Europe's New Nationalism States And Minorities In Conflict:

Europe's New Nationalism Richard Caplan, John Feffer, 1996 In the short period since the end of the Cold War Europeans have witnessed the rebirth of nationalism as a harrowing threat to stability on the continent The collapse of Yugoslavia the newly won independence of the Baltic states the unification of Germany the bloody civil wars in Bosnia and Georgia Chechnia's abortive attempt at independence and state sanctioned xenophobia in France all attest to the rapid expansion of nationalist fervor in Europe This provocative volume collects essays by fourteen prominent European scholars and journalists in which they reflect on the meaning origins and implications of the new nationalism The authors some of the best known experts on European politics and history including Adam Michnik Mary Kaldor Dan Smith Michael Ignatieff and Tomaz Mastnak explore issues such as the role of intellectuals the impact of nationalism on democracy culture and European identity the distinctions between eastern and western nationalism and the conflicts nationalism begets Charged with controversy and emotion the essays aim to offer fresh perspectives from thinkers with diverse national origins and ideological backgrounds and suggest viable solutions Europe's New Nationalism is bound to spark debate about the nature and consequences of this rejuvenated political doctrine

Ethnicity, Nationalism and the European Cold War Robert Knight, 2012-04-26 This book questions the prevalent assumption that ethnicity and nationalist politics had nothing to do with the Cold War and that far from being frozen until the fall of communism they remained central to the conflict in Europe Leading scholars bring their understanding of particular regions to bear on the wider issue of why ethnic explanations were written out of the discourse and whether this was a failure on the part of Western observers This in turn has led to an overly simple understanding of power flowing downwards from superpower to nation state and from state to society Engaging with key thinkers such as Gaddis Moynihan and Adam Roberts this collection ultimately allows such speculation to be replaced by historical research and bridges the gap between high politics and ethnic concerns

Europe and the Recognition of New States in Yugoslavia Richard Caplan, 2005-09-01 Europe's recognition of new states in Yugoslavia remains one of the most controversial episodes in the Yugoslav crisis Richard Caplan offers a detailed narrative of events exploring the highly assertive role that Germany played in the episode the reputedly catastrophic consequences of recognition for Bosnia Herzegovina in particular and the radical departure from customary state practice represented by the EC's use of political criteria as the basis of recognition The book examines the strategic logic and consequences of the EC's actions but also explores the wider implications offering insights into European security policy at the end of the Cold War the relationship of international law to international relations and the management of ethnic conflict The significance of this book extends well beyond Yugoslavia as policymakers continue to wrestle with the challenges posed by violent conflict associated with state fragmentation

Radical Ethnic Movements in Contemporary Europe Stefan Troebst, Farimah Daftary, 2004-11-01 Nation states and minorities resort more and more to violence when safeguarding their political interests Although the

violence in the Middle East has been dominating world politics for some time now European governments have had their share of ethnic violence to contend with as this volume demonstrates And as the case studies show ranging as they do from the Basque Country to Chechnya from Northern Ireland to Bosnia Herzegovina this applies to western Europe as much as to eastern Europe However in contrast to other parts of the world instances where political struggles for power and social inclusion between minorities and majorities lead to full fledged inter ethnic warfare are still the exception in the majority of cases conflicts are successfully de escalated and even resolved In a comprehensive conclusion the volume offers a theoretical framework for the development of strategies to deal with violent ethnic conflict **Frontiers of the European Union** M. Anderson, E. Bort, 2001-03-30 Based on original research this book is a unique attempt at a general assessment of EU frontiers Internal frontiers are losing some of their key functions but there are many responses to the new situation as a case study of French frontiers abundantly illustrates An examination of the EU external frontier shows that the EU is acquiring some state like features but the eastern frontier provides abundant evidence of the external frontier s complexity The authors conclude that the increasing openness of national frontiers will continue but their effective abolition whether by European integration or through globalization is improbable **Europe Since 1945** Bernard A. Cook, 2014-01-27 Europe Since 1945 An Encyclopedia is a comprehensive reference work of some 1 700 entries in two volumes Its scope includes all of Europe and the successor states to the former Soviet Union The volumes provide a broad coverage of topics with an emphasis on politics governments organizations people and events crucial to an understanding of postwar Europe Also includes 100 maps and photos **One Europe, Many Nations** James B. Minahan, 2000-07-30 Dominating world politics since 1945 the Cold War created a fragile peace while suppressing national groups in the Cold War s most dangerous theater Europe Today with the collapse of Communism the European Continent is again overshadowed by the specter of radical nationalism as it was at the beginning of the century Focusing on the many possible conflicts that dot the European landscape this book is the first to address the Europeans as distinct national groups not as nation states and national minorities It is an essential guide to the national groups populating the so called Old World groups that continue to dominate world headlines and present the world community with some of its most intractable conflicts While other recent reference books on Europe approach the subject of nations and nationalism from the perspective of the European Union and the nation state this book addresses the post Cold War nationalist resurgence by focusing on the most basic element of any nationalism the nation It includes entries on nearly 150 groups surveying these groups from the earliest period of their national histories to the dawn of the 21st century In short essays highlighting the political social economic and historical evolution of peoples claiming a distinct identity in an increasingly integrated continent the book provides both up to date information and historical background on the European national groups that are currently making the news and those that will produce future headlines **Feeling Global** Bruce Robbins, 1994-01-01 Is global culture merely a pale and sinister reflection of capitalist globalization Bruce Robbins responds

