experiments based on the science of a discrepant event an experiment or demonstration in which the outcome is not what students expect O'Brien shows how learners can be motivated to reconsider their preconceived notions and think more closely about what has actually occurred and the underlying scientific explanations What makes this volume more valuable than a mere activity book is the addition of a science education component to the extensive science content found in each activity Each discrepant event is shown to be analogous to a pedagogical principle Speaking directly to teachers O'Brien writes Your participation as teacher as learner experimenter rather than simply passive reader in these minds on activities will lead you to question and help you to revise your implicit assumptions about the nature of science teaching and learning At the same time you will develop expertise with activities that you can use with your own students The dual purpose activities thus allow you to unlock two doors with one key the doors to your own learning and to your students learning The detailed analogies between the activities and science learning make the book an ideal resource for middle and high school teachers science teacher educators and their preservice students and professional development specialists alike This thorough and thought provoking text includes more than 200 up to date internet resources as well as extensions to each of the physical science biology and chemistry activities bringing the total number of inquiry activities to nearly 120 Most important the author reminds teachers that the study of science is full of surprises and should be both meaningful and fun for students *Teaching High School Science Through Inquiry* Douglas Llewellyn, 2005 This is the secondary school version of Llewellyn's strong Corwin debut *Inquire Within Implementing*

Inquiry Based Science Standards 2000 This book focuses on raising a teacher s capacity to teach science through an inquiry based process implementing inquiry as stated by the national standards The Mathematical Education of Teachers Conference Board of the Mathematical Sciences,2001 A report on the state of current thinking on curriculum and policy issues affecting the mathematical education of teachers with the goal of stimulating campus efforts to improve programs for prospective K 12 teachers Its primary audience is members of the mathematics faculties and administrators at colleges and universities but the report may also be of interest to math supervisors in school districts and state education departments to education policy bodies at the state and national levels and to accreditation and certification organizations c Book News Inc

Teaching High School Science Through Inquiry and Argumentation Douglas Llewellyn,2013 For Grades 9 12 this new edition covers assessment questioning techniques to promote learning new approaches to traditional labs and activities that emphasize making claims and citing evidence Research Based Undergraduate Science Teaching Dennis W. Sunal,Cynthia S Sunal,Emmett L. Wright,Cheryl L. Mason,Dean Zollman,2014-07-01 Research in Science Education RISE Volume 6 Research Based Undergraduate Science Teaching examines research theory and practice concerning issues of teaching science with undergraduates This RISE volume addresses higher education faculty and all who teach entry level science The focus is on helping undergraduates develop a basic science literacy leading to scientific expertise RISE Volume 6 focuses on research based reforms leading to best practices in teaching undergraduates in science and engineering The goal of this volume is to provide a research foundation for the professional development of faculty teaching undergraduate science Such science instruction should have short and longterm impacts on student outcomes The goal was carried out through a series of events over several years The website at <http://nseus.org> documents materials from these events The international call for manuscripts for this volume requested the inclusion of major priorities and critical research areas methodological concerns and results of implementation of faculty professional development programs and reform in teaching in undergraduate science classrooms In developing research manuscripts to be reviewed for RISE Volume 6 researchers were asked to consider the status and effectiveness of current and experimental practices for reforming undergraduate science courses involving all undergraduates including groups of students who are not always well represented in STEM education To influence practice it is important to understand how researchbased practice is made and how it is implemented The volume should be considered as a first step in thinking through what reform in undergraduate science teaching might look like and how we help faculty to implement such reform **Evaluating and Improving Undergraduate Teaching in Science, Technology, Engineering, and Mathematics** National Research Council,Division of Behavioral and Social Sciences and Education,Center for Education,Committee on Recognizing, Evaluating, Rewarding, and Developing Excellence in Teaching of Undergraduate Science, Mathematics, Engineering, and Technology,2002-12-19 Economic academic and social forces are causing undergraduate schools to start a fresh examination of teaching effectiveness Administrators face the complex task of

