European Outthrust And Encounter:

The European Outthrust and Encounter David B. Quinn, Cecil H. Clough, P. E. H. Hair, Paul Edward Hedley Hair, 1994-01-01 For half a century David Beers Quinn wrote on the history of the early relationship between England and North America This volume was presented in tribute to his meticulous and authoritative but cautious scholarship on the occasion of his 85th birthday It includes his Reflections on a lifetime of research and his bibliography But his interests in the early period of the expansion of Europe have never been limited to England or North America and this volume accordingly takes as its theme the widest historical context of the subject and period the whole European outthrust and encounter in its first phase Ten contributions by recognized scholars provide select exemplars to serve as a stimulating introduction to this vast theme Three overview essays deal with specific regions of the outthrust chosen because of differences in outcome Ethiopia the Far East and Siberia The remaining essays consider specific episodes in localities ranging from Guayana to China and their discursive echoes and are essentially concerned with a leading feature of David Quinn's scholarship the discovery examination and interpretation of sources A preliminary essay discusses the theme and links the various contributions within a framework of critical generalization

Europe and the Americas Jeremy Smith, 2006-08-01 This volume takes up current debates in comparative and historical sociology that deal with multiple modernities and civilizations It does so through an examination of patterns of state formation civilization and the development of capitalism in the interaction of European and American worlds over three centuries The early part of the argument explores cutting edge theoretical debates around the nature of early modern formations

Empire And Others Professor M Daunton, Rick Halpern, 2020-09-10 Much has been written about the forging of a British identity in the 17th and 18th centuries from the multiple kingdoms of England Scotland and Ireland But the process also ran across the Irish sea and was played out in North America and the Caribbean In the process the indigenous peoples of North America the Caribbean the Cape Australia and New Zealand were forced to redefine their identities This text integrates the history of these areas with British and imperial history With contributions from both sides of the Atlantic each chapter deals with a different aspect of British encounters with indigenous peoples in Colonial America and includes for example sections on Native Americans and Early Modern Concepts of Race and Hunting and the Politics of Masculinity in Cherokee treaty making 1763 1775 This book should be of particular interest to postgraduate students of Colonial American history and early modern British history

Humans in Outer Space - Interdisciplinary Odysseys Luca

Codignola-Bo, Kai-Uwe Schrogl, 2009-06-18 Humans and space When faced with the issue of space exploration one generally has an idea of the fields of study and disciplines that are involved technology physics and chemistry robotics astronomy and planetary science space biology and medicine disciplines which are usually referred to as the sciences In recent discussions the human element of space exploration has attracted more and more the interest of the space sciences As a consequence adjacent disciplines have gained in relevance in space exploration and space research in times when human space flights are almost part of everyday life These disciplines include psychology and sociology but also history philosophy anthropology cultural studies political sciences and law The contribution of knowledge in these fields plays an important role in achieving the next generation of space exploration where humans will resume exploring the Moon and eventually Mars and where space tourism is beginning to be developed With regard to technology one might soon be prepared for this Much less is this the case with space exploration by humans rather than by robots Robotic explorations to other planets across the solar system have developed in the past 50 years since the beginning of the space age with the presence of humans in nearby space and the landing on the Moon Space exploration is now not only focused on technological achievements as its development also has social cultural and economic impacts This makes human space exploration a topic to address in a cross disciplinary manner