to this and other questions in *Feeling Global* a crucial document on nationalism culturalism and the role of intellectuals in the age of globalization Building on his previous work Robbins here takes up the question of the status of international human rights Robbins conception of internationalism is driven not only by the imperatives of global human rights policy but by an understanding of transnational cultures thus linking practical policymaking to cultural politics at the expense of neither Robbins cultural criticism in other words affords us much more than an understanding of how culture shapes our lives Instead Robbins shows particularly in his discussions of Martha Nussbaum Richard Rorty Susan Sontag Michael Walzer and others how culture itself has become a term that blocks for commentators on both the right and the left serious engagement with the contemporary cosmopolitan ideal of a nonuniversalist discourse of human rights Rescuing cosmopolitanism itself from its connotations of leisured individuals loyal to no one and willing to sample all cultures at will *Feeling Global* presents a compelling way to think about the ethical obligations of intellectuals at a time when their place in the new world order is profoundly uncertain

diversity Using a historical and social science framework the author examines issues concerning national minorities and immigrant communities He outlines a view of multicultural Britain and shows how education at all levels needs to change to embrace an intercultural position The book also deals with interculturalism in Europe and Asia the role of state organizations and the need to foster communities of hope Based on the authors professional experience in schools the community and further and higher education the book assumes no detailed knowledge and aims to make the concepts of intercultural education accessible to a wide audience

Mapping European security after Kosovo Peter Van Ham, Sergei Medvedev, 2018-07-30 This electronic version has been made available under a Creative Commons BY NC ND open access license In the story of post Cold War conceptual confusion the war in and over Kosovo stands out as a particularly interesting episode This book provides new and stimulating perspectives on how Kosovo has shaped the new Europe It breaks down traditional assumptions in the field of security studies by sidelining the theoretical worldview that underlies mainstream strategic thinking on recent events in Kosovo The book offers a conceptual overview of the Kosovo debate placing these events in the context of globalisation European integration and the discourse of modernity and its aftermath It then examines Kosovo s impact on the idea of war One of the great paradoxes of the war in Kosovo was that it was not just one campaign but two there was the ethnic cleansing campaign in Kosovo and the allied bombing campaign against targets in Kosovo and all over Serbia Serbia s killing of Kosovo has set the parameters of the Balkanisation integration nexus offering Europe and the West in general a unique opportunity to suggest itself as the strong centre that keeps the margins from running away Next it investigates Kosovo as a product of the decay of modern institutions and discourses like sovereignty statehood the warring state or the United Nations system Kosovo has introduced new overtones into the European Weltanschauung and the ways in which Europe asserts itself as an independent power discourse in a globalising world increasingly diffident looking for firm foundations in the conceptual void of the turn of the century

Secessionism and the European Union Glen M.E. Duerr, 2015-10-30 Secessionist also called nationalist or pro independence political parties exist in many countries in the developed world they raise and then spend a lot of money win votes in elections and their elected officials serve in seats in local regional and national parliaments Yet despite all of this effort there has not been a successful case of secession since 1921 when the Irish Free State effectively seceded from the United Kingdom UK Perhaps the biggest issue is that these secessionist political parties have rarely been popular enough to form a government even amongst their core ethnic group This is further compounded by the fact that secessionist parties have historically been unable to win support from immigrants or people outside their core ethnic and or linguistic group Given this context four central questions are posed in this study including whether and also why any of the secessionist parties have transitioned from ethnic based to civic based policy platforms Why have these secessionist parties not yet achieved independence And what role does the European Union EU play in facilitating or deterring secession in independence seeking regions within member states This study examines three

