European Migrants Global Local Perspec:

The Social Construction of Diversity Christiane Harzig, Danielle Juteau, 2006-10-01 Though the composition of the populace of industrial nations has changed dramatically since the 1950s public discourse and scholarship however often remain welded to traditional concepts of national cultures ignoring the multicultural realities of most of today's western societies Through detailed studies this volume shows how the diversity affects the personal lives of individuals how it shapes and changes private national and international relations and to what extent institutions and legal systems are confronted with changing demands from a more culturally diverse clientele Far from being an external factor of society this volume shows diversity has become an integral part of people's lives affecting their personal institutional and economic interaction

Global Diasporas Robin Cohen, 2002-09-11 First published in 1997 Routledge is an imprint of Taylor Francis an informal company
Personal narratives of Irish and Scottish migration, 1921-65 Angela McCarthy, 2017-10-03 Between 1921 and 1965 Irish and Scottish migrants continued to seek new homes abroad Using the personal accounts of these migrants from letters interviews questionnaires and shipboard journals together with more traditional documentary sources such as immigration files and maritime records this book examines the experience of migration and settlement in North America and Australasia Through a close reading of personal testimonies the author highlights the assorted similarities and differences between the Irish and Scots Subtle differences rather than yawning cultural gaps are apparent similarities in attitude and expectation are more common than divergent or unique experiences The key revelation of the work is that despite a number of peculiarities characterising their individual and collective experiences of migration both the Irish and Scots were relatively successful migrants in the period under consideration Using interviews both spoken and written and tackling issues of why and how versions of the past are represented and what they mean this fascinating study considers individual and collective memory and the use of personal testimonies as historical evidence their uniqueness and typicality Furthermore in using personal narratives the book portrays individual migration experiences which are often hidden in studies based on statistical analysis
Global Perspectives on Global History Dominic Sachsenmaier, 2011-08-04 In recent years historians across the world have become increasingly interested in transnational and global approaches to the past However the debates surrounding this new border crossing movement have remained limited in scope as theoretical exchanges on the tasks responsibilities and potentials of global history have been largely confined to national or regional academic communities In this groundbreaking book Dominic Sachsenmaier sets out to redress this imbalance by offering a series of new perspectives on the global and local flows sociologies of knowledge and hierarchies that are an intrinsic part of historical practice Taking the United States Germany and China as his main case studies he reflects upon the character of different approaches to global history as well as their social political and cultural contexts He argues that this new global trend in historiography needs to be supported by a corresponding increase in transnational dialogue cooperation and exchange **Mobility,**

Migration and Transport Colin G. Pooley, 2017-05-19 This book provides an innovative perspective on migration mobility and transport Using concepts drawn from migration history mobilities studies and transport history it makes the case for greater integration of these disciplines The approach is historical demonstrating how past processes of travel and population movement have evolved examining the continuities and changes that have occurred and arguing that many of the concepts used in mobilities studies today are equally relevant to the past The three central chapters view past population movements through respectively the lenses of migration history mobilities studies and transport Two further chapters demonstrate the diversity of mobility experiences and the opportunities and difficulties of applying this approach in teaching and research Extensive case study material from around the world is used including personal diaries which vividly recreate the everyday experiences of past mobilities Population movement has never been of more importance globally this book demonstrates how knowledge of past mobility experiences can inform our understanding of the present Chains of Gold Marcelo J. Borges, 2009 Why did migrants from southern Portugal choose Argentina instead of following the traditional path to Brazil Starting with this question this book explores how at the turn of the twentieth century rural Europeans developed distinctive circuits of transatlantic labor migration linked to diverse immigrant communities in the Americas It looks at transoceanic moves in the larger context of migration systems examining their connections and the crucial role of social networks in migrants geographic mobility and adaptation Combining regional and local perspectives on both sides of the Atlantic Chains of Gold provides a vivid account of the trajectories of migrant men and women as they moved from rural Portugal to contrasting places of settlement in the Argentine pampas and Patagonia **International Perspectives** John Biles, 2012-05-17 The international trend towards migration is growing rapidly and becoming increasingly complex As the first wave generation of migrants ages their children and even grandchildren are reaching adulthood having spent their entire lives in the countries their families chose long ago **International Perspectives** Integration and Inclusion is a wide ranging exploration of this new global reality While many countries have been and remain resistant to migration the sheer volume of people moving from one country to another is forcing public policy and perceptions to change Migrant inclusion and integration however remains an issue in many locales Insightful and timely this volume brings together contributions from various countries and levels of the migrant experience in order to consider the ways in which states can facilitate the integration and inclusion of newcomers and minorities *The Transformation of the World* Jürgen Osterhammel, 2015-09-15 A panoramic global history of the nineteenth century A monumental history of the nineteenth century *The Transformation of the World* offers a panoramic and multifaceted portrait of a world in transition Jürgen Osterhammel an eminent scholar who has been called the Braudel of the nineteenth century moves beyond conventional Eurocentric and chronological accounts of the era presenting instead a truly global history of breathtaking scope and towering erudition He examines the powerful and complex forces that drove global change during the long nineteenth century taking readers from New York to New Delhi

