## **Evaluability Assessment:**

*Evaluability Assessment* M.F. Smith, 2013-03-09 My interest in and appreciation for program evaluation began in the early 1970s when conducting a curriculum development research project at the University of Florida's P K Yonge Laboratory School. This interest was sparked when it became apparent that testing the success of an education program required more skills than just statistics and research methods. After pursuing additional formal schooling, I embarked on a career featuring educational program evaluation as its central thrust, first as a private consultant later in a university health sciences center involving seven academic colleges and then in the Cooperative Extension Services of Florida and Maryland. Adding evaluability assessment (EA) to the performance of evaluations, to program development and to teaching about evaluation has been a significant development for me personally and I hope to those who have been participants with me in each endeavor. This book grew out of many of these experiences and involved numerous colleagues who made significant contributions. First among these is Dr. George Mayeske, Program Evaluation Specialist, Extension Service, U.S. Department of Agriculture, Washington, D.C.

*Evaluability Assessment* Michael S. Trevisan, Tamara M. Walser, 2014-08-06 Evaluability assessment (EA) can lead to development of sound program theory, increased stakeholder involvement and empowerment, better understanding of program culture and context, enhanced collaboration and communication process and findings use and organizational learning and evaluation capacity building. *Evaluability Assessment: Improving Evaluation Quality and Use* by Michael Trevisan and Tamara Walser provides an up-to-date treatment of EA, clarifies what it actually is and how it can be used, demonstrates EA as an approach to evaluative inquiry with multidisciplinary and global appeal and identifies and describes the purposes and benefits to using EA. Using case examples contributed by EA practitioners, the text illustrates important features of EA use and showcases how EA is used in a variety of disciplines and evaluation contexts. This text is appropriate as an instructional text for graduate-level evaluation courses and training and as a resource for evaluation practitioners, policymakers, funding agencies and professional training. The most impressive aspect of this book is that it positions EA as an approach that perfectly fits within the current philosophical views on program evaluation. The authors do a great job connecting these theories to practice and provide good guidelines. Sebastian Galindo Gonzalez, University of Florida. This book is focused on one very important topic in the scope of program evaluation content. It establishes the foundation for a variety of applications: impact assessment, program development and formative evaluation. This text provides new insights and methods for conducting evaluability assessment. S. Kim MacGregor, Louisiana State University. The book is written in a very readable style, is well organized and referenced. I like the inclusion of case studies, guidelines for actually doing EA and the extensive discussion of its alignment with other models of evaluation process. Iris Smith, Emory University.

*Planning Useful Evaluations* Leonard Rutman, 1980-03 Rutman presents a method of assessing the value of an evaluation before undertaking the research. An evaluability assessment is in effect a feasibility study. It identifies which programmes or aspects

of programmes can appropriately and effectively be measured in order to conduct an effective evaluation **Evaluability Assessment** Michael S. Trevisan, Tamara M.
