G. Arnove,Carlos Alberto Torres,Stephen Franz,2012-12-27 Comparative Education The Dialectic of the Global and the Local remains the same groundbreaking book when it first debuted its collection of outstanding scholars in examining the changing transnational landscape of education With the addition of new coeditor Stephen Franz the book provides new perspectives on the dynamic interplay of global national and local forces as they shape the functions and outcomes of education systems The book calls for a rethinking of the nation state as the basic unit for analyzing school society relations and emphasizes the need to study social movements in relation to educational reforms It also emphasizes the value of feminist postcolonial and culturally sensitive perspectives for inquiry into the potential of education systems to contribute to individual development and social change This new edition incorporates recent developments in scholarship especially in education policy and practice the impact of the global economic crisis and a new chapter on education in the European Union      Supplementary Educational Monographs ,1918      Baptist Missionary Magazine ,1830      American Baptist Missionary Magazine and Missionary Intelligencer ,1829 Volumes 7 77 80 83 include 13th 83rd 86th 89th annual report of the American Baptist missionary union      Bulletin ,1918      Statistics of Land-grant Colleges and Universities United States. Office of Education,1978      Education Journal ,1926      **School and Society** ,1923      **Making Sense of Education** Gert Biesta,2012-06-05 This volume gives educational theorists the chance to let rip and say what they really want to say In doing so it sends a blast of fresh air through the dusty halls of academe The vast majority of the literature in education theory and philosophy follows the conventions of academic writing and rightly so Yet its formal abstract and objective style which

focuses on the careful presentation of theoretical and philosophical arguments doesn't always give us insights into what motivates and drives the authors while for academic neophytes it can be dense and arcane Here those same theorists and philosophers have been given the chance to expound at length on the topics that most exercise them What concerns them what gets them up in the morning and what really matters most to them Readers will discover what happens when these thinkers are explicitly invited to go beyond academic conventions and experiment with form style and content Featuring collected essays from leading educationalists from Norway Sweden Denmark the USA Canada Israel Germany Belgium and the UK these essays provide vital insights into their work as well as being a compelling introduction to contemporary attempts to make sense of education through theory and philosophy All these authors have made key contributions to the field and their unique manifestos make a fascinating read for any student or practitioner in education