developing equitable predictable ways to evaluate encourage and reward good teaching in science math engineering and technology Evaluating and Improving Undergraduate Teaching in Science Technology Engineering and Mathematics offers a vision for systematic evaluation of teaching practices and academic programs with recommendations to the various stakeholders in higher education about how to achieve change What is good undergraduate teaching This book discusses how to evaluate undergraduate teaching of science mathematics engineering and technology and what characterizes effective teaching in these fields Why has it been difficult for colleges and universities to address the question of teaching effectiveness The committee explores the implications of differences between the research and teaching cultures and how practices in rewarding researchers could be transferred to the teaching enterprise How should administrators approach the evaluation of individual faculty members And how should evaluation results be used The committee discusses methodologies offers practical guidelines and points out pitfalls Evaluating and Improving Undergraduate Teaching in Science Technology Engineering and Mathematics provides a blueprint for institutions ready to build effective evaluation programs for teaching in science fields

And the Rest is Just Algebra Sepideh Stewart, 2016-10-20 This book addresses college students weak foundation in algebra its causes and potential solutions to improve their long term success and understanding in mathematics as a whole The authors who are experts in a wide variety of fields emphasize that these difficulties are more complex than just forgotten rules and offer strategic approaches from a number of angles that will increase the chances of student understanding Instructors who are frustrated with their students lack of skills and knowledge at college level will find this volume helpful as the authors confront the deeper reasons why students have difficulties with Algebra and reveal how to remedy the issue

Second Handbook of Research on Mathematics Teaching and Learning Frank K. Lester, 2007-02-01 The audience remains much the same as for the 1992 Handbook namely mathematics education researchers and other scholars conducting work in mathematics education This group includes college and university faculty graduate students investigators in research and development centers and staff members at federal state and local agencies that conduct and use research within the discipline of mathematics The intent of the authors of this volume is to provide useful perspectives as well as pertinent information for conducting investigations that are informed by previous work The Handbook should also be a useful textbook for graduate research seminars In addition to the audience mentioned above the present Handbook contains chapters that should be relevant to four other groups teacher educators curriculum developers state and national policy makers and test developers and others involved with assessment Taken as a whole the chapters reflects the mathematics education research community s willingness to accept the challenge of helping the public understand what mathematics education research is all about and what the relevance of their research findings might be for those outside their immediate community

Transforming University Biochemistry Teaching Using Collaborative Learning and Technology Penny J. Gilmer, 2010-03-10 One aim of Gilmer s captivating text on university pedagogy is to show that

biochemistry or any science does not consist solely of facts to be learned but is a way of thinking about the world Her purpose both in this book and in her classroom is to make her students into critical thinkers rather than passive learners The chapters cast a critical eye over research into enhanced education techniques such as collaborative learning Gilmer describes the action research she conducted in her own biochemistry undergraduate classroom into ways of improving the learning environment She offers various perspectives on the make up of her classroom including an analysis of ethnographic data The tools Gilmer employs as she hones her teaching skills include collaborative learning and technology She views the classroom through various theoretical perspectives social constructivism cultural historical activity theory and a theory that involves the dialectic between the structure of the learning environment and the agency of the learners a group among whom she includes herself She provides a wealth of autobiographical detail as well as the results of her action research which followed up on its original subjects after an interval of 11 years to see what impact her course had on their professional growth Above all this volume is proof of what can be achieved in education when teachers are as interested in the process of learning as they are in their subject itself

Improving Learning with Information Technology National Research Council, Division of Behavioral and Social Sciences and Education, Center for Education, Steering Committee on Improving Learning with Information Technology, 2002-06-03 In spring 2000 representatives from the U S Department of Education DOEd and senior staff at the National Research Council NRC recognized a common frustration that the potential of information technology to transform K 12 education remains unrealized In fall 2000 the U S DOEd formally requested that the National Academies undertake an interdisciplinary project called Improving Learning with Information Technology ILIT The project was launched with a symposium on January 24 25 2001 This report summarizes the proceedings of the symposium and is intended for people interested in considering better strategies for using information technology in the educational arena While it offers insights from the presenters on both the challenges to and the opportunities for forging a better dialogue among learning scientists technologists and educators it does not contain conclusions or recommendations Rather it highlights issues to consider constituents to engage and strategies to employ in the effort to build a coalition to harness the power of information technologies for the improvement of American education Every effort has been made to convey the speakers content and viewpoints accurately Recognizing the speculative nature of many of the speaker contributions most attributions identify a speaker by area of expertise rather than by name The report reflects the proceedings of the workshop and is not intended to be a comprehensive review of all the issues involved in the project to improve learning with information technology

