## **Education Education Education Managerial Ethics And The Law Of Unintended Consequences:**

*Education! Education! Education!* Stephen Prickett, 2013-05-22 The essays in this book criticise the new positivism in education policy whereby education is systematically reduced to those things that can be measured by so called objective tests School curricula have been narrowed with an emphasis on measurable results in the 3 R s and the quality of university departments is now assessed by managerial exercises based on commercial audit practice As a result the traditional notion of liberal arts education has been replaced by utilitarian productivity indices Education and the Voice of Michael Oakeshott Kevin Williams, 2024-08-14 The work of Michael Oakeshott has retained a striking currency in philosophical discourse about education This is hardly surprising in view of his influence on Paul Hirst and Richard Peters two philosophers whose work had an enormous impact on educational thinking and practice in the English speaking world And although much of the detail in educational debate may change the fundamental underlying concerns regarding the conception of the person the nature of knowledge and the moral life and their expression in educational institutions and activities remain subject of disagreement In the light of this continuing interest and of Oakeshott s extensive writing on so many aspects of education it is timely that a book be published on his thinking on the subject *Calculating the Human* L. Doria, 2013-07-12 Why does contemporary calculation develop as calculation of the quality of everything How should we consider calculation of quality and the relationship between calculation and enhancement of life These and related questions are addressed through phenomenological investigation and a critical analysis of the social science debate The Cognitive Approach to Conscious Machines Pentti O. Haikonen, 2003 The author argues that true conscious machines can be built but rejects artificial intelligence and classical neural networks in favor of the emulation of the cognitive processes of the brain Novel views on consciousness and the mind body problem are presented The Party's Over Keith Sutherland, 2013-12-09 Consider the following paradox As the leaders of both of the main British political parties subscribed to the neoconservative doctrine on Iraq everybody else in the birthplace of parliamentary democracy was effectively disenfranchised Yet one of the rationales supporting the deployment of UK forces in Iraq was the wish to export democracy to the Middle East The Emperor would appear to have mislaid his clothes see Gordon Graham s Case Against the Democratic State Judging from the lack of ministerial resignations in the wake of the Butler enquiry Britain is no longer a parliamentary democracy The classical doctrine of joint and several ministerial responsibility is revealed to be a fiction and Lord Hailsham s verdict of elective dictatorship is a better assessment of the British constitution By contrast unelected bodies like the BBC are now far more accountable for their actions The reason of this paradox is the monopoly power of the ruling party controlled by the Prime Minister The UK political party started off as a loose association of like minded MPs However in recent years the tail has been wagging the dog politicians now have no alternative but to choose and then fall in line behind a strong leader with the charisma to win elections This book examines the historical forces that gave rise to the modern political party and questions

its role in the post ideological age If we all now share the liberal market consensus then what is the function of the party Parties in America are a lot weaker so the book considers Graham Allen s argument to emulate the US system of checks and balances but concludes that we would be better off reinterpreting our own constitution more literally When the Chancellor really was a minister of the crown every line of the budget was meticulously scrutinized The key to the changes advocated in the book is the replacement of the Victorian ballot box with a modern system of representation based on the jury selection principle

**The Case Against the Democratic State** Gordon Graham,2002 We are now so familiar and accepting of the State s pre eminence in all things that few think to question it and most suppose that democratic endorsement legitimizes it The aim of this book is to present a compelling argument against both presumptions

**God in Us** Anthony Freeman,2001 This text is a radical representation of the Christian faith for the 21st century It overturns received ideas about God God is not an invisible person out there somewhere but lives in the human heart and mind as the sum of all our values and ideals guiding and inspiring our lives

*Posh Talk* S. Preece,2009-08-28 An in depth study of a group of multilingual students from widening participation backgrounds on a first year undergraduate academic writing programme The book explores ways in which identity positions emerge in the spoken interaction with a particular focus on gender

**The Future of Evaluation** Wolfgang Meyer,Reinhard Stockmann,2016-01-26 Evaluation has become an important instrument for rational governance and is used in an increasing number of countries and policy fields Recent developments at the global national and local level are changing the conditions and functions of evaluation worldwide This book examines current global development trends and changing demands for evaluation It addresses issues surrounding professionalisation and globalisation examining the need to strengthen accountability for social development in various different policy fields regions and countries to improve governance and its impacts on social betterment It also considers issues of quality utility and further education and the upgrading of evaluation in a broad variety of different organisations such as multilateral donor organisations national public administrations private consultancies civil society organisations universities and research institutes With contributions from 30 different countries this book combines a broad variety of viewpoints to examine the global future of evaluation

