India: Preparation for the World of Work Matthias Pilz, 2016-01-27 This book explores how the Indian education and training system prepares young people for the world of work and for the requirements of the employment market because India is a leading industrialised nation with a very young population and a high demand for a skilled workforce. Indian experts write from a course specific perspective offering a comprehensive picture of educational policy, curriculum design and cultural characteristics. The virtual absence of a formalised system of vocational training in India underlines the importance of this research.

Ambiyar, Unung Verawardina, Oskah Dakhi, 2023-05-01 This is an open access book. Indonesia as a member of ASEAN is now facing the ASEAN Economic Community AEC 2016. The AEC will support the ASEAN's transformation into a region that guarantees free movement of goods, services, capital and skilled labor. This will make ASEAN an even more dynamic and competitive region. In preparation for the AEC, the ASEAN member countries have ventured to improve the comparability and connectivity of their TVET systems. As an important component of human resources development, TVET is expected to play an active role in preparing the successful EAC. The implications of technological, economic and social trends are intervening factors that refine pedagogical strategies leading to the molding of TVET as a more effective platform to catalyze pragmatic approaches to prepare the workforce for the new imperatives of the world of work. Regional integration and harmonization of TVET in the region have become key concerns and at the same time the strength of the ASEAN region. They are considered

requires new methodological philosophical scientific sociological economic ethical and political perspectives that
fundamentally rethink the categories of work and education What is required is political will and social vision to respond to
the question What is the role of education in a digital age characterized by potential mass technological unemployment Today
s technologies are beginning to cost more jobs than they create and this trend will continue There have been many proposed
solutions to this problem and they invariably involve an educational vision Yet in a world that simply doesn t offer enough
work for everyone education is clearly not a panacea for technological unemployment This collection presents responses to
this question from a wide spectrum of disciplines including but not limited to education studies philosophy history politics
