that has never been used in a study of this kind This is timely as the area has a growing international market and addresses some recently ignored themes in the Social Sciences in particular religion Whilst concerned with global issues this text also focuses on one country which economists and sociologists as well as those in other Social Sciences areas will find of great interest

International Migration and Ethnic Relations Magnus Dahlstedt, Anders Neergaard, 2015-05-22 Each day in so many aspects of daily life we are reminded of the significance of migration and ethnicity This book is a critical contribution to the understanding of the phenomena of migration and ethnicity from a Swedish vantage point looking outwards towards a European context It presents current academic debates and gives a theoretical overview of nine key concepts in the field of ethnic and migrations studies but it also exemplifies how these concepts could be used in analysing specific empirical cases It explores the following concepts ethnicity migration diaspora citizenship intersectionality racism right wing populism social exclusion and informalisation The book is interdisciplinary embracing areas such as labour studies economic history ethnicity business administration gender studies literature studies economics educational science social anthropology social work sociology and political science

Migration Theory Caroline B. Brettell, James F. Hollifield, 2014-08-25 During the last decade the issue of migration has increased in global prominence and has caused controversy among host countries around the world To remedy the tendency of scholars to speak only to and from their own disciplinary perspective this book brings together in a single volume essays dealing with central concepts and key theoretical issues in the study of international migration across the social sciences Editors Caroline B Brettell and James F Hollifield have guided a thorough revision of this seminal text with valuable insights from such fields as anthropology demography economics geography history law political science and sociology Each essay focuses on key concepts questions and theoretical frameworks on the topic of international migration in a particular discipline but the volume as a whole teaches readers about similarities and differences across the boundaries between one academic field and the next How for example do political scientists wrestle with the question of

citizenship as compared with sociologists and how different is this from the questions that anthropologists explore when they deal with ethnicity and identity Are economic theories about ethnic enclaves similar to those of sociologists What theories do historians the essentializers and demographers the modelers draw upon in their attempts to explain empirical phenomena in the study of immigration What are the units of analysis in each of the disciplines and do these shape different questions and diverse models and theories Scholars and students in migration studies will find this book a powerful theoretical guide and a text that brings them up to speed quickly on the important issues and the debates All of the social science disciplines will find that this book offers a one stop synthesis of contemporary thought on migration The Transformation of Citizenship, Volume 2 Jürgen Mackert, Bryan S. Turner, 2017-03-16 This volume Boundaries of Inclusion and Exclusion examines the many different and newly emerging ways in which citizenship refers to spatial symbolic and social boundaries Today in the context of citizenship we face processes of inclusion and exclusion on national and supranational level but no less on the level of groups and individuals The book addresses these different levels and discusses processes of inclusion and exclusion with regard to spatial social and symbolic boundaries referring to such different problems as political participation migration or identity with regard to religion or the EU This book will appeal to academics working in the field of political theory political sociology and European studies The SAGE Handbook of Nations and Nationalism Gerard Delanty, Krishan Kumar, 2006-06-14 With its list of distinguished contributors and its wide range of topics the handbook is surely destined to become an invaluable resource for all serious students of nationalism Michael Billig Professor of Social Sciences at Loughborough University and author of Banal Nationalism SAGE 1995 The persistence some would say revival of nationalism across the recent history of modernity in particular the past two decades has taken many scholars in the social sciences by surprise In response interest in the analysis of nationalism has increased and given rise to a great variety of new angles under which to study the phenomenon What was missing in the cacophony of voices addressing nationalism was a volume that brought them together and confronted them with each other This handbook does just that It deserves particular praise for the wide range of approaches and topic included and for the systematic attempt at studying nationalism as a phenomenon of our time not a remnant from the past Peter Wagner Professor of Social and Political Theory European University Institute and Professor of Sociology University of Warwick For students concerned with the contemporary study of nationalism this will be an invaluable publication The three fold division into approaches themes and cases is a very solid and sensible one The editors have commissioned essays from leading scholars in the field and this handbook provides the best single volume overview of contemporary nationalism John Breuilly Professor of Nationalism and Ethnicity London School of Economics Nationalism has long excited debate in political social and cultural theory and remains a key field of enquiry among historians anthropologists sociologists as well as political scientists It is also one of the critical media issues of our time There are however surprisingly few volumes that bring together the best of this intellectual diversity into one collection This

Handbook gives readers a critical survey of the latest theories and debates and provides a glimpse of the issues that will shape their future. Its three sections guide the reader through the theoretical approaches to this field of study, its major themes from modernity to memory, migration and genocide, and the diversity of nationalisms found around the globe. The overall aim of this Handbook is to relate theories and debates within and across a range of disciplines, illuminate themes and issues of central importance in both historical and contemporary contexts, and show how nationalism has impacted upon and interacted with other political and social forms and forces. This book provides a much needed resource for scholars in international relations, political science, social theory and sociology.

