Evaluation Models Viewpoints On Educational And Human Services Evaluation:

Evaluation Models D.L. Stufflebeam, George F. Madaus, T. Kellaghan, 2005-12-19 This is an up to date revision of the classic text first published in 1983 It includes a historical perspective on the growth of evaluation theory and practice and two comparative analyses of the various alternative perspectives on evaluation It also includes articles representing the major schools of thought about evaluation written by the leaders who have developed these schools and models The final section describes and discusses the Standards for Program Evaluation and the reformation of program evaluation

Evaluation Models George F. Madaus, M. Scriven, D.L. Stufflebeam, 2012-12-06 Attempting formally to evaluate something involves the evaluator coming to grips with a number of abstract concepts such as value merit worth growth criteria standards objectives needs norms client audience validity reliability objectivity practical significance accountability improvement process product formative summative costs impact information credibility and of course with the evaluation itself To communicate with colleagues and clients evaluators need to clarify what they mean when they use such terms to denote important concepts central to their work Moreover evaluators need to integrate these concepts and their meanings into a coherent framework that guides all aspects of their work If evaluation is to lay claim to the mantle of a profession then these conceptualizations of evaluation must lead to the conduct of defensible evaluations The conceptualization of evaluation can never be a one time activity nor can any conceptualization be static Conceptualizations that guide evaluation work must keep pace with the growth of theory and practice in the field Further the design and conduct of any particular study involves a good deal of localized conceptualization Evaluation Models D.L.

Evaluation and Educational Technology

Robert D. Tennyson, Ronald O. Anderson, 1990 This text has been developed over four editions with one aim to make the subject of economics exciting relevant and as clear to understand as possible Evaluation Roots Marvin C.

Alkin, 2004-02-19 Concern for evaluation theoretical prescriptions emerged about 40 years ago giving it a history that is both recent enough to be part of the living experience of many of today's theorists and old enough to afford an opportunity for an analysis of how the field has evolved over time This book examines current evaluation theories and traces their evolution with the point of view that theories build upon theories and therefore evaluation theories are related to each other Initially all evaluation was derived from social science research methodology and accountability concerns The way in which these evaluation roots grew to form a tree helps to provide a better understanding of evaluation theory Thus the book uses an evaluation theory tree as its central metaphor The authors posit that evaluation theories can be classified by the extent to which they focus on methods uses or valuing these three approaches form the major limbs of the tree In addition to the authors overview which analyzes the evaluation theory tree and connections among theories the book contains essays by most of the leading evaluation theorists In these pieces the evaluators comment on their own development and give their views of their placement upon the tree **Functions, Methods and Concepts in Evaluation Research** R. Stockmann, W.

Meyer, 2013-11-27 By explaining the role of evaluation in modern societies and its historical development in the USA and Europe this book highlights the scientific roots of Evaluation and offers an overview of its fundamental theories and concepts The process of collecting analyzing and interpreting is explored giving an insight into the course of an evaluation

Evaluation in Distance Education and E-learning Valerie Ruhe, Bruno D. Zumbo, 2009-01-01 With the rapid proliferation of distance education and e learning courses the need is growing for a comprehensive professional approach to evaluating their effectiveness This indispensable book offers a road map to guide evaluation practice in these innovative learning environments Providing practical step by step guidelines and tools for conducting evaluation studies including how to deal with stakeholders develop surveys and interview protocols collect other scientific evidence and analyze and blend mixed methods data the work also features a template for writing high quality reports The unfolding model developed by the authors draws on Messick's influential assessment framework and applies it to program evaluation Two case studies of actual programs a distance learning course and an e learning course demonstrate the unfolding model in action *The SAGE*

Handbook of Evaluation Ian Shaw, Jennifer C Greene, Melvin M Mark, 2006-07-10 This handbook thoroughly covers all aspects of evaluation yet isn't too technical to understand It offers everything an organization needs to know to get the most out of evaluation Nonprofit World The Handbook succeeds in capturing and presenting evaluation's extensive knowledge base within a global context In so doing it provides a useful coherent and definitive benchmark on the field's diverse and dynamic purposes practices theories approaches issues and challenges for the 21st century The Handbook is an essential reference and map for any serious evaluation practitioner scholar and student anywhere in the world Michael Quinn Patton author of

