Dynamics of Change in the European Union Daniel Naurin,Anne Rasmussen,2013-09-13 Agreements concerning inter institutional rules in the treaties of the European Union often give rise to reactions and processes of adaptation within the EU institutions Recent literature on EU legislative politics has increasingly examined decision making within the EU institutions but has largely overlooked how these internal processes react and adapt to changes in relations between the EU bodies To fill this gap the authors present a series of empirical studies that examine how shifts in inter institutional rules and procedures affect intra institutional politics They show that the resulting intrainstitutional adaptations may in turn both have distributive consequences and affect the efficiency of the initial inter institutional reforms In addition they provide some stepping stones for theory building on how treaty reforms affect organizational structure and decision making within the EU institutions by outlining a series of mediating variables that link these two types of change processes This book was originally published as a special issue of West European Politics

European Integration and Supranational Governance Wayne Sandholtz, Alec Stone Sweet, 1998-09-24 The European Union began in 1957 as a treaty among six nations but today constitutes a supranational polity one that creates rules that are binding on its 15 member countries and their citizens This majestic study confronts some of the most enduring questions posed by the remarkable evolution of the EU Why does policy making sometimes migrate from the member states to the European Union And why has integration proceeded more rapidly in some policy domains than in others A distinguished team of scholars lead by Wayne Sandholtz and Alec Stone Sweet offers a fresh theory and clear propositions on the development of the EU Combining broad data and probing case studies the volume finds solid support for these propositions in a variety of policy domains The coherent theoretical approach and extensive empirical analyses together constitute a significant challenge to approaches that see the EU as a straightforward product of member state interests power and bargaining This volume clearly demonstrates that a nascent transnational society and supranational institutions have played decisive roles in constructing the European Union

Employment Policies and Multilevel Governance Roger Blanpain, Brian Langille, 2009-04-29 In Europe work has long been a symbol of full citizenship and today work is a fundamental goal of European social policy However although every person has the right to work it is becoming clearer all the time that unemployment is not due merely to a lack of encouragement to exercise this right but at least in part to some deeper defects in the implementation of effective employment policies As a contribution to defining the nature of these problems this important collection of essays targets the phenomena of multilevel governance both vertical European national regional local and horizontal administrative institutions trade unions business representatives NGOs showing with detailed analysis and data how coordination or conflict between the various levels advances or fails to advance the goals of employment policy Regarding the EU five EU Member States are examined plus for comparative analysis the parallel Canadian federal model with the authors addressing such concrete issues as the impact of globalisation and Europeanisation on employment policies distribution of tasks in the Open Method of Coordination OMC involvement of private and economic agents the increasing significance of international political agents flexicurity as an employment strategy the difficulty of integrating the excluded coordination with education and fiscal policies social inclusion from the point of view of international human rights and gender mainstreaming as a weakening of the EU guarantee of gender equality The essays originated in a research meeting held at the Instituto Internacional de Sociología Jurídica at Oñati Spain in June of 2007 Some of the contributors all employment law experts discuss problematic aspects of the

European Employment Strategy EES and its influence on the decentralization of employment policies and related elements of social protection Other authors concentrate on built in multilevel problems resulting from existing constitutional and administrative structures while a third group focuses on substantive approaches to employment policies within individual member states The Bulletin contains updated versions of all papers In this book the degree of administrative legal political and cultural intricacy involved in a serious engagement with multilevel governance of employment on the European model is put on full view As a deeply informed analysis of how the idea of multilevel governance has played out within the political and administrative reality of Member States the book will prove of enormous value to labour and employment law professionals anywhere as the problems identified here have a global reach **US Foreign Policy in the Twenty-First Century** J.

Martin Rochester,2018-05-04 The issues raised by the Iraq War are symptomatic of larger phenomena that will continue to preoccupy American foreign policy makers well into the twenty first century The war on terror the proliferation of weapons of mass destruction humanitarian intervention and a litany of other concerns on the foreign policy agenda pose complex dilemmas for which there are no simple answers Through lucid lively analysis as well as multiple illustrations and case studies US Foreign Policy in the Twenty First Century explores the difficult choices that confront the United States today in a complicated and often dangerous post Cold War environment Author J Martin Rochester engages students in an intelligent examination of American foreign policy past present and future involving them in critical thinking about how foreign policy is made what factors affect foreign policy decisions and behavior and how one might go about not only describing and explaining foreign policy but also evaluating it and prescribing solutions **Middle East Dilemma** Michael C. Hudson,1999 From the unification of North and South Yemen to the struggle for Mahgreb unity and the experiences of the six member Gulf Cooperation Council this book presents a complex portrait of the history and prospects for Arab integration

Sørensen,2001-09-05 This study of international relations is often cut off from the study of domestic affairs but this insulation of the international from the domestic is wrong International forces profoundly influence the core structures of sovereign statehood including their political military economic and normative substance Conversely the very nature of international relations is determined by the internal structure of states In an important contribution to the debate Georg Sørensen puts forward an original analysis of this critical interplay between internal and external forces He explores the development and change of the sovereign state and offers a new agenda for the study of international relations Changes in Statehood will be essential reading for students and researchers in international relations political science and security The Making of a World Trading Power Lucia Coppelaro,2013-05-28 Following its foundation in 1957 the European Economic Community set about establishing itself as a

major player on the world stage One of the first key arenas in which the new organisation began to make its presence felt was the GATT negotiations that took place between 1963 and 1967 known as the Kennedy Round Through a reconstruction of these on going negotiations this book charts the emergence of the EEC as a world trading power and the strategies it adopted that were to have a lasting effect upon European trade policies As well as providing an important background to the Kennedy Round the study explains how the EEC European Union became a powerful actor in international trade championing a liberal attitude toward the industrial sector but a protectionist one in agriculture It also addresses the impact of the EEC EU as regional trading area on the multilateral and global trading system and the EEC EU trade policy making Through an historical analysis of these topics a much fuller understanding of the actual role and stance of the EEC EU in world trade is provided one that not only illuminates events at the time but provides essential background to the challenges still faced by the international trading system and the World Trade Organization Based on a wealth of documentary research drawn from European and US archives this book will be welcomed by all wishing to better understand the complex nature of international trade in an increasingly globalised market place

Restructuring Territoriality Christopher K. Ansell, Giuseppe Di Palma, 2004-07-12 The bundling of political authority into mutually exclusive territorial boundaries territoriality is a fundamental principle of modern political organization Indeed it provides the foundation for other cherished institutions national sovereignty citizenship the modern welfare state and democracy Are globalization internationalization and Europeanization conspiring to unbundle territoriality If so are sovereignty citizenship

the welfare state and democracy unravelling as well Is a new post national non territorial form of political organization heralded by the European Union being born With a focus on Europe this volume explores these issues from various substantive and theoretical perspectives The authors find evidence of the diffusion of authority both within and beyond the state producing novel institutional arrangements and new modes of governance But the United States may provide more useful insights into the new dispensation than the idea of a post national non territorial politics Interest in contemporary challenges to democracy run throughout this volume
