College **Music of the Twentieth Century** Ton de Leeuw, 2005 Ton de Leeuw was a truly groundbreaking composer As evidenced by his pioneering study of compositional methods that melded Eastern traditional music with Western musical theory he had a profound understanding of the complex and often divisive history of twentieth century music Now his renowned chronicle *Music of the Twentieth Century* is offered here in a newly revised English language edition *Music of the Twentieth Century* goes beyond a historical survey with its lucid and impassioned discussion of the elements structures compositional principles and terminologies of twentieth century music De Leeuw draws on his experience as a composer teacher and music scholar of non European music traditions including Indian Indonesian and Japanese music to examine how musical innovations that developed during the twentieth century transformed musical theory composition and scholarly thought around the globe **Musicking in Twentieth-Century Europe** Klaus Nathaus, Martin Rempe, 2020-12-16 Music has gained the increasing attention of historians Research has branched out to explore music related topics including creative labor economic histories of music production the social and political uses of music and musical globalization This handbook both covers the history of music in Europe and probes its role for the making of Europe during a long twentieth century It offers concise guidance to key historical trends as well as the most important research on central topics within the field Twentieth-century Music Robert P. Morgan, 1991 **The Making of European Music in the Long Eighteenth Century** D R M Irving, 2024 In this book author D R M Irving traces the emergence of such large scale categories as European music and Western music showing how they originate from self fashioning in contexts of intercultural comparison outside the European continent rather than the resolution of national aesthetic differences within it Taken as a whole this study demonstrates how reductive labels for the musics of a continent or a hemisphere often imply homogeneity and essentialism and how a renewed critique of primary sources can help dismantle historiographical constructs that arose within narratives of musical pasts involving Europe **European Music in the Twentieth Century. [By Various Authors.] Edited by H. Hartog** Howard HARTOG, 1957 *Music and International History in the Twentieth Century* Jessica C. E. Gienow-Hecht, 2015-04-01 Bringing together scholars from the fields of musicology and international history this book investigates the significance of music to foreign relations and how it affected the interaction of nations since the late 19th century For more than a century both state and non state actors have sought to employ sound and harmony to influence allies and enemies resolve conflicts and export their own culture around the world This book asks how we can understand music as an instrument of power and influence and how the cultural encounters fostered by music changes our ideas about international history *Twentieth-Century Music and Politics* Pauline Fairclough, 2016-02-17 When considering the role music played in the major totalitarian regimes of the century it is music s usefulness as propaganda that leaps first to mind But as a number of the chapters in this volume demonstrate there is a complex relationship both between art music and politicised mass culture and between entertainment and propaganda Nationality self other power and ideology are the

dominant themes of this book whilst key topics include music in totalitarian regimes music as propaganda music and national identity migr communities and composers music s role in shaping identities of self and other and music as both resistance to and instrument of oppression Taking the contributions together it becomes clear that shared experiences such as war dictatorship colonialism exile and emigration produced different yet clearly inter related musical consequences