Utilization Focused Evaluation Readers of this volume will find a set of texts that provide an evocative overview of contemporary thinking in the world of evaluation This is not a book of simple tips It does justice to the complex realities of evaluation practice by bringing together some of the best practitioners in the world to reflect on its current state It is theoretically sophisticated yet eminently readable anchored in evaluation as it is undertaken in a variety of domains It is the kind of book that startles a little and makes you think I highly recommend it Murray Saunders University of Lancaster In this comprehensive handbook an examination of the complexities of contemporary evaluation contributes to the ongoing dialogue that arises in professional efforts to evaluate people related programs policies and practices The SAGE Handbook of Evaluation is a unique and authoritative resource consisting of 25 chapters covering a range of evaluation theories and techniques in a single accessible volume With contributions from world leading figures in their fields overseen by an eminent international editorial board this handbook is an extensive and user friendly resource organised in four coherent sections Role and Purpose of Evaluation in Society Evaluation as a Social Practice The Practice of Evaluation Domains of Evaluation Practice The Handbook of Evaluation is written for practicing evaluators academics advanced postgraduate students and evaluation clients and offers a definitive benchmark statement on evaluation theory and practice for the first decades of the 21st century International Perspectives on Contexts, Communities and Evaluated Innovative Practices Rollande Deslandes,2009-06-10 Detailing practices that have proved effective alongside relevant case examples this book analyses contributions from diverse countries facing common challenges showing the way ahead for Family School Community Relations **Critical Perspectives on the Organization and Improvement of Schooling** Kenneth A. Sirotnik,Jeannie Oakes,2012-12-06 Major paradigm shifts replacing one world view with another regarding what constitutes appropriate knowledge do not happen over night Centuries usually intervene in the process Even minor shifts admitting alternative world views into the domain of legitimate knowledge producing theory and practice require decades of controversy especially it seems to us in the field of education It has only been in the last 20 years or so that the educational research community has begun to accept the scientific credibility of the qualitative approaches to inquiry such as participant observation case study ethnography and the like In fact these methods with their long and distinguished philosophical traditions in phenomenology have really only come into their own within the last decade The critical perspective on generating and evaluating knowledge and practice what this book is mostly about is in many ways a radical departure from both the more traditional quantitative and qualitative perspectives The traditional approaches in fact are far more similar to one another than they are to the critical perspective This is the case in our view for one crucial reason Both the more quantitative empirical analytic and qualitative interpretive traditions share a fundamental epistemological commitment they both eschew ideology and human interests as explicit components in their paradigms of inquiry Ideology and human interests however are the bread and butter of a critical approach to inquiry Evaluation in Today's World Veronica G. Thomas,Patricia B. Campbell,2020-08-27

Evaluation in Today's World Respecting Diversity Improving Quality and Promoting Usability covers theoretical and practical issues related to evaluation of programs with an emphasis on viewing evaluation topics through a social justice diversity and inclusive perspective

Practicing Evaluation Rita G. O'Sullivan, 2004-02-04 With over 20 years of evaluation experience author Rita O Sullivan has created an approach that actively engages program stakeholders in the evaluation process Practicing Evaluation A Collaborative Approach contains strategies and techniques for conducting successful collaborative evaluations in a variety of program settings including education family support health and non profit organizations Although many evaluation textbooks cover the theory and steps of an evaluation they do not often include specifics regarding how to put these concepts into actual practice in a real world setting such as a school district or business Using actual cases from educational health and business settings O Sullivan shows readers how to better involve stakeholders in the evaluation process

Conducting Educational Needs Assessments D.L. Stufflebeam, Charles H. McCormick, Robert O. Brinkerhoff, Cheryl O. Nelson, 2012-12-06 What goals should be addressed by educational programs What priorities should be assigned to the different goals What funds should be allocated to each goal How can quality services be maintained with declining school enrollments and shrinking revenues What programs could be cut if necessary The ebb and flow of the student population the

changing needs of our society and the fluctuation of resources constantly impinge on the education system Educators must deal with students communities and social institutions that are dynamic resulting in changing needs It is in the context of attempting to be responsive to these changes and to the many wishes and needs that schools are asked to address that needs assessment can be useful Needs assessment is a process that helps one to identify and examine both values and information It provides direction for making decisions about programs and resources It can include such relatively objective procedures as the statistical description and analysis of standardized test data and such subjective procedures as public testimony and values clarification activities Needs assessment can be a part of community relations facilities planning and consolidation program development and evaluation and resource allocation Needs assessment thus addresses a xiii XIV PREFACE broad array of purposes and requires that many different kinds of procedures be available for gathering and analyzing information This book was written with this wide variation of practices in mind

Contextualizing Critical Race Theory on Inclusive Education from A Scholar-Practitioner Perspective Jose W. Lalas, Heidi Luv Strikwerda, 2023-12-12 Race does not only resonate with the dichotomy of blackness and whiteness but also on its impact on non physical attributes this includes factors such as indigenous status social class religion language ethnicity class gender sexuality and immigration The intersection of these factors are key considerations on inclusive education