from the Latin American revolutions to the Taiping Rebellion from the perils and promise of Europe's transatlantic labor markets to the hardships endured by nomadic tribal peoples across the planet Osterhammel describes a world increasingly networked by the telegraph the steamship and the railways He explores the changing relationship between human beings and nature looks at the importance of cities explains the role slavery and its abolition played in the emergence of new nations challenges the widely held belief that the nineteenth century witnessed the triumph of the nation state and much more This is the highly anticipated English edition of the spectacularly successful and critically acclaimed German book which is also being translated into Chinese Polish Russian and French Indispensable for any historian *The Transformation of the World* sheds important new light on this momentous epoch showing how the nineteenth century paved the way for the global catastrophes of the twentieth century yet how it also gave rise to pacifism liberalism the trade union and a host of other crucial developments [The Historical Practice of Diversity](#) Dirk Hoerder, Christiane Harzig, Adrian Shubert, 2003-09-01

While multicultural composition of nations has become a catchword in public debates few educators not to speak of the general public realize that cultural interaction was the rule throughout history Starting with the Islam Christian Jewish Mediterranean world of the early modern period this volume moves to the empires of the 18th and 19th centuries and the African Diaspora of the Black Atlantic It ends with questioning assumptions about citizenship and underlying homogeneous received cultures through the analysis of the changes in various literatures This volume clearly shows that the life worlds of settled as well as migrant populations in the past were characterized by cultural change and exchange whether conflictual or peaceful Societies reflected on such change in their literatures as well as in their concepts of citizenship **The Routledge**

History Handbook of Gender and the Urban Experience Deborah Simonton, 2017-02-03 Challenging current perspectives of urbanisation *The Routledge History Handbook of Gender and the Urban Experience* explores how our towns and cities have shaped and been shaped by cultural spatial and gendered influences This volume discusses gender in an urban context in European North American and colonial towns from the fourteenth to the twentieth century casting new light on the development of medieval and modern settlements across the globe Organised into six thematic parts covering economy space civic identity material culture emotions and the colonial world this book comprises 36 chapters by key scholars in the field It covers a wide range of topics from women and citizenship in medieval York to gender and tradition in nineteenth and twentieth century South African cities reframing our understanding of the role of gender in constructing the spaces and places that form our urban environment Interdisciplinary and transnational in scope this volume analyses the individual dynamics of each case study while also examining the complex relationships and exchanges between urban cultures It is a valuable resource for all researchers and students interested in gender urban history and their intersection and interaction throughout the past five centuries [A Global Perspective on the European Economic Crisis](#) Bruno

Dallago, Gert Guri, John McGowan, 2018-10-24 The financial and economic crisis in Europe is not over and the radically

opposing strategies on how to proceed has only increased the complexity of problems in the region revealing the shortcomings of the EU's architecture. The European Union perhaps for the first time in its history of more than seventy years is being perceived as a threat to the financial and monetary stability of the world. A Global Perspective on the European Economic Crisis explores the connection between internal EU actions and institutions and the external factors that influence the ongoing response to the European crisis. With a unique collection of international and interdisciplinary essays, this book considers the complex macroeconomic and challenging political landscape of Europe, looking at how and why the European Union is untenable in its current state. The chapters outline what should be done to make the common currency area more resilient and explain why external events are particularly problematic for the EU, ultimately offering suggestions for what Europeans should do in order to avoid harmful internal consequences. This volume confronts the causes of the crisis, its persistence, its economic and political consequences, and the impact of more recent events and policy decisions. It will be of interest to researchers and policy makers keen to understand the EU relations and the influence of international organizations in the European economic crisis.

