Education Myths Jay P. Greene,2005-08-04 How can we fix America s floundering public schools The conventional wisdom says that schools need a lot more money that poor and immigrant children can t do as well as most American kids that high stakes tests just produce teaching to the test and that vouchers do little to help students while undermining our democracy But what if the conventional wisdom is wrong In *Education Myths What Special Interest Groups Want You to Believe About Our Schools And Why It Isn t So* Jay Greene and the researchers at the Manhattan Institute have gathered the evidence to show that much of what people believe about education policy is little more than a series of myths Greene takes on the conventional wisdom and closely examines eighteen myths advanced by the special interest groups dominating public education In addition to the money myth the class size myth and the teacher pay myth Greene debunks the special education myth special ed programs burden public schools the certification myth certified or more experience teachers are more effective in the classroom the graduation myth nearly all students graduate from high school the draining myth choice harms public schools the segregation myth private schools are more racially segregated and several more Greene s reasoned and accessible approach identifies the myth and then refutes it with relevant and reliable facts and figures including the education establishment s own research He believes our schools can be fixed and concludes the book with important recommendations that will achieve measurable and affordable success This is essential reading for all those interested in quality public education and a wake up call for undemanding taxpayers **U.S.-Taiwan Free Trade Agreement: Likely Economic Impact of FTA Between the U.S. and Taiwan, Inv. 332-438** , **Handbook of Educational Psychology**

Population Change in the United States Steve H. Murdock, Michael E. Cline, Mary Zey, Deborah Perez, P. Wilner Jeanty, 2015-10-23 This new volume maps the complex interplay of demographic and socioeconomic changes in the United States where rapid aging and ethnic diversification are merely the most salient of the many issues with major long-term implications. Drawing on The United States Census Bureau's post 2010 detailed projections as well as a wealth of data distilled from authoritative sources, the authors tackle many of the urgent policy questions raised by America's changing population. The book explores the ways economic markets are adapting to an older and more diverse customer base; how the projected demographic change will impact public service demand; the growing economic disparities between asset-rich baby boomers and youth struggling for economic security; and how the projected demographic patterns will change the fiscal, economic, education, health, and housing sectors and alter the social structures and processes impacting American households and the diverse array of America's future population. A thorough survey of major demographic patterns in the USA up to 2050 is followed by an assessment of how these will affect socioeconomic, public service, fiscal, economic, and social structures and mechanisms down to the size and composition of households. The analysis then considers possible variations of outcome predicated on alternative dynamic patterns between demographics and socioeconomics. Cutting through the politics and communal anxieties with hard-cutting edge data, this study will be a primary source for all those who must use its contents to guide their decisions.

Status and Trends in the Education of Racial and Ethnic Groups (2010) Susan Aud, 2011-08

Attitudes, Aptitudes, and Aspirations of American Youth National Research Council, Division of Behavioral and Social Sciences and Education, Board on Behavioral, Cognitive, and Sensory Sciences, Committee on the Youth Population and Military Recruitment, 2003-01-01

Recruiting an all-volunteer military is a formidable task. To successfully enlist one eligible recruit, the Army must contact approximately 120 young people. The National Research Council explores the various factors that will determine whether the military can realistically expect to recruit an adequate fighting force, one that will meet its upcoming needs. It also assesses the military's expected manpower needs and projects the numbers of youth who are likely to be available over the next 20 years to meet these needs. With clearly written text and useful graphics, *Attitudes, Aptitudes, and Aspirations of American Youth* offers an overview of important issues for military recruiters, touching on a number of important topics including sex and race, education, and aptitude; physical and moral attributes; and military life and working conditions. In addition, the book looks at how a potential recruit would approach the decision to enlist, considering personal, family, and social values and the options for other employment or college. Building on the need to increase young Americans' propensity to enlist, this book offers useful recommendations for increasing educational opportunities while in the service and for developing advertising strategies that

