School Choice Susan Phillips, 2004 Merits and Limits of Markets Herbert Giersch, 2012-12-06 The 1997 Symposium of the Egon Sohmen Foundation which gave rise to this book took place in the United States on the East Coast between New York and New Haven more precisely in Stamford Conn The original choice had been a place close to Yale University where Egon Sohmen taught economics from 1958 to 1960 subsequent to his period at MIT But the hotel in New Haven was closed down by a new owner to pass through a process of creative destruction Change of ownership on a large scale and as a transition from public to private hands had been the topic of the preceding Egon Sohmen Symposium in Budapest in 1996 published under the heading Privatization at the End of the Century Springer Verlag 1997 Yet mere change of ownership some of us at the Foundation felt in subsequent months was too narrow a focus to properly deal with the movement under consideration a transition of ownership together with a general move towards a competitive market system characterized by global openness uncertainty decentralized risk bearing and the increasing importance of information and innovation

New Directions in Education Policy Implementation Meredith I. Honig, 2006-07-13 A companion to Allan R Odden s *Education Policy Implementation* also published by SUNY Press this book presents original work by a new generation of scholars contributing to education policy implementation research The contributors define education policy implementation as the product of the interaction among particular policies people and places Their analyses of previous generations of implementation research reveal that contemporary findings not only build directly on lessons learned from the past but also seek to deepen past findings These contemporary researchers also break from the past by seeking a more nuanced contingent and rigorous theory based explication of how implementation unfolds They argue that researchers and practitioners can help improve education policy implementation by not asking simply what works but rather focusing their attention on what works for whom where when and why

School Choice Policies and Outcomes Walter Feinberg, Christopher Lubienski, 2008-10-16 Perhaps no school reform has generated as much interest and controversy in recent years as the proposal to have parents select their children s schools Opponents of school choice fear that rolling back the government s role will lead to profit driven financial scandals sectarianism and increased class and racial isolation School choice advocates believe that state provision oversight and regulation stifle entrepreneurial creativity The contributors to this volume not only provide a clear assessment of the logic and evidence supporting the different sides of the debate but also unmask the assumptions about the relationship between markets government and educational achievement Their message is that neither markets nor government alone will guarantee freedom equality achievement or community If choice is to improve education and advance equality then

educational policy cannot be placed on automatic and left to the free market Rather choice policy must be deliberately directed toward meeting these goals and this book shows how that could be accomplished

What Teachers Need to Know Matthew Bruce Etherington, 2017-03-31

Every generation has sought to make teaching and learning more inclusive and equitable but pesky questions always remain such as how can teaching and learning be conducted in ways that satisfies and respects everyone What are the parameters of an inclusive pedagogy Who defines its principles How should these principles be taught and by whom And by what authority shall they be grounded These types of thorny questions occupy the essence of educators and the authors of this book This book is about teachers educators and topics related to inclusion Teachers and educators have a lot to know therefore the topics are broad and relevant to the times What should teachers know about special needs religion and spirituality Aboriginality the environment tolerance and school choice Although teachers have knowledge of their subject matter knowledge alone is not sufficient They must know and understand how people learn A teacher must also care deeply about who they teach And this teacher knowledge grows and changes over time as teachers become more experienced informed skilled and wiser At the same time no teacher preparation will be sufficient because there will always be discussions that were never had and knowledge that was never shared Time has its costs and there is only so much a formal education can prepare someone This book helps to satisfy a cavity in learning for teachers and educators in general **Busting**

Bureaucracy to Reclaim Our Schools Stephen B. Lawton, Joseph Freedman, Heather-jane Robertson, Institute for Research on Public Policy, 1995 In this book the author argues that the bureaucratization of schooling has interfered with the process of education The costs complexity and rigidity of the educational edifice leaves it unresponsive to parental concerns and reluctant to measure its own inadequacies such as illiteracy and high dropout rates among students The author identifies two conceptual bases for action to address this problem public choice theory and agency theory discusses the issue of identity in its relation to education and then makes the case for charter schools in Canada stressing definitions of community parental rights and the need to combat bureaucratic tendencies Two discussants respond to the author's analysis one amplifying his call for charter schools and the other arguing that the basis for demanding reform is less clear than the author claims

pandemic In *Reclaiming Democratic Education* Chris Thomas examines how these activities exist at the intersection of two conflicting traditions The book looks at a history of student and teacher activism that aligns with the democratic purposes of public education This history is now colliding with current policies that privilege the economic aims of education and restrict civic agency By situating contemporary activism within these conflicting traditions Thomas demonstrates how these activities constitute a rejection of the currently dominant policy paradigm in U S education Thomas concludes with a discussion of how activism provides a foundation from which concerned teachers school leaders and policymakers can develop a new model for American education one that reclaims an education for citizenship Book Features Traces the interconnected histories of student and teacher activism from the Revolutionary Period through the Common School Movement and the decade of protests in the 1960s to today Demonstrates how education policy positions teachers as the passive recipients of policy who are often expected to sacrifice their own wellbeing for that of their students Provides a roadmap of policy shifts that would disrupt the currently dominant paradigm in American education and realize an Education for Citizenship paradigm
