European Public Administration And Informatization:

   European Public Administration and Informatization P. Frissen,1992 The result of an international comparative research project on informatization in European public administration this work addresses information policies large scale information systems informational infrastructure and water policy and informatization and administrative modernization

   European Public Administration and Informatization ,1992   *Public Administration in an Information Age* I. Th. M. Snellen,Wim B. H. J. van de Donk,1998 This book is a joint effort of researchers who have been involved in research projects and programmes that have been trying to chart and reflect upon the implications of Information and Communication Technologies ICTs for Public Administration Tilburg Rotterdam Kassel Irvine Nottingham Glasgow Since the fifties computers had largely facilitated and the transformation of the minimal Night Watch state into the modern Welfare state through their contribution to their effectivity productivity and efficiency In most Handbooks of Public Administration computers are seen as neutral instruments and most of the time the role of computer technologies in the transformation of public administration is completely neglected This deafening silence is a great contrast with the way ICT s are actually changing public administration The faster the developments in a field of study are the more difficult it is to let the theories related to that field of study mature In such circumstances most statements will remain provisial and context dependent 25 years of research in Irvine California and Kassel Germany and more than 10 years of research in Tilburg Rotterdam The Netherlands and about seven years of research in Glasgow Nottingham the United Kingdom nonetheless enables the presentation of a modest image of public administration as it is entering the information age Researchers in each of these groups have nevertheless not stopped trying to phrase theories about the implications of informatization for public administration with a more or less larges scope that are robust in different contexts and over longer periods of time These results and theories covering a broad set of elements of the body of knowledge of public administration are presented in this volume As the authors try to demonstrate in this book informatization developments in public administration do not only challenge the existing body of knowledge of the public administration discipline but they are also opening up new perspectives and paradigms for the study of public administration   **Information Technology in Government** Helen Margetts,2012-10-12 This book situates information technology at the centre of public policy and management IT is now a vital part of any government organisation opening new policy windows and enabling a vast range of tasks to be carried out faster and more efficiently But it has also introduced new problems and challenges Four in depth case studies demonstrate how information systems have become inextricably linked with the core tasks of governmental organisations The key government departments examined are the Inland Revenue Service and Social Security Administration in the US the Inland Revenue and Benefits Agency in the UK   **European Public Administration & Informatization** , Printbegr nsninger Der kan printes kapitelvis The European Union Democratic Deficit and the Public Sphere David Ward,2002 An assessment of EU communications

policy judged against democratic and normative criteria within the framework of the question of the need for a European wide public sphere It argues that the EU should proceed through the mass media with a policy based on a public service philosophy   Information and Communication Technologies in Public Administration Christopher Reddick,Leonidas Anthopoulos,2015-04-08 An examination of how information technology IT can be used in public administration Information and Communication Technologies in Public Administration Innovations from Developed Countries examines global perspectives on public administration and IT innovations This book illustrates the theoretical context of current policies issues and imp   Orwell in Athens Wim B. H. J. van de Donk,I. Th. M. Snellen,P. W. Tops,1995 Informatization is playing an increasingly important role in democratic politics For some time already various applications of Information and Communication Technologies ICT are more or less successfully used by politicians representative bodies political parties and citizens It is however reasonable to believe that informatizaton will be of paramount interest for existing actors and institutions that are involved in public decision making in a democracy The advent of telecommunication infrastructures that will enable the use of all kinds of interactive facilities is considered to be an important step towards a more participative democratic system Many projects that share a common feature have been set up their ambition to renew democratic decision making structures and practises with the help of ICT Most of these projects can be found at the level of local and or regional government In this book the claim that these projects can reform or strengthen democratic politics is explored and discussed both empirically and theoretically The research that is presented in this book makes clear that as far as the role of informatization regarding the functioning of the democratic polity is concerned it appears that informatization represents both opportunities and threats   Governing Networks Ari Salminen,2003 Annotation The EGPA Yearbook provides an overall view of current scientific discussion concerning networks particularly the governing of networks in European public administration More than 30 presentations by researchers and practitioners of public administration in different European countries guarantee that the wide range of topics related to network governance information technology and also to other special issues of administrative and managerial reforms related to the subject is fully covered The Yearbook deals with two main topics centred on governing and developing networks In the first part issues are related to different interpretations of networks involved in social policy reforms administration citizen relationships reforming governance models public private relations also including health care local governance and professional policy networks In the second part networks are discussed from the perspective of information technology Among several presentations the authors analyse challenges and applications of new technology in public administration ICT networks in social networks and also reforms and improvements of new technology The accent is on how IT is bringing new patterns into the public administration of different countries The Yearbook demonstrates that a discussion of networks is a rather new and fresh way of thinking about the role of public sector authorities in society reforms of hierarchical structures in public agencies and e governance applications at all levels of