Migrant Integration Between Homeland and Host Society Volume 1 Agnieszka Weinar, Anne Unterreiner, Philippe Fargues, 2017-05-23. This book provides a theoretical framing to analyse and examine the interaction between origin and destination in the migrant integration process. Coverage offers a set of concrete conceptual tools which can be operationalised when measuring integration. This title is the first of two complementary volumes, each of which is designed to stand alone and provide a different approach to the topic. Here the chapters offer a detailed look at integration across eight key areas: labour, education, language and culture, civic and political participation, housing, social ties, religion, and access to citizenship. Readers are presented with an examination into the globally available knowledge on interactions between emigration, diaspora, policies on one hand, and integration policies on the other. Migrants actively belong to two places: the land they left behind and the home they are seeking to build. This book gives an insightful argument for the need to include information about countries and communities of origin when examining integration, which is often overlooked. It will appeal to academics, policymakers, integration practitioners, civil society organisations, as well as students. Overall, the chapters establish a cohesive analytical framework to this important topic.

Migrant Integration between Homeland and Host Society Volume 2 How countries of origin impact migrant integration outcomes: an analysis edited by A Di Bartolomeo, S Kalantaryan, J Salamonska and P Fargues. This book builds upon this foundation and presents an empirical approach to migrant integration.

Rethinking Migration and Return in Southeastern Europe Eda Gemi, Anna Triandafyllidou, 2021-05-27. This book provides an important new analytical framework for making sense of return, remigration, and circular mobility, conceptualising them as different phases of a wider migration process. Using an in-depth case study of Albania and its two main destination countries, Italy and Greece, the book demonstrates that instead of being viewed as a linear path between origin and destination, migration should be seen as a segmented or cyclical pattern that may involve several localities and more than two countries. Characterised by important previous historical, social, economic, and political linkages, geographical proximity, but also high migration volatility and sustained flows in either directions, Albanian migration to Italy and Greece offers an optimal case study for analysing complex return, reintegration, and mobility processes. While interesting as a unique regional migration system, the lessons learned cast light on important migration and mobility dynamics that are relevant for labour migration in Europe, also from other

important migrant origin countries in the EU's neighbourhood such as for instance Morocco or the Ukraine. This rich theoretical and empirical study will be of interest to researchers within European Studies and Migration Studies as well as providing a useful contribution to policy debates on how to govern return migration, reintegration and circular migration. Paradigms of Social Change Waltraud Schelkle, 2000
The British National Bibliography Arthur James Wells, 2009
Diasporas and Ethnic Migrants Rainer Munz, Rainer Ohliger, 2004-08-02
This work adopts a comparative approach to explore interrelations between two phenomena which so far have rarely been examined and analysed together, namely the dynamics of diaspora and minority formation in Central and Eastern Europe on the one hand and the diaspora migration on the other.
Diaspora and Citizenship Claire Sutherland, Elena Barabantseva, 2013-09-13
This collection of papers discusses the impact of diasporas on the articulations and practices of legal, political, cultural and social citizenship in their country of origin. While the majority of current citizenship debates focus on the challenges and directions in which diasporic and migrant communities impact on the citizenship regime in their country of settlement, the papers in this volume approach the study of citizenship from the perspective of the link between the sending state and its diasporic communities abroad. The papers discuss the role of language, religion, kinship and other ethnic markers in diaspora politics and trace their implications for the articulations and practices of citizenship. Through discussing cases across political and geographical spectrums and from different historical epochs, the book broadens and enriches the debate on citizenship by demonstrating important ways in which diasporas impact on the delineation of citizenship regimes and the politics of national identity in their homeland. This links to the continued use of language as an ethnic marker but also one which may be learned, allowing a certain degree of choice and shifting affiliations amongst putative members of a diaspora. This book was published as a special issue of *Nationalism and Ethnic Politics*.
Ideational Legacies and the Politics of Migration in European Minority Regions Christina Isabel Zuber, 2022-05-02
In this book, Christina Zuber outlines a theory of ideational policy stabilization to explain stable policy choices despite changing incentives. Historical legacies are frequently invoked in popular and academic accounts of the politics of migration, but the mechanisms of transmission are left underspecified. This work contributes to research on migration and to theories of public policy by arguing that the missing link between past events and present choices is ideational: initially, a historical constellation of interests leads actors to defend policy ideas that match the historical environment, but over time, ideas can detach themselves from interests and stabilize into societal dispositions, shared values and identities. This occurs if elites build a discursive consensus around a policy idea and if bureaucrats develop concomitant policy practices. The book's empirical section analyses ideational stabilization in Catalonia, Spain, which takes an inclusive approach to immigration, and in South Tyrol, Italy, where immigration is framed as a threat. The comparison shows that these

