The European Works Council Deficit in Germany Stefan Raß, 2016-05-12 Studienarbeit aus dem Jahr 2016 im Fachbereich Soziologie Arbeit Ausbildung Organisation Note 1 3 Friedrich Alexander Universität Erlangen Nürnberg Institut für Soziologie Veranstaltung From a National to a Transnational System Industrial Relations in Motion Sprache Deutsch

Abstract Globalization is the driving force which propels human kind into an ever faster more complex and interwoven economic system In 1994 the European Works Councils Directive EWCD was passed by the Council of the European Union and 2016 marks the 20 years anniversary since the Directive came into force in 1996 The adoption of the Directive was marked by widespread debate and critics argued that the EWCD was a flawed means to generate transnational employee participation while proponents saw great potential for an institution that fosters social dialog The legislation was also controversial among policy makers The European Commission envisioned a significant step forward for the development of the social dimension of industrial relations in Europe while employer organizations opposed the EWCD and lobbied

conscientiously to reduce the coverage of the Directive For the last 20 years there has been controversy around the effectiveness of the policy and the modest adoption of the Directive This paper seeks to spread light on whether there is enough value in European Works Councils for the institution to prosper Therefore the underlying issues concerning the low number of European employee representation are explored Surprisingly Germany is one of the countries with the lowest EWC coverage rate among its European partners Consequently Europe s biggest economy can serve as reverence point for problems with European Works Councils and is of special interest investigating the institution This analysis shall serve as a steppingstone in order to figure out whether European Works Councils are of little value for workers or whether the institution is still in the process of reaching its full potential

*New Rules for European Works Councils* European Commission,2011     European Works Councils Jonathan Hewett,1996     European Works Councils in France Sandie Calme,2013 In order to ensure compliance with the legal framework for European Works Councils EWCs established by Directive 2009 28 EC it is essential for each Member State to strengthen the legal certainty of negotiated outcomes involving EWCs by ensuring that employees information and consultation rights are effectively linked This book one of a series derived from the European Works Councils section of Kluwer s matchless multi volume Encyclopaedia of Labour Law and Industrial Relations focuses on the implementation of the EWC directive in France It is thoroughly practical in orientation and representatives of both employers and employees can be assured that it fulfils the need for accurate and detailed knowledge of the structure and progress of French programmes and initiatives affecting the role of EWCs in labour and industrial relations

**Implementing European Works Councils** Diane Palframan,Andrew Tank,1995     European Works Councils Wolfgang Streeck,1993     European Works Councils Peter Kerckhofs,2006     *Involvement of Employees in the European Union:European Works Councils, the European Company Statute, Information and Consulations Rights* Roger Blanpain,2002 Taken in conjunction with the European Works Council Directive and the European Company Statute the EC directive on information and consultation rights of employees aims to strengthen a growing spirit of co operation between employees and employers This book offers in depth analysis legislative history and documentation of the interwoven genesis of these three crucially important labour law initiatives and their impact on industrial relations and HRM

*Towards a European Labour Identity* Michael Whittall,Herman Knudsen,Fred Huijgen,2007-05-07 Since 1996 a growing number of European employees have access to a European works council EWC a transnational employee body designed to complement national forms of labour representation This volume brings together a hep hive of contributors who present valuable new insights into how employee representatives from different European countries perform their jobs as members of European Works Councils in an attempt to develop some sense of a common European labour identity The transnational character of the EWC makes it an ideal microscopic structure through which the wider discourse surrounding identity especially when associated with globalization Europeanization and mobility can occur *Towards a European Labour Identity* examines not only the workings of

the EWCs utilising individual case studies but also analyses and assesses the link with the broader discussions on European identity as well as European trade union co-ordination and solidarity

European Works Councils: Negotiated Europeanisation Wolfgang Lecher, Hans-Wolfgang Platzer, Klaus-Peter Weiner, 2020-03-25 This title was first published in 2002 Negotiated Europeanisation is the final study in a three volume series on European Works Councils by an international research group The first two studies have already been published by Ashgate The current study is rooted in an analysis of the establishment of EWCs under Articles 5 and 6 of the 1994 EWC Directive This is now a mandatory procedure and completes the development of EWCs from bodies set up purely by voluntary negotiation to bodies set up within a binding statutory procedure The study is based on cases of five named major European firms in a variety of industrial sectors As well as a detailed consideration of how negotiations using the mandatory procedure took place there are more general reflections on the quality of the actors involved the negotiating process and the outcomes As well as their analytical value these observations offer a number of practical pointers on the establishment of information and consultation arrangements internationally The study also asks why EWCs have been set up in only one third of eligible companies and why the pace of establishing new EWCs slowed after the mandatory procedure came into force in September 1996 This part of the study is based upon a pan European questionnaire and offers the first empirical findings on this issue European Works Councils exemplify a new mode of regulation at the European level not only within industrial relations but in the field of European integration more widely conceived Europe as a multi level system of governance within a framework of devolved subsidiarity This study is of both academic and practical interest particularly in view of the continuing process of change in this area exemplified in new Directives on the European Company Statute and information and consultation at national level

Works Councils Joel Rogers, Wolfgang Streeck, 2009-05-15 As the influence of labor unions declines in many industrialized nations particularly the United States the influence of workers has decreased Because of the need for greater involvement of workers in changing production systems as well as frustration with existing structures of workplace regulation the search has begun for new ways of providing a voice for workers outside the traditional collective bargaining relationship Works councils institutionalized bodies for representative communication between an employer and employees in a single workplace are rare in the Anglo American world but are well established in other industrialized countries The contributors to this volume survey the history structure and functions of works councils in the Netherlands Germany France Spain Sweden Italy Poland Canada and the United States Special attention is paid to the relations between works councils and unions and collective bargaining works councils and management and the role and interest of governments in works councils On the basis of extensive comparative data from other Western countries the book demonstrates powerfully that well designed works councils may be more effective than labor unions at solving management labor problems