A History of Migration from Germany to Canada, 1850-1939

Jonathan Wagner, 2011-11-01. Human migration figures prominently in modern world history and has played a pivotal role in shaping the Canadian national state. Yet while much has been written about Canada's multicultural heritage, little attention has been paid to German migrants, although they compose Canada's third largest European ethnic minority. A History of Migration from Germany to Canada 1850-1939 addresses that gap in the record. Jonathan Wagner considers why Germans left their home country, why they chose to settle in Canada, who assisted their passage, and how they crossed the ocean to their new home, as well as how the Canadian government perceived and solicited them as immigrants. He examines the German context as closely as developments in Canada, offering a new, more complete approach to German-Canadian immigration. This book will appeal to students of German-Canada, as well as to those interested in Canadian ethnic history and European and modern international migration.

Irregular Migration and Human Rights: Theoretical, European and International Perspectives

Barbara Bogusz, Ryszard Cholewinski, Adam Cygan, Erika Szyszczak, 2004-09-01. Desperate and vulnerable people who take enormous risks to migrate to Europe in rickety boats or concealed in the containers of articulated lorries are familiar images portrayed in the media of irregular migrants. Irregular migration has become a major political concern both at the European level and in the wider international context. In the European Union, politicians have identified irregular migration as a problem and have given priority to preventing this phenomenon in the development of the common asylum and immigration policy. This collection of essays is the outcome of an international conference on Irregular Migration and Human Rights, which gathered together prominent scholars, policy makers, and practitioners working in the migration and human rights field. The objective of the book, in contrast to the prevailing political approach which focuses almost solely on prevention, is to discuss the human rights dimensions of irregular migration from theoretical, European, and international

perspectives The book is divided into five substantive parts the complex question of who is an irregular migrant and the difficulties in assessing the size of irregular movements official and popular perceptions of irregular migrants a debate which is frequently considered in terms of security concerns asylum and human trafficking and smuggling the myriad strands of the developing EU law and policy on irregular migration such as the adoption of readmission agreements and the relationship of this law and policy to external border controls in the context of EU enlargement and other non legal means of EU decision making the contributions of international and non governmental actors to charting a rights based approach to irregular migration and the problems these vulnerable persons face while resident in host countries such as discrimination and denial of access to social rights and public services which is inextricably bound up with their irregular status Transitional Justice and Forced Migration: Critical Perspectives from the Global South Nergis Canefe, 2019-11-07 Establishes links between lack of societal peace structural causes of human suffering recurrent patterns of political violence and forced migration in the Global South Global Perspectives on the Difficulties and Opportunities Faced by Migrant and Refugee Students in Higher Education Saeed, Sameerah Tawfeeq, Zhang, Min, 2023-06-12 Higher education has been a source of opportunity and achievement for migrants and refugees around the world It has provided them with the tools and knowledge to pursue careers and build lives in their new communities but it has also made them targets for discrimination Colleges and universities are often ill equipped to address the unique educational needs of their diverse student populations and many times the very institution that was meant to be a safe haven for them becomes their greatest barrier to success Today we are witnessing a crisis of higher education for migrants and refugees Global Perspectives on the Difficulties and Opportunities Faced by Migrant and Refugee Students in Higher Education focuses on the formal and informal educational opportunities that are available to migrant students as well as the barriers that prevent them from fully accessing these opportunities The book also discusses how the experiences of migrant and refugee students in higher education have evolved and the impact that this evolution has had on their educational experiences Finally the book considers the ways in which higher education institutions have responded to the educational needs of migrant and refugee students and the role that the education industry has played in this response both formally and informally Covering key topics such as immigration educational needs and displaced students this premier reference source is ideal for administrators policymakers scholars researchers academicians practitioners instructors and students *Conceiving Migration and Communication in a Global Perspective* Armando Aliu, Dorian Aliu, 2019-11-04 Migration and communication are issues of major concern in today s world This volume examines diversified approaches to migration and communication and explores policy dialogues migration governance transnationalism cross border circular migration and many other viewpoints of importance today It sheds lights on recent debates in Europe associated with cross national perspectives socio economic challenges welfare rights and social cohesion multi scalar applications and policy driven migration The text synthesises various complex arguments and recent debates in
