## **European Wet Grasslands:**

**European Wet Grasslands** C. B. Joyce, P. Max Wade, 2000      European Wet Grasslands Chris B. Joyce, P. Max Wade, 1998-06-11 This text examines the status and biodiversity of European lowland wet grasslands giving information on their hydrology and management particularly with regard to conservation objectives and investigations that have taken place

**European Wet Grassland** Phil Benstead, 1999 This book takes a Northern and Central European overview of the importance of wet grassland to both wildlife and people and concentrates on the practical aspects of management and rehabilitation It consists mainly of case studies from around Northern and Central Europe and aims to share practical management experience with the region It comprises four main sections that deal with biodiversity threats existing conservation framework and opportunities for the future conservation planning management techniques and case studies

*Grasslands and Herbivore Production in Europe and Effects of Common Policies* Christian Huyghe, Alex De Vlieghe, Bert van Gils, Alain Peeters, 2014-03-20 Funded by and written during the European Multisward project this open access ebook presents an inventory of grasslands and forage crops in Europe by placing them in the production system in which they are embedded and studying the technical economic and regulatory determinants of past and present trends Profusely illustrated with maps it also features many case studies in all European regions and interviews of farmers and key stakeholders

**Grasslands in Europe** Peter Veen, Richard Jefferson, Jacques de Smidt, Jan van der Straaten, 2014-04-14 Grasslands are an important element of European nature About half of Europe's endemic species depend on grasslands whether in mountains lowlands river plains or coastal areas Many grasslands originate in traditional agricultural landscapes Modern intensification however brings many of these ecosystems under threat Grasslands in Europe is a tribute to these important ecosystems It was written by an international team of grassland experts who describe twenty four case studies from countries in all of Europe ranging from the grasslands of Gotland and land Sweden to the Spanish Dehesa and from the hay meadows of the British Pennine Dales to the steppes of Turkish Anatolia Together these case studies provide a fascinating glimpse into the various European grasslands their value for nature culture and agriculture and the threats they are facing today The accessible text as well as the rich illustrations will appeal to a wide audience Grasslands in Europe contains a large number of stunning full colour photographs of grassland landscapes species and cultural history It also contains many maps and infographics Thematic chapters provide essential background information on topics such as grassland fauna the history of agriculture grassland communities and the connection between grasslands and climate The book also analyses the opportunities and risks of EU policy to conserve these grasslands It offers a farmer centred outlook to manage and to maintain the European grasslands of high nature value      Origin, Conservation, and Restoration of the Threatened European Grassland Ecosystem in the Anthropocene Grégory Mahy, Thierry Dutoit, Kathrin Kiehl, Armin Bischoff, Péter Török, 2024-11-07 Natural and Semi Natural Grassland Ecosystems NSG represent high value biodiversity hotspots for

biodiversity of the European continent as well as an invaluable cultural heritage forged through millennia of human nature interactions While pristine natural European grasslands result mainly from constrained specific climatic and soil conditions semi natural grasslands largely result from the activities of humans and their livestock e g grazing mowing burning during millennia of low intensity land use European NSG their biodiversity and the cultural heritage they represent are highly threatened since the beginning of the 20th century in a context of multifactorial global change including environmental dimensions climate change habitat fragmentation pollution biological invasions and land use changes with the accelerating of socio economic evolution of agricultural practices intensification or abandonment and urbanization **The Lowland**

**Grasslands of Central and Eastern Europe** IUCN East European Programme,1991 *Habitats of Europe* Dale Forbes,Iain Campbell,Pete Morris,2026-01-13 The essential field guide to all of Europe s major habitats visually stunning meticulously researched and packed with invaluable information Europe is a place of natural wonders from the icy expanses of the tundra to the arid beauty of deserts and the lush vibrancy of rainforests This illustrated guide covers all the continent s major habitats providing an invaluable resource for understanding and preserving its breathtaking landscapes ecosystems and wildlife Unlike standard habitat classification systems that focus solely on plant communities *Habitats of Europe* offers a unique approach to understanding habitats by combining animal assemblages with descriptions of habitat structure climate soils and vegetation Perfect for nature lovers and ecologists Whether you re a seasoned ecologist or a curious nature lover this one of a kind field guide will inspire you to explore and protect the rich biodiversity of Europe Features engaging fact filled descriptions of 56 major habitats Includes a wealth of climate graphs silhouettes and breathtaking color photos Presents an easy to use system for assessing and understanding habitats developed in collaboration with experts in conservation birding and tour guiding Encourages the reader to look beyond individual species and understand the intricate interactions that define each ecosystem Makes habitat science accessible to a wider audience enticing the reader to discover more about the continent and its ecology An ideal travel companion for birders naturalists and wildlife enthusiasts The go to reference for conservation organizations ecologists and policymakers **Hoverflies of Britain and North-west Europe**

