The view of the authors is unequivocal European integration will only succeed when the Central European countries from Poland to North Macedonia from the Czech Republic to Romania and Moldova will be seen as being at the heart of Europe The European Union needs to build more common and fair ground between old and new member states According to the authors any further move towards a Europe of two speeds would lead to a break up of the EU

**Divisive integration. The triumph of failed ideas in Europe — revisited** Steffen Lehndorff, 2014-04-01 This book is a follow up to the ETUI 2012 volume The triumph of failed ideas The focus of the book is the weight attributed to the different economic and social development paths in ten individual EU countries and their interaction with the austerity regime established at EU level which in fact is deepening the crisis rather than paving ways out of it The most dangerous implication of this policy approach is according to this study that it is driving countries apart misleadingly in the name of Europe hence the title of the book divisive integration The main message of the book is that a gradual recovery is possible only if there is a change of course in individual countries that then triggers reactions in the policies of other countries and perturbations at the EU level However these changes in individual countries is no longer feasible without a green light or at least toleration from the level of the European institutions

**European Identity Revisited** Viktoria Kaina, Ireneusz Pawel Karolewski, Sebastian Kuhn, 2015-12-14 It has been argued that the emergence of a European collective identity would help overcome growing disparity caused by the increasing diversity of today's European Union with 28 member states and more than 500 million people Research on European integration is facing the pressing question of what holds Europe together in times of crisis growing distributional conflict and instability in its neighbourhood This book departs from the ideas of group cohesion in the EU and reflects on the newest dynamics and practices of European identity Whilst applying innovative qualitative quantitative and experimental research methods and an interdisciplinary approach this volume looks at a variety of issues such as European citizenship mobility of European citizens space based identities dual identities student identity and value sharing In doing so this volume presents new perspectives on this complex and dynamic subject and points to potential solutions both in the academic discourse and the political practice of the EU This text will be of key interest to scholars and students of European integration European studies international relations citizenship studies political sociology as well as more broadly in the social sciences

Biological Consequences of the European Expansion, 1450-1800 Stephen V. Beck, 2022-02-16 Wherever the European has trod death seems to pursue the aboriginal So wrote Charles Darwin in 1836 Though there has been considerable discussion concerning their precise demographic impact reflected in the articles here there is no doubt that the arrival of new diseases with the Europeans such as typhus and smallpox had a catastrophic effect on the indigenous population of the Americas and later of the Pacific In the Americas malaria and yellow fever also came with the slaves from Africa themselves imported to work the depopulated land These diseases placed Europeans at risk too and with some resistance to both disease pools Africans could have a better chance of survival Also covered here is the controversy over the origins of syphilis while the final essays look at agricultural consequences of the European expansion in terms of nutrition both in North America and in Europe

**Political Unification Revisited** Amitai Etzioni, 2001-01-01 Can independent nations unify politically Amitai Etzioni raised this searching question in his seminal 1965 book Political Unification A Comparative Study of Leaders and Forces In this revised edition now with an extensive new introduction Etzioni convincingly argues that the experiment of collective self determination is the only viable replacement for a perilously overloaded international system This fascinating work debates the limitations of informal networks of governance transnational agencies and cross nation bonding including the grand experiment of the European Union to argue that only a truly transcendent supranational community can effectively succeed the nation state He doubts whether the traditional system of international relations can withstand the threat of transnational forces Old fashioned diplomacy can neither prevent weapons of mass destruction and hate material moving easily across national borders nor deal with mass cross border immigration in the wake of civil war and the rise of political and ethnic separatism Political Unification Revisited is essential reading for political scientists and scholars of international law and international relations seeking to navigate the path from national sovereignty to world government in the 21st century

