

Gleißner receives. Kreisky and Gleißner were not only political opponents under the Second Republic but in hostile camps during Austria's short civil war of 1934. Kreisky points out that he understood Gleißner better when they spent a whole day together having to inspect certain areas of Austria which were devastated by flood waters in 1953. He was impressed with Gleißner's knowledge in cultural and literary matters and with his tolerant way of thinking, so that he appreciated him thereafter as a representative of the positive principle of hope (p. 180) and, thus, a kindred spirit.

The entire volume is well edited by a team from the State Archives of Upper Austria. Besides the book's main body of essays, there is an appendix with Gleißner's *curriculum vitae*, an annotated listing of all the contributors, and an index of important geographic locations pertinent to Gleißner's life. Throughout the volume are photographs illustrating the career of this remarkable Austrian citizen.

Zeps, Michael J. *Education and the Crisis of the First Republic*. In *East European Monographs*, no. 221. Boulder, Colo.: East European Monographs, 1987. Pp. 241. \$25.

From the time of Maria Theresa, debate over education in Austria was dominated by the problems of the place of religion in the schools and the relations between church and state. These questions were never satisfactorily resolved, in large part because they generated such impassioned feelings that it was generally more desirable to maintain the uneasy Josephin liberal com-

promise than to seriously tackle the issue.

During the First Republic the Social Democrats were determined to reduce the influence of the Catholic Church. Otto Glöckel, Socialist undersecretary for instruction, a moderate revisionist who nonetheless was strongly anticlerical, decreed that no pupil could be forced by a school to attend religious instruction or observances against his or her will. The church complained about what it saw as a violation of its legal rights, but such was the insecurity of the overall political situation that it prudently tried to avoid a head-on confrontation. The sensitivity of the educational issue was such that it required a two-thirds parliamentary majority to change any law dealing with education. This meant that before February 1934 any fundamental new departures were impossible.

Otto Glöckel carried out a number of educational reforms that were generally welcomed, and most Christian Socials felt it prudent to ignore the lamentations of the church and to accept the need for greater flexibility within the school system and for better opportunities for the pupils to enjoy the maximum of educational benefits. Ignaz Seipel was a wise enough politician to wish to avoid a fruitless struggle between the church and the advocates of secular education. As a political realist he believed that the church had to accept the situation as it existed, and as a priest he felt that it was not seriously hampered thereby. The bishops, although divided on how best to tackle the problem, thought that since the vast majority of Austrians were baptized Catholics, they stood a good chance of controlling almost all the schools in the country. The Social Democrats, many of whom were also Catholics, had less totalitarian ambitions. They were mainly concerned that children should not be forced to take religious instruc-

John Dewey and Chinese Education ,2022-02-22 This book celebrates the centennial of Dewey's visit to China 1919 1921 Reflecting on the history of Dewey's visit is critical to understanding China's modernization and to reevaluating the early efforts of the radical intellectuals in the May Fourth Movement 1919 some of whom were Dewey's students at Columbia University This study also helps us to critically reflect on the China US relationship for our contemporary world The historical philosophical and comparative perspectives applied in this book may shed light on current conflicts Dewey's thoughts were well received by different scholars but also misperceived or misinterpreted in different historical periods This project tries to understand the challenges of both cultures Chinese and Western by using this historical episode as a distant mirror to better perceive and understand the present By reviewing this historical event we also find new space to reinterpret Eastern philosophies such as Confucianism and Buddhism We find that there's some surprising commonalities shared by Confucianism Buddhism and Deweyan pragmatism that provide possibilities for seeking a more inclusive conceptual framework for education in the West as well as the East

A History of Higher Education Exchange Teresa Brawner Bevis,2013-10-01 Weakened by two Opium Wars and a succession of internal rebellions in the mid 1800s China's imperial leaders made a historic decision to break a tradition of isolation and seek education outside the homeland's borders In time an acquisition of science and technology from the rapidly industrializing West would enable China to modernize its still

feudal economy and outdated military thus restoring stability and establishing protection from future foreign encroachment Today more than 200 000 Chinese are enrolled in colleges and universities across the United States while the number of Americans choosing to study in China is rising As we approach mid century China is assuming a lofty position of world leadership This book does not attempt to debate or determine the extent to which higher education exchange with the United States has impacted China s rise Instead it focuses on the story itself of Sino American education trade from its roots in antiquity to the present time highlighting the people programs trials and triumphs that have wrought its extraordinary history It will offer the first sequential historically grounded book length review of Sino American education exchange that takes the story from its origins to the present day

Federalism and Education Kenneth K. Wong,Felix Knüpling,Mario Kölling,2018-04-01 Federalism has played a central role in charting educational progress in many countries With an evolving balance between centralization and decentralization federalism is designed to promote accountability standards without tempering regional and local preferences Federalism facilitates negotiations both vertically between the central authority and local entities as well as horizontally among diverse interests Innovative educational practices are often validated by a few local entities prior to scaling up to the national level Because of the division of revenue sources between central authority and decentralized entities federalism encourages a certain degree of fiscal competition at the local and regional level The balance of centralization and decentralization also varies across institutional and policy domains such as the legislative framework for education drafting of curricula benchmarking for accountability accreditation teacher training and administrative responsibilities at the primary secondary and tertiary levels Given these critical issues in federalism and education this volume examines ongoing challenges and policy strategies in ten countries namely Australia Austria Belgium Canada Germany Italy Spain Switzerland United Kingdom and the United States These chapters and the introductory overview aim to examine how countries with federal systems of government design govern finance and assure quality in their educational systems spanning from early childhood to secondary school graduation

Particular attention is given to functional division between governmental layers of the federal system as well as mechanisms of intergovernmental cooperation both vertically and horizontally. The chapters aim to draw out comparative lessons and experiences in an area of great importance to not only federal countries but also countries that are emerging toward a federal system.

Dynamics in Education Politics Hannu Simola, Jaakko Kauko, Janne Varjo, Mira Kalalahti, Fritjof Sahlström, 2017-03-16

Dynamics in Education Politics: Understanding and Explaining the Finnish Case introduces a new theoretical framework characterised as Comparative Analytics of Dynamics in Education Politics (CADEP). Albeit the topicality of comparative research is obvious in the current era of global large scale assessment with its concomitant media visibility and political effects, comparative education is still suffering from certain methodological deficits and is in need of robust theorisation. Focusing on relational dynamics between policy threads, actors and institutions in education politics, CADEP seriously considers the phenomena of complexity, contingency and transnationality in late modern societies. In this book, CADEP is applied and validated in analysing the Finnish Educational Miracle that has been attracting attention in the educational world ever since they rocketed to fame following the PISA studies during the 2000s. This book will open up opportunities for mutual understanding and learning rather than just celebrating the exceptional circumstances or sustainable leadership. Areas covered include:

- The analytics of dynamics in education politics
- The dynamics of policy making and governance
- The dynamics of educational family strategies
- The dynamics of classroom culture

It is vital for humankind to be able to learn from each other's successes and failures and this applies in education too. This book is thus a valuable read for anyone interested in the education system and wanting to shape the learning environment.

An Unfulfilled Promise Michael Cross, 2011

This study brings to light the complexities and intricacies of transforming schools in the context of two conflicting and contradictory processes of transition: the transition from the colonial system of government to a totalitarian and centralised system rooted in a Socialist discourse and the departure from a failed Socialist project en route to an unknown future dictated by a neo liberal discourse, liberal democracy and free market economy. It will be of interest to those concerned with the question of education reform in developing countries, particularly students, teachers and researchers. The study covers an important gap in Southern African studies in addressing the question of school reform under conditions of conflict and emergency.