include concepts of patriotism and duty to country Of primary value to military policymakers recruitment officers and analysts Attitudes Aptitudes and Aspirations of American Youth will also interest social scientists and policy makers interested in youth trends *Can Unlike Students Learn Together?* Herbert J. Walberg, Arthur J. Reynolds, Margaret C. Wang, 2006-06-01 For the first time this book brings together three controversial topics homogeneous grouping of students within classrooms by ability or achievement criteria tracking of students into courses of study by the same criteria and retention of students in their present grade so that they repeat a year's work instead of being promoted The editors solicited syntheses of research on these topics from outstanding scholars with a variety of views **No Excuses** Stephan Thernstrom, Abigail Thernstrom, 2009-07-14 Black and Hispanic students are not learning enough in our public schools and their typically poor performance is the most important source of ongoing racial inequality in America today thus say Abigail and Stephan Thernstrom the racial gap in school achievement is the nation's most critical civil rights issue and an educational crisis it's no wonder that No Child Left Behind the 2001 revision of the Elementary and Secondary Education Act made closing the racial gap in education its central goal An employer hiring the typical Black high school graduate or the college that admits the average Black student is choosing a youngster who has only an eighth grade education In most subjects the majority of twelfth grade Black students do not have even a partial mastery of the skills and knowledge that the authoritative National Assessment of Educational Progress calls fundamental for proficient work at their grade No Excuses marshals facts to examine the depth of the problem the inadequacy of conventional explanations and the limited impact of Title I Head Start and other familiar reforms Its message however is one of hope Scattered across the country are excellent schools getting terrific results with high needs kids These rare schools share a distinctive vision of what great schooling looks like and are free of many of the constraints that compromise education in traditional public schools In a society that espouses equal opportunity we still have a racially identifiable group of educational have-nots young African Americans and Latinos whose opportunities in life will almost inevitably be limited by their inadequate education When students leave high school without high school skills their futures and that of the nation are in jeopardy With successful schools already showing the way no decent society can continue to turn a blind eye to such racial and ethnic inequality **The Latina/o Pathway to the Ph.D.** Jeanett Castellanos, Alberta M. Gloria, Mark Kamimura, 2023-07-03 The Latina/o population constitutes the largest racial and ethnic minority group in the U S and is disproportionately under represented in college and in graduate programs This is the first book specifically to engage with the absence of Latinas/os in doctoral studies It proposes educational and administrative strategies to open up the pipeline and institutional practices to ensure access support models and training for Latinas/os aspiring to the Ph D The under education of Latina/o youth begins early Given that by twelfth grade half will stop out or be pushed out of high school and only seven percent will complete a college degree it is not surprising so few enter graduate studies When Latina/o students do enter higher education few attend those colleges or universities that are

gateways to graduate degrees Regardless of the type of higher education institution they attend Latinas/os often encounter social and academic isolation unaffordable costs and lack of support This historic under representation has created a vicious cycle of limited social and economic mobility There is a paucity of the Latina/o faculty and leaders whom research shows are essential for changing campus climate and influencing institutions to adapt to the needs of a changing student body As a result Latina/o graduate students often have few role models advocates or mentors and limited support for their research agendas By reviewing the pipeline from kindergarten through university this book provides the needed data and insights to effect change for policy makers administrators faculty and staff and material for reflection for aspiring Latina/o Ph.D.s on the paths they have taken and the road ahead The book then addresses the unique experiences and challenges faced by Latinas/os in doctoral programs and offers guidance for students and those responsible for them Chapters cover issues of gender and generational differences the role of culture in the graduate school mentorship pursuing research and professional development opportunities for Latinas/os The book closes with the voices of by Latina/o students who are currently pursuing or recently completed their doctoral degree These narratives describe their cultural and educational journeys providing insight into their personal and professional experiences These stories bring alive the graduate experience for anyone interested in successful recruitment retention and graduation of Latina/o doctoral students an inspiration and guidance to those aspiring to the doctorate
