Educational Transitions Divya Jindal-Snape, 2009-12-16. Despite variations of educational systems, when transitions in education occur, the pedagogical challenges that teachers and pupils undergo are quite similar across the globe. Transitions are phases in which pupils, peer groups and teachers have to renegotiate and rebuild their learning environment in the educational context. These various transitions in students' learning paths significantly impact on schools' everyday life. This volume explores transitions at all stages of educational progression, i.e. nursery to primary, primary to secondary and secondary to post school. It also examines these transitions across a variety of countries and types of schools. *Educational Transitions* provides up to date literature, research and theoretical constructs that help readers understand the issues, social, emotional, psychological dimensions and evidence based possible interventions to support an individual through these educational transitions. It also allows scholars, teachers and students to critically analyse how lessons learned from one country can be adapted for other countries' educational systems.

Indigenous Pathways, Transitions and Participation in Higher Education Jack Frawley, Steve Larkin, James A. Smith, 2017-05-31. This book is open access under a CC BY 4.0 license. This book brings together contributions by researchers, scholars, policy makers, practitioners, professionals and citizens who have an interest in or experience of Indigenous pathways and transitions into higher education. University is not for everyone, but a university should be for everyone. To a certain extent, the choice not to participate in higher education should be respected, given that there are other avenues and reasons to participate in education and employment that are culturally, socially and/or economically important for society. Those who choose to pursue higher education should do so knowing that there are multiple pathways into higher education and once there, appropriate support is provided for a successful transition. The book outlines the issues of social inclusion and equity in higher education and the contributions draw on real world experiences to reflect the different approaches and strategies currently being adopted. Focusing on research, program design, program evaluation, policy initiatives and experiential narrative accounts, the book critically discusses issues concerning widening participation.