government *ICT, Public Administration and Democracy in the Coming Decade* A.J. Meijer,F. Bannister,M. Thaens,2013-06-20 The physicist Neils Bohr allegedly wrote that Prediction is very difficult especially about the future Many academics believe that serious scholars should never attempt to write about the future but some awareness of the ways in which the future of e government may evolve is needed if well grounded long term decisions about issues such as infrastructures institutions and educational programs are to be made In addition future oriented research is of the utmost importance for informed public debate about technological developments with far reaching societal implications This book marks the 25th anniversary of the permanent study group on e government of the European Group for Public Administration and the papers here were first presented at their 2012 meeting in Bucharest Romania The invited authors were not asked for rigorous analyses based on systematic empirical research or deeply rooted in a theoretical framework instead they were challenged to write thoughtful and measured but provocative essays about ICT and public administration in the coming decade Their contributions are reflections on the nature of new and emerging technologies in the public sector and their impact on government and on democracy itself The book is divided into three sections the past and present as starting point for thinking about the future of e government imagining the future of government and implications for research and practice The many questions raised by developments in ICT for future public administration are presented in a clear and thought provoking manner and merit more debate This volume represents a departure from the normal run of academic publications It is intended both to provoke academics and administrators to think about questions which will affect all of our futures and to offer a range of creative ideas about how the opportunities presented by technology can be exploited to provide better government and governance *Handbook of Public Information Systems* Judith Graham,Alison Kelly,2010-03-10 Delivering IT projects on time and within budget while maintaining privacy security and accountability remains one of the major public challenges of our time In the four short years since the publication of the second edition of the Handbook of Public Information Systems the field of public information systems has continued to evolve This ev **Public Administration in the Information Age: Revisited** I.Th.M. Snellen,M. Thaens,W.B.H.J. van de Donk,2012-10-10 The information age has become a reality and has brought with it many implications for public administration New ICT s offer new opportunities for government and governing but at the same time they pose challenges in some key areas of public administration like trust or the idea of checks and balances This book is an examination of the developments and effects of ICT in public administration over the last 10 to 15 years It represents a re visiting of the 1998 IOS Press publication Public Administration in an Information Age A Handbook As a point of departure the authors of this new book have chosen the speed of the succession of theoretical approaches represented by the phase of theories which has appeared since 1998 This approach which reflects that of the 1998 handbook avoids the impression of technological determinism and provides an opportunity to focus on the phases of theory and technological developments The book is divided into five sections The first section examines key issues

and the second focuses on aspects of democracy In the third section the focus shifts towards structural conditions the conditions that public administration has to meet in order to maintain its effectiveness and its legitimacy in the information age Section four addresses some objects of implementation like IT inspired redesign HRM and the phenomenon of Street Level Bureaucrats Finally the last section offers some concluding thoughts **Handbook of Public Information Systems** Kenneth Christopher,2005-03-29 Delivering IT projects on time and within budget while maintaining privacy security and accountability is one of the major public challenges of our time The Handbook of Public Information Systems Second Edition addresses all aspects of public IT projects while emphasizing a common theme technology is too important to leave to the technocrats **Organizing Innovation** M. Veenswijk,2006-04-13 Public administration and public administration reform should not only be concerned with the improvement of the efficiency and coherence but also with political values like liberty equity and security as well as legal values like the rule of the law This work contains contributions to the science and practice of public administration **ECEG2012-Proceedings of the 12th European Conference on e-Government** Mila Gasco,2012 *Information Systems in the Political World* K. V. Andersen,1995 This text investigates the nature of impacts of information systems on the political world in the First World countries The overall aim is to provide a framework on how to analyze implications of information technology IT on the political world and vice versa This is illustrated by a study of economic modelling at the central and local levels of government *E-Government: Information, Technology, and Transformation* Hans J Schnoll,2015-03-12 This book presents a citizen centric perspective of the dual components of e government and e governance E government refers to the practice of online public reporting by government to citizens and to service delivery via the Internet E governance represents the initiatives for citizens to participate and provide their opinion on government websites This volume in the Public Solutions Handbook Series focuses on various e government initiatives from the United States and abroad and will help guide public service practitioners in their transformation to e government The book provides important recommendations and suggestions oriented towards practitioners and makes a significant contribution to e government by showcasing successful models and highlighting the lessons learned in the implementation processes Chapter coverage includes Online fiscal transparency Performance reporting Improving citizen participation Privacy issues in e governance Internet voting E government at the local level **Information management** Leslie Willcocks,2013-11-11 Survey and study background In an effort to gain some answers on the 1ST capital investment project selection decision criteria used in practice a survey was undertaken in 1990 of 80 American British Australian and New Zealand companies A one page survey form was used that provided 15 possible 1ST investment criteria a means of indicating whether they are used or not the percentage of projects to which each criterion is applied and an overall ranking in terms of total project value for each criterion The criteria are shown in Table 2 1 The criteria are categorized into financial management and development criteria They were developed first through interviews with some 20 chief information officers

CIOs in Britain and the United States These CIOs were questioned on what criteria their organizations use in selecting 1ST investment projects with the aim of developing a full list of the criteria used in practice Secondly the criteria and the form were tested and refined in a pilot study with some 12 companies The criteria used in the survey and listed in Table 2 1 are primary level criteria **Active Citizen Participation in E-Government: A Global Perspective** Manoharan, Aroon,Holzer, Marc,2012-02-29 This book focuses on the issues and challenges involving adoption and implementation of online civic engagement initiatives globally and will serve as a valuable guide to governments in their efforts to enable active citizen participation Provided by publisher *Law and Regulation* B. M. J. van Klink,Corien Prins,2002 An in depth analysis of scenarios for government intervention in the information age It addresses the legal questions and challenges arising in a borderless virtual world elaborating on regulatory solutions found in day to day practice that is relatively independently of state regulation
