Evening Standard Quick Crossword:

The Presence of the Past Rupert Sheldrake, 2012-03-26 Explains how self organizing systems from crystals to human societies share collective memories that influence their form and behavior Includes new evidence and research in support of the theory of morphic resonance Explores the major role that morphic resonance plays not just in animal instincts and cultural inheritance but also in the larger process of evolution Shows that nature is not ruled by fixed laws but by habits and collective memories In this fully revised and updated edition of *The Presence of the Past* Cambridge biologist Rupert Sheldrake lays out new evidence and research in support of his controversial theory of morphic resonance and explores its far reaching implications in the fields of biology chemistry physics psychology and sociology His theory proposes that all self organizing systems from crystals to human society inherit a collective memory that influences their form and behavior This collective memory works through morphic fields which organize the bodies of plants and animals coordinate the activities of brains and underlie conscious mental activity Sheldrake shows how all human beings draw upon and contribute to a collective human memory and that even our individual recollections depend on morphic resonance rather than physical storage in the brain He explores the major role that morphic resonance plays not just in animal instincts and cultural inheritance such as religion and ritual but also in the larger process of evolution which Sheldrake shows to be more an interplay of habit and creativity than a mere survival of the fittest Offering a replacement for the outdated mechanistic worldview that has dominated biology since the nineteenth century Sheldrake's new understanding of life matter and mind shows that rather than being ruled by fixed laws nature is essentially habitual And because memory is inherent in nature he explains in order to survive successfully for generations to come we will have to give up our old habits of thought and adopt new ones habits that are better adapted to life in a world living in the presence of the past as well as the presence of the future

A New Science of Life Rupert Sheldrake, 2005-02-01 The fully revised edition of Rupert Sheldrake's controversial science classic from the author of the bestselling *Dogs That Know When Their Owners are Coming Home* celebrates its 40th anniversary in 2021 After chemists crystallised a new chemical for the first time it became easier and easier to crystallise in laboratories all over the world After rats at Harvard first escaped from a new kind of water maze successive generations learned quicker and quicker Then rats in Melbourne Australia learned yet faster Rats with no trained ancestors shared in this improvement Rupert Sheldrake sees these processes as examples of morphic resonance Past forms and activities of organisms he argues influence organisms in the present through direct connections across time and space Individual plants and animals both draw upon and contribute to the collective memory of their species Sheldrake now Director of the Perrott Warwick Project supported by Trinity College Cambridge reinterprets the regularities of nature as being more like habits than immutable laws Described as the best candidate for burning there has been for many years by Nature on first publication this updated edition will raise hackles and inspire curiosity in equal measure

Revenge Stephen Fry,2003-05-13 A distinct departure from his popular comic novels this haunting provocative tale of wrongful imprisonment and violent retribution is Stephen Fry's first thriller A brilliant recasting of the classic story *The Count of Monte Cristo* *Revenge* crackles with the wit and intelligence readers have come to expect from this hugely talented author actor and comedian yet it reveals an intriguingly deep much darker side of his imagination Ned Maddstone is a happy charismatic Oxford bound seventeen year old whose rosy future is virtually preordained Handsome confident and talented newly in love with bright beautiful Portia his father an influential MP Ned enjoys an existence of boundless opportunity But privilege makes him an easy target for envy and in the course of one day Ned's charmed life is changed forever A promise made to a dying teacher combined with a prank devised by a jealous classmate mutates bewilderingly into a case of mistaken arrest and incarceration Drugged and disoriented Ned finds himself a political prisoner in a nightmarish harrowing exile far from home and lost to those he loves Years pass before an apparently mad obviously brilliant fellow inmate reawakens the younger man's intellect and resurrects his will to live The chilling consequences of Ned's recovery are felt worldwide While *Revenge* breaks new ground with its taut plotting exhilarating pace and underlying air of menace its sophistication and irreverent humor are vintage Fry a gloriously rich mix that only he could deliver His first novel in four years is a dramatic powerful tour de force that is sure to enlarge the American audience for this singularly talented author's work
