**Faith-Based Education That Constructs** HeeKap Lee,2010-08-09 Constructivism is everywhere It is a hot issue at this time in the field of philosophy education technology and religion However can constructivism be an alternative approach in faith based education While some conclude that Jesus knew learning was an active knowledge creating process and that he always encouraged his disciples to think deeply and go beyond the surface level others would find that constructivism undercuts faith based education because of its claims to relativity For example constructivists claim that meaning is imposed on the world by us rather than existing in the world independently from us Thus they proclaim that truth is relative to particular times places and people Christians hold that truth does exist absolutely So how can there be a way forward for faith based educators who see the good in the constructivist approach In Faith Based Education that Constructs readers will find a unique approach whereby constructivism may appropriately be applied to a faith based education setting Although disagreement can occur between constructivism and faith based education this book concludes that constructivist thought and Christian faith based education are in the end congruent and harmonious in significant ways Those faith based educators who continue to hold cautionary views of radical constructivist assertions against absolute truths need not disregard all other aspects of constructivism

Liem, Dennis

M. McInerney, 2023-07-01 The youth of today is confronted with a myriad of challenges of living in a world that has never been more volatile uncertain complex and ambiguous These multifaceted challenges compromise their well being Fostering the well being of young people across sociocultural boundaries rather than of the select groups of privileged individuals is a timely and worthy endeavor and should not take a back seat The advent of Positive Education which is an educational paradigm that emphasizes the goal of developing both cognitive abilities and well being skills in students and young people in general has offered a promising generic approach to promoting the well being of young people The twin goals of Positive Education are indeed aligned with two major views of well being eudaimonia highlighting the importance of one's engaged pursuit of meaningful goals and hedonia stressing the importance of one's positive emotion and life satisfaction in one's well being Their combination that wellness is achieved when a person is feeling good and functioning well has often been termed flourishing Unfortunately scholarly discussions on sociocultural influences on flourishing or well being and ways of promoting it have been scarce This volume addresses such a gap in a rigorous and timely manner International scholars from culturally diverse backgrounds put together their thoughts and ideas in their respective chapter contributions that collectively invite us to mindfully take into account youth's sociocultural and sociodemographic backgrounds in promoting their flourishing This book which embodies the who what when where and how of youth well being will be extremely insightful and useful for scholars and researchers as well as policy makers and practitioners teachers interventionists counsellors youth mentors who seek to promote the well being of young people in their respective contexts and beyond
