Grösser,René Zeier,2012-10-17 The last two decades increasingly have challenged the field of management by confronting it with rapidly growing levels of dynamism inter connectedness and complexity Systems based management approaches their promise already proven offer great potentials for influencing and coping with this development This collection of essays offers ideas

and exemplary case studies from experts in systemic management organizational cybernetics and system dynamics for meeting the challenges in socio economic systems This book was compiled to honor the academic achievement of Markus Schwaninger a leading protagonist in developing the field of systemic management and organizational cybernetics His stature in the field is demonstrated in the forewords by Raul Espejo and John Sterman The efforts of 18 researchers and practitioners all closely related to Markus Schwaninger offer conceptual and empirical approaches that will allow managers and advanced students of the management profession to analyze understand and design intelligent organizations The book weaves its content from both theory and practice and offers hints for improving a variety of organizations both private and public profit and non profit and large and small

Internet-Based Intelligence in Public Health Emergencies Emilio Mordini, Manfred Green, 2013-02-15 Momentous social events result from the sum of micro level changes in daily individual life and by observing and fusing publicly available data such as web searches and other internet traffic it is possible to anticipate events such as disease outbreaks However this ability is not without risks and public concern about the possible consequences of improper use of this technology cannot be ignored Opportunities for open discussion and democratic scrutiny are required This book has its origins in the workshop Internet Based Intelligence for Public Health Emergencies and Disease Outbreak Technical Medical and Regulatory Issues held in Haifa Israel in March 2011 The workshop was attended by 28 invited delegates from nine countries representing various disciplines such as public health ethics sociology informatics policy making intelligence and security and was supported by the NATO Science for Peace and Security Programme Its starting point was the 2009 outbreak of swine flu in Mexico The book includes both scientific contributions presented during the meeting and some additional articles that were submitted later Interactions between public health and information and communication technologies are destined to be of great importance in the future This book is a contribution to the ongoing dialogue between scholars and practitioners which will be essential to public acceptance and safety as we rely more and more on the internet for predicting trends decision making and communication with the public

Evidence-Based Cybersecurity Pierre-Luc Pomerleau, David Maimon, 2022-06-23 The prevalence of cyber dependent crimes and illegal activities that can only be performed using a computer computer networks or other forms of information communication technology has significantly increased during the last two decades in the USA and worldwide As a result cybersecurity scholars and practitioners have developed various tools and policies to reduce individuals and organizations risk of experiencing cyber dependent crimes However although cybersecurity research and tools production efforts have increased substantially very little attention has been devoted to identifying potential comprehensive interventions that consider both human and technical aspects of the local ecology within which these crimes emerge and persist Moreover it appears that rigorous scientific assessments of these technologies and policies in the wild have been dismissed in the process of encouraging innovation and marketing Consequently governmental organizations public and private companies allocate a

considerable portion of their operations budgets to protecting their computer and internet infrastructures without understanding the effectiveness of various tools and policies in reducing the myriad of risks they face Unfortunately this practice may complicate organizational workflows and increase costs for government entities businesses and consumers The success of the evidence based approach in improving performance in a wide range of professions for example medicine policing and education leads us to believe that an evidence based cybersecurity approach is critical for improving cybersecurity efforts This book seeks to explain the foundation of the evidence based cybersecurity approach review its relevance in the context of existing security tools and policies and provide concrete examples of how adopting this approach could improve cybersecurity operations and guide policymakers decision making process The evidence based cybersecurity approach explained aims to support security professionals policymakers and individual computer users decision making regarding the deployment of security policies and tools by calling for rigorous scientific investigations of the effectiveness of these policies and mechanisms in achieving their goals to protect critical assets This book illustrates how this approach provides an ideal framework for conceptualizing an interdisciplinary problem like cybersecurity because it stresses moving beyond decision makers political financial social and personal experience backgrounds when adopting cybersecurity tools and policies This approach is also a model in which policy decisions are made based on scientific research findings

Environmental Tracking for Public Health Surveillance Stanley A. Morain,Amelia Budge,2012-09-25 Satellite imagery and data are widely used in public health surveillance to provide early warning of disease outbreaks and for averting pandemics Convergence of these technologies began in the 1970s and has gained wide acceptance in the 21st Century **Environmental Tracking for Public Health Surveillance** focuses on the expanding use of satellite sen **Learning from SARS** Institute of Medicine,Board on Global Health,Forum on Microbial Threats,2004-05-26 The emergence of severe acute respiratory syndrome SARS in late 2002 and 2003 challenged the global public health community to confront a novel epidemic that spread rapidly from its origins in southern China until it had reached more than 25 other countries within a matter of months In addition to the number of patients infected with the SARS virus the disease had profound economic and political repercussions in many of the affected regions Recent reports of isolated new SARS cases and a fear that the disease could reemerge and spread have put public health officials on high alert for any indications of possible new outbreaks This report examines the response to SARS by public health systems in individual countries the biology of the SARS coronavirus and related coronaviruses in animals the economic and political fallout of the SARS epidemic quarantine law and other public health measures that apply to combating infectious diseases and the role of international organizations and scientific cooperation in halting the spread of SARS The report provides an illuminating survey of findings from the epidemic along with an assessment of what might be needed in order to contain any future outbreaks of SARS or other emerging infections

Communicating Science and Managing the Coronavirus Pandemic V J Marchesani PHD, 2022-08-04

After listening to an abundance of misinformation about the coronavirus COVID 19 and its variants Dr Marchesani decided to write this book Statements such as We all know followed by incorrect or misleading information is frustrating The statement implies that the information to follow is known and accepted by everyone except the person hearing the information for the first time and that person needs to get on board if they want to be accepted As addressed in the book science has the answers and needs to present the answers in a strong and effective manner No response on the part of science is read by many that the misinformation is correct when it is not correct or the misinformation is of equal to science when nothing can be further from the truth Information from science must undergo rigorous peer review prior to a statement being issued while misinformation has no basis or documentation and should be discarded The book also addresses the nine stages of managing a pandemic from the incident that led to the pandemic

determination through remediation recovery and closure The book also addresses the process of developing a pandemic scenario and a scripted pandemic exercise The book also introduces a template for a pandemic management plan a standby statement and much more This book may be the perfect guide to addressing COVID 19 misinformation and pandemic management
