A Class by Themselves? Jason Ellis, 2019-03-14 In *A Class by Themselves* Jason Ellis provides an erudite and balanced history of special needs education an early twentieth century educational innovation that continues to polarize school communities across Canada the United States and beyond Ellis situates the evolution of this educational innovation in its proper historical context to explore the rise of intelligence testing the decline of child labour and rise of vocational guidance emerging trends in mental hygiene and child psychology and the implementation of a new progressive curriculum At the core of this study are the students This book is the first to draw deeply on rich archival sources including 1000 pupil records of young people with learning difficulties who attended public schools between 1918 and 1945 Ellis uses these records to retell individual stories that illuminate how disability filtered down through the school system's many nooks and crannies to mark disabled students as different from and often inferior to other school children *A Class by Themselves* sheds new light on these and other issues by bringing special education's curious past to bear on its constantly contested present

Everybody Belongs Arthur Shapiro, 2003-09 The evil prosthesis of Captain Hook the comical speech of Porky Pig and the bumbling antics of Mr Magoo are all examples of images in our culture which can become the basis of negative attitudes and subliminal prejudice towards persons with disabilities These attitudes influence and underlie discriminatory acts resulting in negative treatment and segregation A teacher's ability to recognize and counter such images may well determine the success of inclusion and mainstreaming programs in our schools and society Well researched and well written this book offers practical guidance as grounded in solid research to schools that are

wrestling with how to mainstream children with disabilities **Skills in Collaborative Classroom Consultation** Anne Jordan, 2012-12-06 As the integration of children with special educational needs into ordinary classrooms progresses most special needs professionals spend an increasing amount of time in mainstream schools working with teachers in the classroom on interventions for individual children and with head teachers and senior management teams on whole school policy Skills in Classroom Consultation is a practical guide to the tools and techniques required to work effectively with colleagues in defining goals allocating responsibility and formulating strategies It shows how consultative skills can be used to solve particular educational problems and also how the consultant professional can act in a more far reaching way as an agent of change within an institution *Disabled USA.* ,1987 **Because Teaching Matters** Marleen C. Sarto-Jackson,2022-04-05 The human brain has a truly remarkable capacity It reorganizes itself flexibly adjusting to fluctuating environmental conditions a process called neuroplasticity Neuroplasticity provides the basis for wide ranging learning and memory processes that are particularly profuse during childhood and adolescence At the same time the exceptional malleability of the developing brain leaves it highly vulnerable to negative impact from the surroundings Abusive or neglecting social environments as well as socioeconomic deprivation and poverty cause toxic stress and complex traumas that can severely compromise cognitive development emotional processing self perception and executive brain functions The neurophysiological changes entailed impair emotional regulation lead to heightened anxiety and afflict attachment and the formation of social bonds Neuroplastic changes following severely adverse experiences are not something that a person grows out of and gets over These experiences alter the neurobiological and biochemical makeup and cause people to live in an emotionally relabeled world in which the evaluation of any social cue their behavior cognition and state of mind are biased towards the negative Even more worrying detrimental neurophysiological consequences are not limited to the traumatized individual but are often transmitted to subsequent generations through a process of social niche construction thereby creating a vicious cycle Thus the making and breaking forces of the brain are epitomized by parents alloparents peers and our socioeconomic niche This book expounds on the formative role that the social environment plays in healthy brain development especially during infancy childhood and adolescence Based on scientific findings the book advocates for bold measures and responsible stewardship to combat child abuse maltreatment and child poverty By bringing together insights from neuroscience evolutionary biology and social education work it lays out a fact based transdisciplinary endeavor that aims at rising to the societal challenge of providing a rewarding perspective to youth at risk It will be a valuable resource for academics from social education pedagogy cognitive science neuroscience as well as professionals in the fields of social work pedagogy education child welfare

From "Backwardness" to "At-Risk" Barry M. Franklin, 1994-01-01 This book examines the joint effort of twentieth century public school administrators and private philanthropy to initiate reforms to provide for children with learning difficulties The author explores the development of these reforms from the establishment of special classes for backward children at the beginning of the century to the creation of programs for learning disabled children He considers what this history tells us about current efforts to provide for at risk students He looks at both the way school administrators conceptualized childhood learning difficulties and the institutional arrangements which they introduced to accommodate these students and pays particular attention to the preference of school administrators throughout this century for accommodating low achieving children in segregated classes and programs *Handbook of Psychotherapies with Children and Families* Sandra W.
