Educational Wastelands Arthur Eugen Bestor,1970 **The Emergence of Holocaust Education in American**

Schools T. Fallace,2008-03-31 Interest by American educators in the Holocaust has increased exponentially during the second half of the twentieth century In 1960 the Holocaust was barely being addressed in American public schools Yet by the 1990s several states had mandated the teaching of the event Drawing upon a variety of sources including unpublished works and interviews this study traces the rise of genocide education in America The author demonstrates how the genesis of this movement can be attributed to a grassroots effort initiated by several teachers who introduced the topic as a way to help their students navigate the moral and ethical ambiguity of the times *Democracy's Angels* Kristina R.

Llewellyn,2012-09-01 Following the Second World War women teachers filled a labour shortage in schools and Canadian newspapers rushed to feature their presence One caption even called the teachers pretty enough to send dad to school with junior Envisioned as shining examples of proper femininity female educators were expected to produce a new generation of housewives for a strong democratic nation *Democracy's Angels* is a daring exploration of the limitations of that vision which ultimately confined women to teaching a model of citizenship that privileged masculinity and reduced women's authority In an analytical tour de force Kristina Llewellyn unravels the ideological underpinnings of democracy as the objective for postwar education Schools were charged with producing rational autonomous politically engaged citizens but women were not associated with these qualities Claims to scholarly knowledge professional autonomy and administrative positions were reserved for male teachers Using rigorous interdisciplinary scholarship and extensive interviews with former teachers Llewellyn reveals the ways in which women negotiated and even found opportunities within these troubling limitations An unflinching look at the difficult realities of women's work experiences in postwar Canada *Democracy's Angels* illustrates the intrinsic connections between gender education and democracy *Social Studies Today* Walter C. Parker,2015-04-10 *Social Studies Today* will help educators teachers curriculum specialists and researchers think deeply about contemporary social studies education More than simply learning about key topics this collection invites readers to think through some of the most relevant dynamic and challenging questions animating social studies education today With 12 new chapters highlighting recent developments in the field the second edition features the work of major scholars such as James Banks Diana Hess Joel Westheimer Meira Levinson Sam Wineburg Beth Rubin Keith Barton Margaret Crocco and more Each chapter tackles a specific question on issues such as the difficulties of teaching historical thinking in the classroom responding to high stakes testing teaching patriotism judging the credibility of Internet sources and teaching with film and geospatial technologies Accessible compelling and practical these chapters full of rich examples and illustrations showcase some of the most original thinking in the field and offer pre and in service teachers alike a panoramic window on social

studies curricula and instruction and new ways to improve them Walter C Parker is Professor and Chair of Social Studies Education and by courtesy Professor of Political Science at the University of Washington Seattle Changing the Course of Failure Sandra Stotsky, 2018-05-18 The basic purpose of this book is to help policy makers at all levels of government understand that 1 widespread adolescent underachievement is not susceptible to solution by educational interventions no matter how much money is allocated to public education and 2 there are unidentified educational and civic costs to focusing on low achievement and to expecting public institutions of education for K 12 and college to solve a growing social problem Many policy makers seem to think that teachers schools are the primary cause of low achievement Educational institutions still cannot solve a non education caused problem and haven t done so for over fifty years despite all the public and private money that has been allocated The book concludes with suggested policies for addressing the damage to public education from gap closing standards and with suggested areas for policy making in order to change the current course of failure for many low achieving students Shaping the Future Horst Hutter, 2006-01-01 Shaping the Future maps out the ascetic practices of a Neitzschean way of life Hutter argues that Nietzsche s doctrines are attempts and temptations that aim to provoke his free spirited readers into changing themselves by putting philosophy into practice in their lives **The U.S. Technology Skills Gap** Gary J. Beach, 2013-07-10 Is a widening skills gap in science and math education threatening America s future That is the seminal question addressed in The U S Technology Skills Gap a comprehensive 104 year review of math and science education in America Some claim this skills gap is equivalent to a permanent national recession while others cite how the gap threatens America s future economic workforce employability and national security This much is sure America s math and science skills gap is or should be an issue of concern for every business and information technology executive in the United States and The U S Technology Skills Gap is the how to get involved guidebook for those executives laying out in a compelling chronologic format The history of the science and math skills gap in America Explanation of why decades of astute warnings were ignored Inspiring examples of private company efforts to supplement public education A pragmatic 10 step action plan designed to solve the problem And a tantalizing theory of an obscure Japanese physicist that suggests America s days as the global scientific leader are numbered Engaging and indispensable The U S Technology Skills Gap is essential reading for those eager to see America remain a relevant global power in innovation and invention in the years ahead **The Rebirth of the West** Peter Duignan, Lewis H. Gann, 1996 The years following World War II witnessed perhaps the greatest success story in Western history the economic and political recovery of European democracies that had been devastated by the cataclysmic war Peter Duignan and L H Gann convincingly demonstrate that the deep involvement of the United States was a key factor in this success The Rebirth of the West is a broad narrative analysis of every important aspect of Western society during this formative period political economic social cultural and scientific In addition to providing an interpretive synthesis of the vast literature on the subject the authors make an important and original

