European Hand Firearms of the Sixteenth, Seventeenth & Eighteenth Centuries Herbert Jackson, 2004-07 Among the many valuable volumes in the well tilled field of firearms history this book stands out Its importance lies in its detailed look at the development of weapons from the 16th to the 19th centuries from the wheel and matchlock to the percussion system Early in that period gunsmiths made customised individual weapons with no interchangeable parts and only rough parity in ballistics Jackson looks at these early weapons and then describes the Snaphaunce guns that followed them The flintlocks and muskets of the 17th Century and 18th Century come next with the percussion bullet completing the story There is a substantial appendix on Scottish Firearms by Charles E Whitelaw accompanied by a list of Scottish gun makers Scottish guns were finely made and had a style of their own which is well illustrated by this section There are 141 illustrations which add greatly to this volume s value and to the feast of information it contains

EUROPEAN HAND FIREARMS OF THE 16TH, 17TH & 18TH Centuries HERBERT J. JACKSON, 1923 Gun Culture in Early Modern England Lois G.

Schwoerer, 2016-05-30 Guns had an enormous impact on the social economic cultural and political lives of civilian men women and children of all social strata in early modern England In this study Lois Schwoerer identifies and analyzes England s domestic gun culture from 1500 to 1740 uncovering how guns became available what effects they had on society and how different sectors of the population contributed to gun culture The rise of guns made for recreational use followed the development of a robust gun industry intended by King Henry VIII to produce artillery and handguns for war Located first in London the gun industry brought the city new sounds smells street names shops sights and communities of gun workers many of whom were immigrants Elite men used guns for hunting target shooting and protection They collected beautifully decorated guns gave them as gifts and included them in portraits and coats of arms regarding firearms as a mark of status power and sophistication With statutes and proclamations the government legally denied firearms to subjects with an annual income under 100 about 98 percent of the population whose reactions ranged from grudging acceptance to willful disobedience Schwoerer shows how this domestic gun culture influenced England s Bill of Rights in 1689 a document often cited to support the claim that the Second Amendment to the United States Constitution conveys the right to have arms as an Anglo American legacy Schwoerer shows that the Bill of Rights did not grant a universal right to have arms but rather a right restricted by religion law and economic standing terms that reflected the nation s gun culture Examining everything from gunmakers records to wills and from period portraits to toy guns **Gun Culture in Early Modern England** offers new data and fresh insights on the place of the gun in English society

Materializing Gender in Eighteenth-Century Europe Heidi A. Strobel, 2017-07-05 Art history has enriched the study of material culture as a scholarly field This interdisciplinary volume enhances this literature through the contributors engagement with gender as the conceptual locus of analysis in terms of femininity masculinity and the spaces in between Collectively these essays by art historians and museum professionals argue

for a more complex understanding of the relationship between objects and subjects in gendered terms The objects under consideration range from the quotidian to the exotic including beds guns fans needle paintings prints drawings mantillas almanacs reticules silver punch bowls and collage These material goods may have been intended to enforce and affirm gendered norms however as the essays demonstrate their use by subjects frequently put normative formations of gender into question revealing the impossibility of permanently fixing gender in relation to material goods concepts or bodies This book will appeal to art historians museum professionals women s and gender studies specialists students and all those interested in the history of objects in everyday life