Sander Bot,Frank Van de Meutter,2023-10-26 The most complete photographic field guide to hoverflies of Britain and North west Europe ever written An essential part of our eco systems hoverflies are the second most important pollinators after bees but sadly more than a third of all European species are now under threat of extinction Written by two leading experts *Hoverflies of Britain and North west Europe* is the first and only photographic field guide to cover all 400 hoverfly species occurring in Britain and neighbouring countries in such detail Each species account contains a description population status ecology and habitat an up to date map of its distribution across North western Europe a flight time diagram and guidance on differentiating similar species There are also detailed illustrations and stunning full colour macro photographs in each account showing key features of the species to aid accurate identification This is the ultimate photographic field guide to

hoverflies and a perfect introduction into the world of these important pollinators both for amateur and expert entomologists alike

Lowland Grassland and Heathland Habitats Elizabeth Price, 2003-10-04 Grasslands are everywhere agricultural land playing fields and road verges but while species poor intensively managed grasslands are widespread colourful semi natural grasslands and heathlands buzzing with life are scarce These semi natural habitats are ancient cultural landscapes which are of considerable if not international importance for biodiversity However despite targets for the conservation and restoration of these valuable grasslands and heathlands these habitats continue to decline before our eyes Lowland Grassland and Heathland Habitats contrasts the uniformity of intensively managed grassland with the diversity of traditionally managed grasslands and heathlands It examines topics of concern to the ecologist or habitat manager such as causes of the loss and deterioration of these habitats including inappropriate management eutrophication and climate change It then evaluates opportunities for positive change such as conservation restoration and creation A series of case studies illustrates the pressures on some lowland grassland and heathland habitat types and looks at ways to enhance them for biodiversity This habitat guide features illustrated species boxes of typical plants and animals as well as a full species list a series of projects on the ecology of grassland and heathland species a colour plate section up to date references and information and a full glossary It will provide students and environmentalists with a deeper understanding of the nature and importance of lowland grasslands and heathlands

The Lapwing Michael Shrubbs, 2009-01-01 A detailed authoritative yet highly readable monograph on one of Britain's best loved farmland birds the Lapwing With its striking green black and white plumage and distinctive pee wit call the Lapwing is one of Britain's best known birds Lapwings depend on agricultural land to breed and are considered a barometer of the health of this habitat the population has crashed over recent decades partly due to changes in farming practices In winter Lapwings switch to coastal areas and to wetlands including those in suburban areas where large noisy flocks can gather Michael Shrubbs's The Lapwing is a thorough review of Lapwing biology contains sections on population dynamics feeding ecology habitat use migration and conservation there is an impressively detailed review of our current understanding of breeding biology plus discussion of some other species in the genus The Lapwing is a superb addition to the Poyser list Of interest to both amateur naturalists who will enjoy insights into the bird's life and to academics who will appreciate the broad overview of current research this title will remain the definitive work on the species for many years to come

*ENVIRONMENTAL STRESSES AND RESOURCE USE IN COASTAL URBAN AND PERI-URBAN REGIONS* Tran Dinh Lan, E. Gunilla Almered Olsson, Serin Alpokay, 2014-12-16 This book is one of the outputs from the EU FP7 research project SECOA Solutions for Environmental Contrasts in Coastal Areas working in the period December 2009-1 December 2013 In the project participated five countries from EU and three partners are from outside Europe The main goals of the project were to analyze conflicts on resource use in urban coastal areas with special emphasis on urbanization and mobility and in the context of global environmental changes One of the work packages in the project was dedicated to work on

Environmental stresses on the natural resources in the urban coastal context The work package on Environmental stresses and resource use for sustainable development was led by Dr Tran Dinh Lan Specific studies on this theme was performed by the partners as 17 case studies two one country had three per country which yielded a large data set presented in this volume The case studies were all first written as national reports and were also compiled in a project deliverable D2 2

High-level Pan-European Conference on Agriculture and Biodiversity Council of Europe. Council for the Pan-European Strategy for Biological and Landscape Diversity,2005-01-01 This publication contains a number of reports prepared for a high level conference on issues relating to biological and landscape diversity in European agricultural policies held in Paris in June 2002 The conference made recommendations to states and relevant organisations and provided input to policy work and programmes within the framework of the Convention on Biological Diversity the Ministerial Conference on Environment for Europe the Convention to Combat Desertification and the EU s Common Agricultural Policy and national policy developments

**Wetlands in Central Europe** Gabriele Broll,Wolfgang Merbach,Eva-Maria Pfeiffer,2013-04-18 Wetlands are very sensitive ecosystems functioning as a habitat for many organisms Protection and regeneration of wetlands are of great importance in ecological research and in nature conservation A huge amount of research has been done on the hydrology plants and animals in wetlands Knowledge about soil organisms and soil ecological processes of wetlands is still lacking This knowledge is a prerequisite for landscape planning purposes or climate change predictions In the case of climate change trace gas emissions from wetlands are of great interest The authors provide an overview of the state of the art on soil ecology in wetlands The book is divided into the following main chapters Wetlands as habitats for soil organisms Soil ecological processes in fens and floodplains Carbon and nitrogen dynamics in soils with different water regimes and Trace gas emissions Waders Breeding on Wet Grasslands Hermann Hötter,1991 **Diversity and Stability in Aquatic Plant**