Scientific Method in Brief Hugh G. Gauch, Jr, 2012-09-06 The fundamental principles of the scientific method are essential for enhancing perspective increasing productivity and stimulating innovation These principles include deductive and inductive logic probability parsimony and hypothesis testing as well as science s presuppositions limitations ethics and bold claims of rationality and truth The examples and case studies

drawn upon in this book span the physical biological and social sciences include applications in agriculture engineering and medicine and also explore science s interrelationships with disciplines in the humanities such as philosophy and law Informed by position papers on science from the American Association for the Advancement of Science National Academy of Sciences and National Science Foundation this book aligns with a distinctively mainstream vision of science It is an ideal resource for anyone undertaking a systematic study of scientific method for the first time from undergraduates to professionals in both the sciences and the humanities

Shaping the Future with Math, Science, and Technology Dennis Adams, Mary Hamm, 2011-05-16 *Shaping the Future with Math Science and Technology* examines how ingenuity creativity and teamwork skills are part of an intellectual toolbox associated with math science and technology The book provides new ideas proven processes practical tools and examples useful to educators who want to encourage students to solve problems and express themselves in imaginative ways The development of a technological knowledge based economy depends on the development of educational systems that allow schools teachers and students of diverse capabilities backgrounds and learning preferences do better with both content and imaginative problem solving This book makes the case that it is indeed possible to educate our way to a better economy and a better future Paying attention to 21st century approaches and skills can help accomplish those goals

Exemplary Science in Grades 5-8 Robert Eugene Yager, 2006 This volume is the third in NSTA s Exemplary Science monograph series which provides the results of an unprecedented national search to assess how well the Standards vision has been realized nine years after the National Science Education Standards were release

America's Lab Report National Research Council, Division of Behavioral and Social Sciences and Education, Center for Education, Board on Science Education, Committee on High School Laboratories: Role and Vision, 2006-01-20 Laboratory experiences as a part of most U S high school science curricula have been taken for granted for decades but they have rarely been carefully examined What do they contribute to science learning What can they contribute to science learning What is the current status of labs in our nation s high schools as a context for learning science This book looks at a range of questions about how laboratory experiences fit into U S high schools What is effective laboratory teaching What does research tell us about learning in high school science labs How should student learning in laboratory experiences be assessed Do all student have access to laboratory experiences What changes need to be made to improve laboratory experiences for high school students How can school organization contribute to effective laboratory teaching With increased attention to the U S education system and student outcomes no part of the high school curriculum should escape scrutiny This timely book investigates factors that influence a high school laboratory experience looking closely at what currently takes place and what the goals of those experiences are and should be Science educators school administrators policy makers and parents will all benefit from a better understanding of the need for laboratory experiences to be an integral part of the science curriculum and how that can be accomplished

Research in the Life Sciences with Dual Use Potential Bibliotheca Alexandrina, National Research

Council, Division on Earth and Life Studies, Board on Life Sciences, Committee on Developing a Framework for an International Faculty Development Project on Education about Research in the Life Sciences with Dual Use Potential, 2012-04-26

In many countries colleges and universities are where the majority of innovative research is done in all cases they are where future scientists receive both their initial training and their initial introduction to the norms of scientific conduct regardless of their eventual career paths Thus institutions of higher education are particularly relevant to the tasks of education on research with dual use potential whether for faculty postdoctoral researchers graduate and undergraduate students or technical staff Research in the Life Sciences with Dual Use Potential describes the outcomes of the planning meeting for a two year project to develop a network of faculty who will be able to teach the challenges of research in the life sciences with dual use potential Faculty will be able to incorporate such concepts into their teaching and research through exposure to the tenets of responsible conduct of research in active learning teaching methods This report is intended to provide guidelines for that effort and to be applicable to any country wishing to adopt this educational model that combines principles of active learning and training with attention to norms of responsible science The potential audiences include a broad array of current and future scientists and the policymakers who develop laws and regulations around issues of dual use