**Mixed Agreements Revisited** Christophe Hillion, Panos Koutrakos, 2010-05-14 Mixed agreements are one of the most significant and complex areas of EU external relations law They are concluded by the Member States and the EU or the European Community in the pre Lisbon days with third countries and international organisations Their negotiation conclusion and implementation raise important legal and practical questions about competence authority jurisdiction responsibility and often puzzle not only experts in countries and organisations with which the EU works but also European experts and students This book based on papers presented at a conference organised by the Universities of Leiden and Bristol in May 2008 provides a comprehensive and up to date analysis of the legal and practical problems raised by mixed agreements In doing so it brings together the leading international scholars in the area of EU external relations including two Judges at the European Court of Justice and a Judge at the EFTA Court along with legal advisors from EU institutions Member States and third countries The book will be of interest to European and international law academics and students officials in EU institutions practitioners of EU and international law political scientists and international relations scholars and students of European law politics and international affairs

*The American Exceptionalism Revisited* Marcello Fantoni, Leonardo Morlino, 2016-02-26 T00:00:00+01:00 When looking at the US from a European perspective a sort of paradox immediately emerges On the one hand the American way of life has been penetrating in depth our everyday life and even more our Western culture through the music the movies the literature and all possible consumerist habits But on the other hand all recurrent statements have been emphasizing the American exceptionalism of political institutions that is how different and distant the North American institutions are from the European ones with regards to the government leadership the relationships between existing powers the connections with the citizens and even the very notion of democracy This book will not analyze the reasons of such exceptionalism It addresses a more salient and up to date question how much exceptionalism is today still present if we compare US democratic institutions to the European ones In other words has there been a convergence or are the differences still very strong and accentuated And if there has been convergence in what

directions Or if resilient divergences on what aspects Moreover how to explain the convergence if there has been one

*Detering Russia in Europe* Nora Vanaga,Toms Rostoks,2018-09-21 This edited volume examines deterrence and the defense efforts of European states neighboring Russia following the Crimean intervention Deterrence after being largely absent from debates among academics and policy makers for almost a quarter of a century has made a comeback in Europe Since Russia s annexation of Crimea and the start of the military conflict in Ukraine s Donbass region eastern and northern European states have revised their assessments of Russia s policies and intentions The approach used by Russia in Ukraine has rendered lessons learned from the Cold War deterrence only partially applicable due to the changing security situation in Europe The emergence of the cyber realm a smaller emphasis on nuclear deterrence and the ideological conflict between Russia and the West are among the key differences between the Cold War and the current security environment Structured into two parts the first part discusses conceptual aspects of deterrence while the second discusses ten country case studies which include both NATO and non NATO countries This allows for an in depth analysis of the changing character of deterrence and its practical application by Russia s European neighbours This volume will be of much interest to students of strategic studies European politics Russian foreign policy security studies and international relations in general

**European Neutrals and Non-Belligerents During the Second World War** Neville Wylie,2002 This collection provides a comprehensive English language survey of the conduct of neutral and non belligerent states during the war Instead of narrowly focusing on the few neutrals that survived the war intact the volume broadens our understanding of neutrality by including chapters on non belligerents and those neutrals of south east Europe such as Romania and Yugoslavia The essays focus on how individual neutral governments perceived international developments and throw light on the domestic political circumstances that critically affected their response to the course of the war They therefore provide the political context that has been overlooked in controversies surrounding their humanitarian and financial activities While based on the authors own research the essays draw widely on secondary literature and provide invaluable analytical introductions to the large amount of historical writing on these countries

*The Education Systems of Europe* Wolfgang Hörner,Hans Döbert,Botho von Kopp,Wolfgang Mitter,2007-05-03 Education is a paradoxical phenomenon On the one hand it is universal as since the period of Enlightenment it has been declared universal good for everybody Mo over we learnt by historical research following the ideas of world system theory that since this time as far as its main structures are concerned compulsory state education given by professional teachers in classrooms it took even universal traits However on the other hand the fact that education became state education organised or at least controlled by the state was the beginning of another tradition line education in the form of state organised educational institutions became a means of creating national identity Universal inclusion as for the light of reason shining for everybody is opposed to more or less nationalist exclusion of all the others shaping the feature of a particular nation state with a particular educational system This fundamental

dialectical tension between the universal and the particular was one of the important motives to make this handbook. One of the central issues of the country studies is precisely to display the relationship between universal values and the search for national identity. Another motive is given by the European dimension of the handbook.
