Explanation in Causal Inference Tyler J. VanderWeele, 2015 A comprehensive examination of methods for mediation and interaction VanderWeele's book is the first to approach this topic from the perspective of causal inference Numerous software tools are provided and the text is both accessible and easy to read with examples drawn from diverse fields The result is an essential reference for anyone conducting empirical research in the biomedical or social sciences

*Events, Actions, and Ordinary Language* Lennart Nordenfelt, 1977      **Event Structure** Jan van Voorst, 1988-01-01 This study establishes a relation between the semantics of the subject and the direct object NP and aspect The notion of event is central Events have a beginning and an end This means in temporal terms that events have a point in time at which they begin and a point in time at which they end However events are not defined in temporal terms but in spatial terms This means that they are defined in terms of the entity that can be used to identify their beginning and the entity that can be used to identify their end These two entities are denoted by the subject and the direct object NP respectively The name of the event is provided by the verb It is these three notions that make up Event Structure the entity denoting the beginning i.e. the object of origin the entity denoting the end i.e. the object of termination and the event itself The three primitives are independently motivated in the domain of tense interpretations of sentences Their presence or absence affects these interpretations in a systematic way

Actions and Other Events Karl Pfeifer, 1989 How many things did the gunman do Is his pulling of the trigger the same as his killing of the victim Or are these two different actions or events Such questions are at the heart of the dispute between unifiers and multipliers over the individuation of actions and events In this study Karl Pfeifer defends the unifying approach of G. E. M. Anscombe and Donald Davidson against the criticisms and rival views of Alvin I. Goldman and others Along the way the discussion touches on a variety of problems concerning causality time explanation language ontology and identity What finally emerges is a clearer picture of the nature of criteria of identity and individuation for actions and events than has been available to date

**The Enlightenment Project in the Analytic Conversation** N. Capaldi, 2013-04-17 Analytic philosophy has been a dominant intellectual movement in the 20th century and a reflection of the cultural pre-eminence of scientism In response to analytic philosophy's peculiar reticence and inability to discuss itself this book provides its first comprehensive history and critique The central element in the analytic conversation has been the Enlightenment Project the appeal to an autonomous human reason freed of any higher authority and channeling itself through science as its privileged tool This centrality is demonstrated by systematically examining its presence and development in the philosophy of science metaphysics epistemology language psychology social science ethics political philosophy and the history of philosophy This journey highlights the internal logical disintegration of that project Post-modern relativism is its natural offspring and not a viable alternative The Enlightenment Project's conception of physical science is defective this defective conception of physical science renders the analytic conception of social science philosophical psychology and epistemology defective and

that defective conception of the human condition leads to defective conceptions of both moral and political philosophy specifically the idea of social engineering or social technology Throughout the book an alternative conception of philosophy is presented as a way out of the abyss of analysis an alternative that reconnects philosophy with the mainstream of Western civilization and initiates the process of providing a coherent cultural narrative This book will be of particular interest to any sophisticated reader concerned about the lack of a coherent cultural narrative Beyond Behaviorism Vicki L.

Lee,2016-07-15 Originally published in 1988 this title explores and contrasts means and ends psychology with conventional psychology that of stimuli and response The author develops this comparison by exploring the general nature of psychological phenomena and clarifying many persistent doubts about psychology She contrasts conventional psychology stimuli and responses involving reductionistic organocentric and mechanistic metatheory with alternative psychology means and ends that is autonomous contextual and evolutionary Varian Studies Volume One Leonardo de Arrizabalaga y

Prado,2017-05-11 Varius is the nomen of the Roman emperor misnamed Elagabalus or Heliogabalus These are names of the Syrian sun god Elagabal whose high priest Varius was while emperor There is no evidence that he was ever so called when alive Thus named his posthumous legendary or mythical avatar thrives in academic prose and popular imagination as a Semitic monster of cruelty depravity fanaticism mockery and extravagance Recently this monster has metamorphosed into an anarchist saint and martyr of gay liberation This volume explores the historical individual behind Elagabalus and Heliogabalus Varius was probably born AD 204 in Rome to Syro Roman parents linked to the Severan dynasty and brought up at the imperial court which spent 208 211 in Britain After his father s death in Numidia or Italy sometime between 214 and 218 Varius went to Syria where like a maternal ancestor he became a priest of Elagabal In Syria in 217 Macrinus murdered and succeeded the Severan emperor Marcus Aurelius Antoninus even then known by his nickname Caracalla In 218 in a coup against Macrinus Varius fourteen was proclaimed emperor on the basis of the lie launched by his grandmother Caracalla s aunt and abetted by his mother Caracalla s cousin that he was Caracalla s bastard Varius grandmother intended to rule while he reigned But Varius now Marcus Aurelius Antoninus had other ideas Taking the god Elagabal a meteorite to Rome he sought to combine the incompatible personae of Roman emperor and High Priest of Elagabal He was murdered in 222 before reaching eighteen by his praetorian guards under the orders of his grandmother and aunt to make way for his younger more docile cousin Alexianus who reigned as Severus Alexander Rhetorical invective against Varius was promptly launched to justify his murder It grew into his mythical or legendary avatar Elagabalus or Heliogabalus That avatar came completely to overshadow the historical Varius This book serves to rescue Varius for history from eighteen centuries spent in fantasy and fiction *Act and Crime* Michael S. Moore,2010 In print for the first time in over ten years *Act and Crime* provides a unified account of the theory of action presupposed by both Anglo American criminal law and the morality that underlies it The book defends the view that human actions are always volitionally caused bodily movements and nothing else