contribution to both the historical record of this period and current debates over the future of Europe **The Trouble with Ed Schools** David F. Labaree, 2006-09-01 Contiene Acknowledgments Chapter 1 Introduction The Lowly Status of the Ed School 1 Chapter 2 Teacher Ed in the Past The Roots of Its Lowly Status Chapter 3 Teacher Ed in the Present The Peculiar Problems of Preparing Teachers Chapter 4 The Peculiar Problems of Doing Educational Research Chapter 5 The Peculiar Problems of Preparing Educational Researchers Chapter 6 Status Dilemmas of Education Professors Chapter 7 The Ed School's Romance with Progressivism Chapter 8 The Trouble with Ed Schools Little Harm Little Help Notes References Index

Wisconsin Elementary Teacher Education Project University of Wisconsin. School of Education, 1969 The SAGE Handbook for Research in Education Clifton F. Conrad, Ronald C. Serlin, 2011-06-10 This handbook provides an up to date advanced analysis of all relevant issues involved in educational research The expert contributors represent diverse fields within and outside education as well as quantitative qualitative and mixed method approaches to research *Teacher Education, the University and the Schools* David Phillips, 2013-09-13 Using the highly successful Oxford model of teacher training and the widely respected work in teacher education of Harry Judge a number of prominent educationists from around the world contribute chapters on a range of topics relating to the interface between the university and the schools in the complex processes involved in the initial training of teachers The book covers discussion of aspects of teacher education in the UK the United States and France as well as in the developing country context of Pakistan Policy issues are described by William Taylor Tim Brighouse and Stuart Maclure And Jerome Bruner and David Cohen write about the processes involved in learning and thinking about what teachers need to know in their training This book was published as a special issue of the Oxford Review of Education *The World We Created at Hamilton High* Gerald Grant, 1988 In this wonderfully evocative picture of an urban American high school and its successes and setbacks over the past thirty five years Gerald Grant works out a unique perspective on what makes a good school one that asserts moral and intellectual authority without becoming rigidly doctrinaire or losing the precious gains in equality of opportunity that have been won at great cost Grant describes what happened inside Hamilton High a real school although its identity is disguised and how different worlds evolved as the school's authority system was transformed After the opening of Hamilton High in the buoyant and self confident 1950s the school plunged into a period of violence and radical deconstruction in the late sixties Grant charts the rise of student power in the seventies followed by new transformations of the school in the last decade occasioned in part by the mainstreaming of disabled students and the arrival of Asian immigrants Things got very bad before they got better but they did get better The school went from white power to black power to genuine racial equality Its average test scores declined and then improved Although test score means did not return to their former levels the gap in achievement between the social classes decreased Violence was replaced by a sense of relative safety and security Yet this book is not just a case study In the second half the author presents a general analysis of American education He contrasts the world of Hamilton High with other possible

worlds including those at three schools one public and two private that exhibit a strong positive ethos He looks at the way the moral and intellectual worlds have been sundered in many contemporary public schools and asks whether they can be put back together again The book is grounded in a creative methodology that includes research by students at Hamilton High whom Grant trained to analyze life in their school Later he shared this research with teachers as a means of opening a dialogue about what changes they wanted to make Grant s analysis leads to recommendations for two essential reforms and in an epilogue the teachers who read this book also tell us what they make of it and offer their own conclusions Their challenging final words will spur the thinking of educators policymakers scholars parents and all those who are concerned about our schools today