A People's Parliament/A Citizen Legislature Keith Sutherland,Ernest Callenbach,Michael Phillips,2024-08-14 Two essays printed back to back in a single volume offer complementary solutions to the democratic deficit in Britain and the USA In his book *The Party s Over Blueprint for a Very English Revolution* 2004 Keith Sutherland questioned the role of the party in the post ideological age and concluded that it would be better for government ministers to be appointed by headhunters and held to account by a people s parliament selected by lot This completely revised and updated edition includes a study of the recent literature on deliberative polling The American founders proposed that their legislature should be an exact portrait in miniature of the people at large Whether or not this was true at the time the exponential growth of the population skyrocketing campaign funding the power of pressure groups the grease of the pork barrel and the dominance of charisma

and demagoguery means that the US Constitution could now better be described as a kleptocracy This pioneering essay proposes selecting Congressional members by random lot leaving the Senate and Presidency unchanged to restore a direct powerful voice in Washington to the whole of America Originally published in 1985 this new edition includes an introduction by political scientist Peter Stone

**The Documentary Audit** Pooja Rangan, 2025-07-01 Documentary films are often celebrated with aural metaphors they give voice to the voiceless and ask the public to listen But when did listening become synonymous with social justice How exactly do documentaries train audiences to listen when they ask them to right historic wrongs or hold power to account The Documentary Audit challenges the association of listening with accountability and charts oppositional modes of listening otherwise Pooja Rangan develops a framework for understanding how documentary practices have under the mantle of accountability provided a moral cover for listening habits that are used to profile exclude and incarcerate From the British Crown's promotional films to Zoom meeting recordings from disability informed filmmaking in Japan to forensic efforts to expose anti Palestinian violence in Hebron Rangan explores how historical and contemporary practitioners have challenged and refused the lures of normative documentary listening habits in order to listen with an accent listen in crip time and listen like an abolitionist Through an interdisciplinary approach that bridges documentary and sound studies while considering raciolinguistics disability access and legal forensics Rangan demonstrates how the question of listening is central to the study of documentary Far from being a neutral ethic The Documentary Audit shows listening creates the reality it purports to verify with transformative political possibilities

*The Changing Role of the Public Intellectual* Dolan Cummings, 2013-09-27 Ideas can define and transform society but how healthy is intellectual life today In a period when Big Brother refers not to George Orwell but to a reality TV show and when bright young things are developing gameshow formats rather than scribbling essays when thinkers join think tanks to design short term government policy rather than reflecting on and challenging the status quo and when the ever growing number of graduates seem more interested in job prospects than academic endeavour is intellectual life in terminal decline This book looks at the idea of the public intellectual considering whether such thinkers are becoming an endangered species It also looks at the legacy of relativism and ethical doubts about the pursuit of knowledge and the effect of such developments on intellectual life The final section considers the expansion of higher education and the changing role of the academic Taken together the essays in this collection form a comprehensive overview of the intellectual climate today and the possibilities for the future This volume was previously published as a special issue of the journal Critical Review of International Social and Political Philosophy CRISPP

*Unlearning* Nader N. Chokr, 2013-09-25 One view of education appealing to the Latin root educare to train or mold aims to fill students heads with knowledge and turn them into disciplined normalized and potentially productive members of the workforce An alternative appealing to the Latin root educere to lead out or draw out wants to produce well trained minds and create individuals capable of questioning critical thinking imagination and self reflective deliberation as

engaged citizens This book commends a third way inspired by the Greek notion of paideia which sees education as the process of educating person into their true form the real and genuine human nature This education is not about learning a trade It is a dynamic living thing in which the ability to UNlearn is essential for developing a good and capable citizen trained for freedom autonomy and virtue      **Education! Education! Education!** Stephen Prickett, Patricia Erskine-Hill, 2002 In this work Stephen Prickett presents a critique of contemporary education policy      *Tony Blair and the Ideal Type* J.H.

Grainger, 2013-11-20 The ideal type is Max Weber's hypothetical leading democratic politician whom the author finds realized in Tony Blair He is a politician emerging from no obvious mould treading no well beaten path to high office and having few affinities of tone character or style with his predecessors He is the Outsider or Intruder not belonging to the given of British politics and dedicated to its transformation Here is a timely critique of Blair's political persona as he presents himself to the British people to be entrusted with a third term as Prime Minister      **The Oxford Handbook of**
