Education Matters Government Markets And New Zealand Schools:

Education Matters Mark Harrison, 2004 *What America Can Learn from School Choice in Other Countries* David Salisbury, James Tooley, 2005-06-25 Parents in many other countries have more freedom of choice in education than Americans do. In Chile, Sweden, and the Netherlands, they can choose private schools without financial penalty. As we expand school choice in the United States, reformers and policymakers should look beyond our borders and learn from the examples of other countries. Critics in America claim that school choice would benefit a minority of students at the expense of the majority or that choice in education would drain funding from public schools and segregate students into racial or economic groups. Are these claims based on fact or fear? In this collection, scholars from Europe, South America, New Zealand, Australia, Canada, and the United States examine other countries' experiences with school choice and draw out critical lessons for America. What school choice policies are most effective? How well do private schools serve the poor? What policies are necessary to promote the widest selection of educational opportunities for the largest number of children? Also, what controls and regulations are most harmful to the development of a competitive education industry? Has school choice in other countries led to a free education market, or has it at least in some cases led instead to increased regulations, regimentation, and uniformity among private and public schools? The wealth of information and insights contained in this volume will aid policymakers and reformers as they search for the best ways to improve American education. **The Routledge**

century and present times each chapter traces the factors that have impacted educational philosophy and goals for each country Identifying available options for students of all economic backgrounds each chapter also includes a Day in the Life feature that shares with readers what a typical student in that country will experience at their school Australia Fiji New Zealand Papua New Guinea Samoa

School Choice and the Quasi-market Geoffrey Walford,1996-01-01 Throughout much of the industrialised world in the 1980s and 1990s governments divested themselves of responsibility for providing services for their citizens and espoused the ideology of the market In education the term quasi market has been used to describe the situation where the market forces introduced into schooling differ in some fundamental respects from classical free markets This book brings together specially written accounts of developments in the quasi market in nine countries The authors were asked to focus on their own particular country and to review policy developments in school choice over the previous five to ten years In addition they were asked to assess the research evidence on the workings of the quasi market of schools and in particular the effects of such changes on children of different genders and from differing social class and ethnic backgrounds The result is a series of thought provoking articles that add greatly to our understanding of the pressures that led to quasi markets in education and of how particular countries have responded to such changes and to the potentially inequitable effects of such moves

Liberty & Learning Robert C. Enlow,Lenore T. Design, Education and Pedagogy Leon Benade, Mark Jackson, 2020-06-09 This book explores the increasing emergence within educational institutions such as schools and universities of large flexible spaces whose design is underpinned by cutting edge principles and technologies These changes in educational facilities have spawned a range of new terminology For example terms such as modern learning environments innovative learning environments flexible learning environments and new generation learning spaces have gained currency in recent years The development of flexible learning spaces while suggesting design creativity also points to the desire by governments to influence educational outcomes The displacement of traditional classrooms also presupposes varied teaching and learning approaches calling on teachers to work in teams and to de privatise their practice into spaces that are transparent and porous These developments in the area of educational facilities suggest critical questions regarding the origins and purposes of these changes in educational thinking and practice Questions must also be raised about the links between conception design intention and spatial practice Underlying these questions are competing views on the design of education facilities This volume gathers a range of international authors who theorise these questions at the intersection of building design pedagogy and educational policy The chapters in this book were originally published in the journal *Educational Philosophy and Theory*
