European Migration Policies In Flux Changing Patterns Of I:

European Migration Policies in Flux Christina Boswell, 2003-11-21 European migration policies are undergoing significant changes After three decades of highly restrictive approaches demographic changes and gaps in labour supply are prompting many European governments to liberalize their migration policies Timely book examining the nature and impact of the changing migration policies in France Germany and the UK Analyses the content of new legislation as well as the policy debate and party political treatment of migration issues in each country Considers the implications of the new policies on other categories of migrants asylum seekers refugees and resident ethnic minorities *European Migration Policies in Flux*

Richard Arthur DeAngelis, 2005 **Migration Control Logics and Strategies in Europe** Claudia Finotelli, Irene Ponzio, 2023-04-24 Building upon the concept of migration regime this open access book brings together the works of scholars who have investigated logics and routines of action in the field of immigration control within a single and innovative theoretical framework The chapters cover a wide range of policy domains from visa policy to the externalisation of controls labour migration to asylum internal controls towards irregular migration to restrictions for intra EU mobility By unravelling organisational strategies and practices across Europe the book does not only contribute to dismantling the very idea of the European North South divide in migration but also shows how Europe really works in the field of migration in times of deep economic asylum and health crises In this perspective the book questions the widespread understanding of migration control outcomes as simply the result of more or less effective state policies without considering the embeddedness of the national policy goals and strategies in the dynamic interplay of different economies institutional cultures and geopolitical positions

Handbook on Migration and Social Policy Gary P. Freeman, Nikola Mirilovic, 2016-02-27 In this comprehensive Handbook an interdisciplinary team of distinguished scholars from the social sciences explores the connections between migration and social policy They test conflicting claims as to the positive and negative effects of different types of migration against the experience of countries in Europe North America Australasia the Middle East and South Asia assessing arguments as to migration's impact on the financial social and political stability and sustainability of social programs The volume reflects the authors' curiosity about the controversy over the connection between social and cultural diversity and popular support for the welfare state Providing timely and original chapters which both critique the existing literature as well as build on and advance theoretical understanding the authors focus on the formal settlement and integration policies created for migrants as well as corollary state policies affecting migrants and migration A clutch of chapters investigates the linkage between migration and trade theory foreign direct investment globalization public opinion public education and welfare programs Chapters then deal with leading receiving states as well as India and the authors examine the regulation of migration at the subnational national regional and global levels The topic of migration and security is also covered This compelling and exhaustive review of existing scholarship and state of the art original empirical analysis is essential reading for graduates

and academics researching the field **Migration and EU Law and Policy** Loïc Azoulay, Karin de Vries, 2014-03 This book is a reflection of the social reality of mass migration in the EU from a legal perspective It consists of a collection of essays reflecting on important current issues including the scope of the powers allocated to the EU the cooperation of the EU with third countries and the emergence of international migration legal norms **The Politics of European Security Policies** Xymena Kurowska, Patryk Pawlak, 2014-06-03 The book is a timely investigation into the European security policy dynamic from the perspective of actors engaged in the contentious policy process Instead of looking at security actors in isolation from one another the book enquires into the practice of the policy process and maps out the constellations of formal and informal actors sponsoring concrete ideas on what European security should be about The understandings of security shift and advocating a particular reading of security involves entering the political contest with actors advancing different conceptions The contributors analyse these different modalities overlapping scenes and shifting meanings that bring about EU security policies Our case studies illustrate how these processes unfold both at the intra EU level where different institutions supply and endorse their security framings and vis vis the EU and its neighbours The purpose of the book is to uncover by pluralistic means the rules of the game that structure the field of the EU's security making That way rather than impose a rigid theoretical model the editors structure the inquiry around three concepts security politics and policy This book was published as a special issue of Perspectives on European Politics and Society **The Migration Question** Leila Simona Talani, Matilde Rosina, 2025-06-12 This authoritative book proposes a fresh perspective on international migration offering decisive answers to the big questions and dismantling the main myths surrounding one of the most salient issues of today's global politics Who are these migrants Do they steal our jobs Can we help them in their home countries Do border controls improve security Are open borders desirable Leila Simona Talani and Matilde Rosina address these issues and more in their deeply researched study of migration into both Europe and the United States Assessing globalisation's impact on international migration the authors find that it is virtually impossible to stop contemporary flows from the Global South to North In this context policies designed to control limit or deter immigration simply transform some or all regular migrants into irregular ones exacerbating insecurity for citizens of the receiving state and criminalising the migrants Through empirical research including original surveys and interviews Talani and Rosina demonstrate conclusively that the only solution to this short circuit world of securitisation and criminalisation is for the Global North to open its doors to the migrants already inevitably coming through particularly since the evidence shows that regularising migration is a positive sum game in economic social and security terms **The Exclusionary Politics of Asylum** V. Squire, 2016-01-12 This critique of the securitization and criminalization of asylum seeking challenges the claim that asylum seekers threaten receiving states It analyzes recent policy developments in relation to their wider historical political and European contexts and argues that the UK response effectively renders asylum seekers as scapegoats The Contexts of Diaspora Citizenship

