Europe's Postwar Recovery Barry Eichengreen, 1995-12-07 Western Europe's recovery from World War II was nothing short of miraculous From the chaos of the war and the crisis of 1947 Europe moved directly to the most rapid quarter century of economic growth in her history The contributors to this volume seek to identify the sources of this singularly successful recovery That all European countries shared in the miracle suggests that its roots may lie at the international level The chapters therefore focus on the role played by international institutions the International Monetary Fund the World Bank the European Coal and Steel Community the European Payments Union the General Agreement on Tariffs and Trade and weigh the relative importance of domestic and international factors in Europe's postwar recovery This book will be of interest to students of modern European history and to economists interested in economic growth European economic integration and reform of the Bretton Woods institutions *Transformation and Post-War Economic Recovery of Ukraine* Leonid Kistersky, Anatolii Zadoia, 2024-09-26 Even before achieving victorious peace in the war against the Russian aggressor the process of economic recovery has begun in Ukraine The purpose of this monograph is to explore the possibilities of the post war revival of the main sectors of the Ukraine's economy based on positive world experience and advanced technologies To obtain practically applicable results highly qualified researchers from various universities and research centres of Ukraine were involved The main focus of the monograph is the study of the problems of the transformation and post war reconstruction of the economy and it is mainly intended for potential practical participants in these processes However the authors are convinced that it will be interesting and useful to all researchers analysing the transformations of complex economic systems Methodological approaches and practical recommendations can be adapted to the specifics of a country that is solving the problems of transformation and building an economic model that would correspond to new geostrategic realities *Europe Since 1945* J. Robert Wegs, Robert Ladrech, 2017-09-16 As Europe has expanded its influence in world economic and political affairs there has been an increased need to understand how Europe recovered from the devastation of World War II to become a major world player This concise history offers a comprehensive overview of Europe's political social economic and cultural developments since 1945 J Robert Wegs and Robert Ladrech balance a narrative of the major events and personalities of the post war political scene with a critical assessment of key issues and themes such as The development of the welfare state European integration and the European Union The Cold War The rise and fall of the Soviet Empire The political economic turmoil in eastern Europe since 1989 The place of Europe in the

The GATT's Contribution to Economic Recovery in Post-war Western Europe Douglas A. Irwin, 1994. This paper examines the role of trade liberalization under the auspices of the General Agreement on Tariffs and Trade (GATT) in promoting economic recovery and growth in Europe in the decade after World War II. The formation of the GATT does not appear to have stimulated a particularly rapid liberalization of world trade in the decade after 1947. It is therefore difficult to attribute much of a role to the GATT in the dramatic economic recovery during the immediate post-war period beyond that of an effective supporting actor. The principal contribution of the GATT during its first decade of operation rests more in securing binding agreements on early tariff reductions, thereby preventing countries from instituting higher tariffs as import quotas and foreign exchange controls were being phased out during the 1950s under the guidance of other international institutions.
