European Porcelain:

European Porcelain in The Metropolitan Museum of Art Jeffrey Munger, Elizabeth Sullivan, 2018-05-09 Porcelain imported from China was the most highly coveted new medium in sixteenth and early seventeenth century Europe Its pure white color translucency and durability as well as the delicacy of decoration were impossible to achieve in European earthenware and stoneware In response European ceramic factories set out to discover the process of producing porcelain in the Chinese manner with significant artistic technical and commercial ramifications for Britain and the Continent Indeed not only artisans but kings noble patrons and entrepreneurs all joined in the quest hoping to gain both prestige and profit from the enterprises they established This beautifully illustrated volume showcases ninety works that span the late sixteenth to the mid nineteenth century and reflect the major currents of European porcelain production Each work is illustrated with glorious new photography accompanied by analysis and interpretation by one of the leading experts in European decorative arts Among the wide range of porcelains selected are rare blue and white wares and figures from Italy superb examples from the Meissen factory in Germany and the Sèvres factory in France and ceramics produced by leading British eighteenth century artisans Taken together they reveal why the Metropolitan Museum's holdings in this field are among the finest in the world p p1 margin 0 0px 0 0px 0 0px 0 0px font 14 0px Verdana An Introduction to European Porcelain Harriet Wynter, 1972 European Ceramics R. J. C. Hildyard, 1999 The history of ceramics is extraordinarily diverse ranging from crude clay utensils to highly decorative pieces of immense beauty and craftsmanship This lively book traces the story of European ceramics from the end of the Middle Ages to the present day **Meissen and Other European Porcelain** Robert Jesse Charleston, 1971 **Godden's Guide to European Porcelain** Geoffrey A. Godden, 1994 This new book from Britain's leading expert on ceramics breaks fresh ground It is the first thorough exploration of the mass of decorative porcelain from Europe imported into Britain and the United States during the nineteenth century There are many good books on continental porcelain but almost without exception they deal with expensive eighteenth century porcelains from the leading factories rare pieces that most collectors cannot afford or even expect to see outside a museum This book by contrast illustrates and discusses the more modest wares that so many people already own or collect and fills in many of the yawning gaps that abound in ceramic literature Chapters are devoted to the originals and the many copies of the well known Meissen or Dresden porcelains and to the reproductions of the valuable Sèvres and Vienna wares Other chapters deal with the main types of popular and available continental porcelains Paris porcelains and others that are so decorative and collectible Full details working periods and the main marks are given for all the larger and more important European factories together with photographs of a comprehensive range of examples The book will be invaluable for all collectors dealers and auctioneers concerned with European porcelain in all its variety and for anyone owning or having an interest in decorative china It brings clarity to a vast and largely unexplored range of porcelain examples of which are to be found in houses throughout the world

Sculpture Collections in Europe and the United States 1500-1930

,2021-04-26 Exploring the variety of forms taken by collections of sculpture this volume presents new research by twelve internationally recognized scholars The essays delve into the motivations of different collectors the modes of display and the aesthetics of viewing sculpture bringing to light much new archival material The book underscores the ambiguous nature of sculpture collections variously understood as decorative components of interiors or gardens as objects of desire in cabinets of curiosity or as autonomous works of art in private and public collections Emphasizing the collections and the ways in which these were viewed and described this book addresses a significant but neglected aspect of art collecting and contributes to the literature on this branch of art and cultural history This book evolved from a symposium Sculpture Collecting and Display 1600 2000 organized by the Center for the History of Collecting that was held at The Frick Collection on May 19 and 20 2017 Both the book and the symposium were made possible through the generous support of the Robert H Smith Family Foundation The book is published in association with The Frick Collection

Ordering Colours in 18th and Early 19th

Century Europe Tanja C. Kleinwächter,Sarah Lowengard,Friedrich Steinle,2023-10-04 This book describes the international effort to give order to colours and thus facilitate communication about it two topics deemed essential to a modernising world that were also recognizably complex Expert essays will enhance readers understanding of the struggle to coordinate nature with art at a time when approaches to both were undergoing rapid change Ordering Colours shows how such seemingly trivial concerns as identifying the basic colours and disseminating appropriate colour diagrams had to meet philosophical scientific and professional needs across Europe Contributors detail the many schemes for colour systematization and their real world applications questions of concern to both academic and manufacturing focused investigators throughout the long 18th century They bring together original research and new thinking about landmark early modern studies to address important developments as well as neglected historical contributions of European arts sciences and economies This