differences can be explained by the political economy of historical industrialization and internal migration Catalans were in the driving seat of industrialization receiving unskilled migrant workers from the rest of Spain to boost their own economy South Tyroleans on the other hand were in the passenger seat perceiving incoming Italians as colonizers Over time socioeconomic conditions changed and internal migration was replaced with international migration Yet with historical ideas having stabilized into dispositions political and administrative elites continued to understand immigration through the now obsolete perspective of economic opportunity in Catalonia and ethnic competition in South Tyrol Transformations in Governance is a major academic book series from Oxford University Press It is designed to accommodate the impressive growth of research in comparative politics international relations public policy federalism and environmental and urban studies concerned with the dispersion of authority from central states to supranational institutions subnational governments and public private networks It brings together work that advances our understanding of the organization causes and consequences of multilevel and complex governance The series is selective containing annually a small number of books of exceptionally high quality by leading and emerging scholars The series is edited by Liesbet Hooghe and Gary Marks of the University of North Carolina Chapel Hill and Walter Mattli of the University of Oxford *East European Diasporas, Migration, and Cosmopolitanism* Ulrike Ziemer, Sean P. Roberts, 2013 Following the collapse of the communist regimes in Eastern Europe and the Soviet Union there were considerable migration flows the migrations and subsequent diasporas often having special characteristics given the relative lack of migration in communist times and the climate of increasing nationalism which had the potential of working against multiculturalism This book explores these migrations and diasporas and examines the nature of the associated cosmopolitanism

Generational Tensions and Solidarity Within Advanced Welfare States Asgeir Falch-Eriksen, Marianne Takle, Britt Slagsvold, 2021-09-12 This book explores generation as both a reference to family or kinship structures and a reference to cohorts or age sets The principal objective is branching out this two part concept through studies of tensions and solidarity within and between generations of advanced and robust welfare states Answering key questions using multiple disciplinary approaches the book considers how generations challenge advanced and robust welfare states how new and young generations are affected by living in an advanced welfare state with older generations how tensions or solidarity are understood when facing challenges and what the key characteristics are of certain generation types It contributes to the development of a more comprehensive generation approach within social sciences by developing the concept of generation by exploring different challenges to the welfare state such as migration digitalization environmental damages demands for sustainability and marginalization Highlighting the escalating tensions and altered versions of solidarity between generations this book shows how a comprehensive concept of a generation can create new insights into how we collectively coordinate and resolve challenges through the welfare state It will be of interest to all scholars and students of social policy sociology political science and social anthropology

Transnational Migration Thomas Faist, Margit Fauser, Eveline Reisenauer, 2013-04-03 Increasing interconnections between nation states across borders have rendered the transnational a key tool for understanding our world It has made particularly strong contributions to immigration studies and holds great promise for deepening insights into international migration This is the first book to provide an accessible yet rigorous overview of transnational migration as experienced by family and kinship groups networks of entrepreneurs diasporas and immigrant associations As well as defining the core concept it explores the implications of transnational migration for immigrant integration and its relationship to assimilation By examining its political economic social and cultural dimensions the authors capture the distinctive features of the new immigrant communities that have reshaped the ethno cultural mix of receiving nations including the US and Western Europe Importantly the book also examines the effects of transnationality on sending communities viewing migrants as agents of political and economic development This systematic and critical overview of transnational migration perfectly balances theoretical discussion with relevant examples and cases making it an ideal book for upper level students covering immigration and transnational relations on sociology political science and globalization courses