Päivi Armila, Marko Kananen, Yasemin Kontkanen, 2018-10-24 This book explores the social participation identification and transnational practices of Somalis living in Finland and the United States Through a multifaceted collection of chapters which are based on data ranging from legislation and policy documents to welfare indicators and interviews this book explores how Somali migrants experience and explore their identities and belongings and how they strive for participation as diaspora citizens of their sending and receiving societies The case studies are conducted in two countries that differ greatly in terms of their social system migration history and integration policies and as such they provide an opportunity to explore how different social political and legal orders influence the life courses and wellbeing of migrant populations Furthermore the book highlights how the fate of the Somalis as a global diaspora is routinely intertwined with the changes in the global political climate and the state level political processes reflecting it This book will be of great interest to researchers students and lecturers of migration and diaspora as well as individuals working with Somali migrants **European Research**

Reloaded: Cooperation and Integration among Europeanized States Ronald Holzhaecker, Markus Haverland, 2006-09-01 The Three Waves of European Research European cooperation and integration has continued to progress forward over the past five decades with an ever deepening impact on the member states The first wave of research into these processes concerned European integration the process of institution building and policy developments at the European Union EU level The second wave on Europeanization used integration as an explanatory factor in understanding domestic political change and continuity related to the EU What is now necessary is to link our understanding of these bottom up and top down processes of integration and Europeanization in the EU This book argues that a third wave of research on the EU is needed to adequately understand the increased interconnectedness between the European and national political levels We posit that this third wave should be sensitive to the temporal dimension of European integration and Europeanization In particular we seek to link the processes of European integration and Europeanization in a new way by asking the question how has Europeanization affected current modes of integration and cooperation in the EU Part I Europeanization of the Member States Preparing the ground for the third wave the first part of the book concerns Europeanization In order to fully understand the feedback of Europeanization on cooperation and integration it is important to analyze how European integration has had an impact on member states in the first place in particular indirectly beyond the direct mechanism of compliance with European policies **Impact of Immigration and Xenophobia on Development in Africa** Mafukata,

Mavhungu Abel, 2020-12-25 Human movement has an influence on the socio economic dynamics of people regions and countries The schisms between host and immigrants impact how host countries utilize immigrant skills and expertise to benefit their economies However immigrants are impacted by negative diplomatic relations between countries that limit the free movement of people and the welfare of immigrants In association this brings about social challenges such as Afrophobia racism xenophobia hatred and violence within these countries While these challenges are deeply rooted across the world

Africa has its own unique challenges Still struggling with massive underdevelopment Africa needs to remove all the negative factors that could impede its quest of achieving development imperatives Impact of Immigration and Xenophobia on Development in Africa analyzes the genesis and evolution of immigration in Africa and how this has resulted in social challenges such as xenophobia within the continent The book focuses on demonstrating how immigrant skills and expertise can be positively utilized to assist African development and asserts the existence of xenophobia in respective countries does not assist Africa s quest of resolving its own challenges The chapters within this book therefore explore how this subsequent output of xenophobia has impacted African development and focuses on the revival of Pan Africanism as a uniting instrument and ideology for Africans This book is a valuable reference tool for activists retired and practicing politicians governments policymakers practitioners stakeholders researchers students and academicians

Hills, 2020-11-25 Borders dominate the security agenda in South east Europe Political and ethnic discontents focus on disputed borders while traffickers in migrants and drugs ignore them The EU argues that the Balkan countries should develop models of border management using its policing standards but the region is rife with corruption and its border guards are both under resourced and ineffective This Paper asks how and why border management in South east Europe is developing as it is and what this might mean for the future of Europe Drawing on recent experience in Bosnia Herzegovina Slovenia Macedonia and Albania it looks at the ways in which the regions borders are managed and gauges the development
