History of Modern Japanese Education Benjamin C. Duke, 2009 The History of Modern Japanese Education is the first account in English of the construction of a national school system in Japan as outlined in the 1872 document the Gakusei Divided into three parts tracing decades of change the book begins by exploring the feudal background for the Gakusei during the Tokugawa era which produced the initial leaders of modern Japan Next Benjamin Duke traces the Ministry of Education's investigations of the 1870s to determine the best western model for Japan including the decision to adopt American teaching methods He then goes on to cover the eventual reverse course sparked by the Imperial Household protest that the western model overshadowed cherished Japanese traditions Ultimately the 1890 Imperial Rescript on Education integrated Confucian teachings of loyalty and filial piety with Imperial ideology laying the moral basis for a western style academic curriculum in the nation's schools **Women and Confucian Cultures in Premodern China, Korea, and**

Japan Dorothy Ko, JaHyun Kim Haboush, Joan R. Piggott, 2003-08-28 This book rewrites the history of East Asia by rethinking the contentious relationship between Confucianisms and women **The History of Education in Japan (1600 - 2000)**

Masashi Tsujimoto, Yoko Yamasaki, 2017-03-16 As one of the most rapid and earliest nations to achieve Western modernisation much of Japan's success stems from its fruitful literacy history during the Tokugawa shogunate as well as later influences from Western educational ideals and consequent economic and democratic conflicts in Japan. This book seeks to enlighten readers on how education and schooling contributed to Japan's particular process of modernisation and industrialisation. These historical insights can be applied to crises in formal and systemised education today and form the basis of potential solutions to controversies faced by formal education in Japan and other nation states. A book that bridges the international information gap in Japan's history of education will be immensely valuable to historians of both international and Japanese education. *The History of Education in Japan (1600 - 2000)* Masashi Tsujimoto, Yoko

Principle, Praxis, and the Politics of Educational Reform in Meiji Japan Mark Lincicome, 1995-04-01 Scholars of modern Japan agree that education played a crucial role in that country's rapid modernization during the Meiji period 1868-1912. With few exceptions however Western approaches to the subject treat education as an instrument of change controlled by the Meiji political and intellectual elite. *Principle, Praxis, and the Politics of Educational Reform in Meiji Japan* offers a corrective to this view. By introducing primary source materials including teaching manuals, educational periodicals and primary school textbooks missing from most English language works, Mark Lincicome examines an early case of resistance to government control that developed within the community of professional educators. He focuses on what began in 1872 as an attempt by the newly established Ministry of Education to train a corps of professional teachers that could civilize and enlighten the masses in compulsory primary schools. Through the Tokyo Normal School and other new teacher training schools sponsored by the government the ministry began what it thought was a straightforward technology transfer of the latest teaching methods and materials from the United States and Europe. Little did the ministry realize that it was planting the seeds of broader reform that would challenge not only its underlying doctrine of education but its very authority over education. The reform movement centered around efforts to explicate and disseminate the doctrine of *kaihatsushugi* (developmental education). Hailed as a modern scientific approach to child education it rejected rote memorization and passive learning elements of the so called method of pouring in *chunyu* knowledge practiced during the preceding Tokugawa period and

sought instead to cultivate the unique innate abilities of each child Orthodox ideas of education knowledge and the process by which children learn were challenged The position and responsibilities of the teacher were enhanced consequently providing educators with a claim to professional authority and autonomy at a time when the Meiji state was attempting to control every facet of the Japanese school system Principle Praxis and the Politics of Educational Reform in Meiji Japan analyzes a key element to understanding Meiji development and modern Japan as a whole Education Reform in Japan Leonard James Schoppa, 2002-03-11 The Japanese education system while widely praised in western countries is subject to heavy criticism within Japan Education Reform in Japan analyses this criticism and explains why proposed reforms have failed The author shows how the Japanese policy making process can become paralysed when there is disagreement and argues that this immobilism can affect other areas of Japanese policy making Education and Schooling in Japan since 1945 Edward R. Beauchamp, 2014-09-19 The best scholarship on the development of contemporary Japan This collection presents well over 100 scholarly articles on modern Japanese society written by leading scholars in the field These selections have been drawn from the most distinguished scholarly journals as well as from journals that are less well known among specialists and the articles represent the best and most important scholarship on their particular topic An understanding of the present through the lens of the past The field of modern Japan studies has grown steadily as Westerners have recognized the importance of Japan as a leading world economic force and an emerging regional power The post 1945 economic success of the Japanese has however been achieved in the context of that nation's history social structure educational enterprise and political environment It is impossible to understand the postwar economic miracle without an appreciation of these elements Japan's economic emergence has brought about and in some cases exacerbated already existing tensions and these tensions have in turn had a significant impact on Japanese economic life The series is designed to give readers a basic understanding of modern Japan its institutions and its people as we stand on the threshold of a new century often referred to as the Pacific Century Handbook of Asian Education Yong Zhao, Jing Lei, Guofang Li, Ming Fang He, Kaori Okano, Nagwa Megahed, David Gamage, Hema Ramanathan, 2010-11-30 Comprehensive and authoritative this Handbook provides a nuanced description and analysis of educational systems practices and policies in Asian countries and explains and interprets these practices from cultural social historical and economic perspectives Using a culture based framework the volume is organized in five sections each devoted to educational practices in one civilization in Asia Sinic Japanese Islamic Buddhist and Hindu Culture and culture identities essentially are civilization identities the major differences among civilizations are rooted in their different cultures This framework offers a novel approach to capturing the essence of the diverse educational systems and practices in Asia Uniquely combining description and interpretation of educational practices in Asia this Handbook is a must have resource for education researchers and graduate students in international and comparative education globalization and education multicultural education sociocultural foundations of education and Asian studies and for educational