different cases Flanders in Belgium Scotland in the UK and Catalonia in Spain to investigate how secessionist political parties are approaching the issue of independence All of the cases are different with respect to history governmental structure and economic situation Yet all of the cases are similar in some ways they are close to the same size in terms of population operate within mature democratic political systems have distinct secessionist political parties and all reside within member states of the EU Categorically in all cases there are also shared influences of the ability of the region to secede institutions interests and ideas Language, Ethnicity and the State, Volume 2 C. O'Reilly, 2001-09-05 The political and social upheavals following 1989 have had a significant impact on the minority languages of Eastern Europe There have been attempts at enlightened treatment of minority linguistic groups in some of the new states but in others such groups have been openly oppressed This volume draws on sociologically and ethnographically oriented work from a number of disciplines to allow the reader to compare developments in the different states and to examine the interplay of language issues ethnic nationalism and processes of state formation and restructuring in the various political and historical contexts of Central and Eastern Europe A companion volume 0 333 92925 X examines the status of minority languages in the European Union The European Union and the Rise of Regionalist Parties Seth Kincaid Jolly, 2015-08-27 Using a cross national quantitative study and a detailed case study of the pro independence Scottish National Party demonstrates that supranational integration and subnational fragmentation are related in theoretical and predictable ways Posits that the EU makes smaller states more viable and politically attractive by diminishing the relative economic and political advantages of larger sized states

Democratic Consolidation in Eastern Europe Jan Zielonka, Alex Pravda, 2001 This second volume in a series of books on democratic consolidation in Eastern Europe analyzes the external parameters of such a consolidation in thirteen Eastern European countries It explores how different international actors and various economic cultural and security types of transnational pressures have shaped democratic politics in the region especially over the last decade **Democratic Consolidation in Eastern Europe: Volume 2: International and Transnational Factors** Jan Zielonka, Alex Pravda, 2001-06-14 This is the second volume in a two volume series of books on democratic consolidation in Eastern Europe The first volume focused on the issue of institutional engineering This second volume analyses the external parameters of democratic consolidation in thirteen Eastern European countries how different international actors and various economic cultural and security types of transnational pressures have shaped democratic politics in the region The aim is to contrast a set of democracy theories with empirical evidence accumulated in Eastern Europe over the last ten years The volume tries to avoid complex debates about definitions methods and the uses and misuses of comparative research Instead it seeks to establish what has really happened in the region and which of the existing theories are helpful in explaining these developments The volume is divided into two parts The first part presents a conceptual and comparative frame of analysis the second consists of detailed studies of individual countries undergoing democratic consolidation Case study chapters deal with

the following countries Estonia and Latvia Hungary Poland the Czech Republic Slovakia Romania Bulgaria and Macedonia the states of former Yugoslavia Belarus and Ukraine and finally Russia The concluding chapter identifies a set of variables responsible for the enormous impact of external factors on democratic consolidation in Eastern Europe It conceptualises the interplay of internal and external factors impinging upon democracy and shows the interplay of different positive and negative types of external pressures It also evaluates the conscious Western effort to craft or engineer democracy in Eastern Europe

Europe in the Long Twentieth Century Christoph Cornelissen, 2024-10-08 Thanks to their economic and military strength the European empires had achieved global supremacy by 1900 with large parts of the world under their dominance in the wake of colonial expansion This situation fuelled ideas of Europe's permanent almost natural global superiority especially among the middle classes However as early as the First World War such claims came under increasing pressure This volume explains the role played by modern nationalism and anti imperial movements the competition between different political orders changes in the economy and society and the great ideas and utopias Their interplay gave rise to enormously destructive forces in Europe From the Boer and Balkan wars before 1914 to the Yugoslav wars of the 1990s and the Ukraine war since 2022 they have produced a continuum of violence At the same time the great promise of political participation and social security is one of the constants of Europe's history in the long twentieth century Against this backdrop modern societies emerged whose values had moved far away from the older models Perceptions of the role of the sexes families and generations changed fundamentally In addition the major internal European migrations together with the global immigration that became increasingly significant after 1945 ensured that the ethnic profile of European societies changed considerably Europe in the Long Twentieth Century shows how on the one hand these different factors led to a Europeanisation of living and working conditions and at the same time how the political and economic integration of the countries of Europe progressed On the other hand it demonstrates how Europe's role in the global context changed fundamentally As much as the geopolitical provincialisation of Europe continued unabated Europeans were constantly searching for new ways to assert themselves throughout the long twentieth century The search continues

Constitutionalizing Secession in Federalized States Miodrag A. Jovanović, 2007 This book is a thorough and professional study about secession Starting from the perspective of contemporary political philosophy the book explores the relevance of this issue for the theory and practice of federalism as well as its status under current public international law and concludes with a comparative constitutional analysis of the subject matter In the final chapter it provides a constitutionalized procedure

of secession based on fundamental liberal democratic values The book argues that a liberal democratic response to the secession controversy might consist of the constitutionalization of a right to secession While a number of recent works in political theory point to the fact that under certain circumstances the moral right of a group to secession should be recognized only a few of them are ready to defend the institutionalization of that right through the instruments of constitutional law This topical and thought provoking book is a welcome contribution to the ongoing debate on secession and will be of interest to academics in a variety of disciplines such as law history politics international relations philosophy and applied ethics and to politicians and constitution drafters