**Communities** Igor Zelnik, Mateja Germ,Rui Pedro Rivaes,2025-08-08 Aquatic plant communities are crucial components of freshwater ecosystems often governing the ecological equilibrium and functionality of rivers streams and wetlands They encompass a diverse range of submerged emergent and floating plants supporting the overall balance and resilience of aquatic ecosystems They play a key role in various ecological and environmental contexts including ecosystem stability and the global carbon cycle as well as providing vital habitats for a diverse range of organisms Several factors shape the aquatic ecosystems ranging from light depth temperature of the water water flow and biotic factors to other external stressors that have over time modified the tolerance and presence of these communities Further research is required to shed light on the impact of increasing environmental changes and the need for a thorough understanding of how aquatic plant communities respond to such alterations The main goal of this Research Topic is to examine the complexities of aquatic plant communities and their dynamic interactions with different environmental factors We aim to explore aquatic plant functional diversity and compare its potential to reveal these interactions We also hope to investigate interactions between plants and other

biological elements as well as how they cope with biological invasions Another goal is to examine the diverse responses of wetland vegetation to expected changes in the environmental factors driven by climate change We encourage scientists to submit their insights into the adaptive strategies of these communities Ultimately we hope to enhance our understanding of the ecological roles played by aquatic plants and to encourage effective conservation and management strategies for these vital ecosystems

Encyclopedia of the World's Biomes, 2020-06-26 Encyclopedia of the World's Biomes is a unique five volume reference that provides a global synthesis of biomes including the latest science All of the book's chapters follow a common thematic order that spans biodiversity importance principal anthropogenic stressors and trends changing climatic conditions and conservation strategies for maintaining biomes in an increasingly human dominated world This work is a one stop shop that gives users access to up to date informative articles that go deeper in content than any currently available publication Offers students and researchers a one stop shop for information currently only available in scattered or non technical sources Authored and edited by top scientists in the field Concisely written to guide the reader though the topic Includes meaningful illustrations and suggests further reading for those needing more specific information

Atlas of Seeds and Fruits of Central and East-European Flora Vít Bojnanský, Agáta Fargašová, 2007-09-17 The Carpathian flora occurs not only in the Carpathian Mountains but also in large lowlands extending towards the south north and east and involves introduced and invading flora of more than 7 500 species Since the morphological characteristics of the seeds are usually constant they are very important for determination of systematic units The present atlas of seeds with nearly 4 800 seed illustrations is supplemented with detailed seed descriptions brief plant descriptions locality and the native source of plants This publication is unique both in its extent with so many plant seeds from such a wide ranging region and in the form of its presentation with such detailed descriptions

*Europe* Kevin Hillstrom, Laurie Collier Hillstrom, 2003-08-13 A concise yet thorough overview of the environmental issues problems and controversies facing the world's most densely populated continent Europe Europe one of six titles in The World's Environments series tackles the tough issues the complex problems and the political controversies surrounding the continent's environmental past its complicated present and its uncertain future Europe looks at the catastrophes in January 2000 a massive spill of cyanide and heavy metals from a gold mining operation in Romania destroyed all biological life in the Tisza Hungary's second biggest river The poisons traveled 1 000 kilometers through Hungary and Yugoslavia where they wreaked havoc on the Danube It also examines the progress European society has shown a greater interest in renewable energy technologies than most other industrialized regions in the last 30 years Serving as both a blueprint for the future as well as a roadmap of the past this book offers a gripping look at Europe's ecological history

Ecology of Central European Non-Forest Vegetation: Coastal to Alpine, Natural to Man-Made Habitats Christoph Leuschner, Heinz Ellenberg, 2017-09-13 This handbook in two volumes synthesises our knowledge about the ecology of Central Europe's plant cover with its 7000 yr history of human impact covering Germany Poland the

Netherlands Belgium Luxembourg Switzerland Austria Czech Republic and Slovakia Based on a thorough literature review with 5500 cited references and nearly 1000 figures and tables the two books review in 26 chapters all major natural and man made vegetation types with their climatic and edaphic influences the structure and dynamics of their communities the ecophysiology of important plant species and key aspects of ecosystem functioning Volume I deals with forests and scrub vegetation and analyses the ecology of Central Europe s tree flora whilst Volume II is dedicated to the non forest vegetation covering mires grasslands heaths alpine habitats and urban vegetation The consequences of over use pollution and recent climate change over the last century are explored and conservation issues addressed