Historical Dictionary of the Discovery and Exploration of the Northwest Coast of America Robin Inglis, 2008-04-02 The Northwest Coast of America ranging from northern California through Oregon Washington and British Columbia all the way up to Alaska was the last temperate coastline to be placed on the world map First visited by Russians in 1741 and thought to contain a navigable passage between the Pacific and the Atlantic it was systematically revealed during an intense period of exploratory and commercial activity from the 1770s to the 1790s Subsequently the imperial ambitions of Russia Spain and Britain and an assumption of manifest destiny by the United States led to further exploration and ensured that the region would become disputed territory before national boundaries were determined in the mid 19th century The Historical Dictionary of the Discovery and Exploration of the Northwest Coast of America tells of the heroic endeavors and remarkable achievements the endless speculation about a northwest passage and

the heyday of the Canton trade In this second volume of his encyclopedic study Van Dyke focuses in detail on the transactions that took place between foreign private and company traders and Chinese licensed merchants Madeleine Zelin Dean Lung Professor of Chinese Studies Columbia University This is a great study which will be the ultimate work on the subject for many years to come It is as complete as the available documentation at present makes possible it is concise well organized and the subject is researched with great thoroughness Christiaan J rg author of *Porcelain and the Dutch China Trade* **The Far East and the English Imagination, 1600-1730** Robert Markley, 2006-01-12 A 2006 investigation of the idea of the powerful Asian empires in the works of Milton Dryden Defoe and Swift *A Cultural History of the Sea in the Age of Enlightenment* Jonathan Lamb, 2023-02-09 This volume covers a period when Europeans were making great advances in the production and application of pure knowledge especially in the fields of navigation and discovery Thus European powers gained empires around the globe and the benefits that came with them while the rest of the world had to be content with supplying the raw material i e labour bullion wood plants ore of these good things This would not have been possible without navies and trading monopolies enterprises in which the freedom of the seas was disputed then gained or lost The essays in this volume range between three eras in the age of discovery first the excitement of seeing something for the first time second the experience of understanding the importance of the new thing and third the disillusion incident to reframing the prehistory of humanity and its destiny without the usual signposts of an anthropocentric journey from innocence to salvation via sin atonement and judgment The maritime contribution to all three eras was enormous not simply because it provided a mobile platform for the inspection of the new but because it proved experimentally that there were no extremes of heroic virtue or of brutal depravity to which humans might not tend when necessity or wantonness called for them Usually the evil side of humanity was assigned to savages but in the curiously singular person of the pirate a mirror image can be found of everyone really all people who lived on or by the sea were pirates of a sort Commencing as an age of rational certainties the Enlightenment gave way to the opposite The symmetries of the Linnaean system yielded to the endless process of mutation Buffon called speciation Rational government of the passions was succeeded by the cult of sensibility and spontaneous emotion The mathematical exactness of Cartesian knowledge was supplanted by imagination Sailors returned with pictures of mirages never seen before the products of Nature s own imagination that posed a question posed again here No doubt they are real but are they true *Nubia, Ethiopia, and the Crusading World, 1095-1402* Adam Simmons, 2022-09-16 The Crusades had a wide variety of impacts on societies throughout Europe Asia and Africa One such notable impact was its role in the development of knowledge between cultures This book argues that the Nubian kingdom of Dotawo and the Latin Christians became increasingly more connected between the twelfth and early fourteenth centuries than has been acknowledged Subsequently when Solomonic Ethiopian Latin Christian diplomatic relations began in 1402 they were building on the prior connections of Nubia either wittingly or unwittingly Ethiopia became the Ethiopia that the Latin

Christians had previously been aiming to develop relations with The histories of Nubia Ethiopia and the Crusades were directly and indirectly entwined between the twelfth century and 1402 By placing Nubia and Ethiopia within the wider context of the Crusades new perspectives can be made regarding the international activity of Nubia and Ethiopia between the twelfth and fifteenth centuries and the regional role reversal of Dotawo and Solomonic Ethiopia from the early fourteenth century Prior to the fourteenth century Nubia had been the dominant Christian power in the region before Solomonic Ethiopia began to replace it including by adopting elements of discourse which had previously been attributed to Nubia such as its ruler being the recognised protector of the Christians of north east Africa This process should not be viewed in isolation of the wider regional geo political context Nubia Ethiopia and the Crusading World 1095 1402 will appeal to all those interested in the history of the Crusades Nubia and Ethiopia particularly concerning inter regional physical and intellectual connectivity