The theory is used to illuminate three major problems in the drafting and the interpretation of criminal codes 1 what the voluntary act requirement both does and should require 2 what complex descriptions of actions prohibited by criminal codes both do and should require in addition to the doing of a voluntary act and 3 when two actions are the same for purposes of assessing whether multiple prosecutions and multiple punishments are warranted The book both contributes to the development of a coherent theory of action in philosophy and it provides both legislators and judges and the lawyers who argue to both a grounding in three of the most basic elements of criminal liability **Action, Ability and Health** L.Y

Nordenfelt,2013-03-09 This book is a part of the ongoing enterprise to understand the nature of human health and illness This enterprise has expanded dramatically during the last decades A great number of articles as well as a fair number of monographs on this topic have been published by renowned international publishers In this discussion most participants share the idea that health is a partially normative concept Le that health is not a phenomenon which can be wholly characterised in biological or otherwise descriptive terms To ascribe health to a person is eo ipso according to this line of thought to ascribe a positively evaluated property to this person Moreover most debators share the idea that health is a holistic property belonging to the person as a whole whereas diseases injuries and defects are entities or properties of entities which can be very limited and normally affect only a part of the individual My own monograph belongs to this tradition A feature of my position which is not universally acknowledged in rival theories however is my emphasis on the notion of ability as a fundament in the theory of health In my formal characterisation of health I view it as a state of a person which is such that the person has the ability to fulfil his or her vital goals *Perspectives on Perception and Action* Herbert Heuer,Andries Sanders,2016-07-07 Originally published in 1987 this title aimed to present an eclectic and biased account of the status of perception action relationships in various fields at the time The chapters can be divided into three sections The first focuses on motor control a neglected topic in the past and hence deserving the role of the starting point of this volume In addition motor control provides a good background to discuss the clear sensory and perceptual effects However motor processes are also highly relevant to perception which was usually less emphasized in the literature at the time Therefore a special section is devoted to motor processes in perception together with the issue of integrating information from different sources The book concludes with a section on attention and selection of perceptual information for subsequent action

**Cognitive Behavioural Counselling in Action** Peter Trower,Jason Jones,Windy Dryden,2015-11-10 This best selling practical evidence based guide to the cognitive behavioural approach takes you step by step through the process of counselling from initial contact with the client to termination and follow up The book follows a skills based format based around the Bordin and Dryden model of bonds goals tasks and views with expanded case material to further illustrate links between theory and practice This third edition includes new content on the working alliance what it is and why it is so

important challenges and pitfalls in the counselling process when to challenge and when not to challenge clients beliefs emotional problems such as shame guilt and jealousy as well as anxiety depression and anger Drawing on their own extensive experience and contemporary research the authors provide a concise overview of the cognitive behavioural approach with new material on emotional problems rarely covered in practitioner guides a strong emphasis on the therapeutic alliance and updated bibliographic references throughout Praise for the Previous Edition An elegant and informative guide to the practice of cognitive behavioural counselling recommended for all CBT practitioners Mick Power Professor of Clinical Psychology University of Edinburgh A deserved best seller for over 20 years Peter Trower and colleagues have completely revised and updated the book in light of the enormous scientific achievements of CBT in this time This brilliant book is essential reading for all cognitive behavioural practitioners Max Birchwood Professor of Youth Mental Health University of Birmingham An absolutely wonderful book on cognitive behavioural counselling It includes not only the basic information but also recent conceptual advances in the field Truly I cannot recommend this book highly enough E Thomas Dowd International Editor Journal of Cognitive Psychotherapy

**Theology and the Social Sciences** Michael Barnes, 2018-05-16 Original essays demonstrate that sociology history anthropology and psychology all leave their mark on theology and open new paths to understanding and that theology in turn provides significant questions and perspectives for the social sciences By providing archeological data sociological theory demographics and economic data psychological insights and new methods of historical interpretation the social sciences can open the way for a more sophisticated understanding of the social nature of human existence Theology challenges the social sciences through moral and transcendental questions as well as informs the social sciences through its larger and deeper perspectives The symbiotic nature of this relationship is described in the lead off essays by John Coleman and Gregory Baum The rich conversation between theologians and sociologists that follows moves from Von Balthasar's use of the social sciences and Rahner's approach to ecumenism to the roles of psychology and neuropsychology in understanding religious events

*Dispositions and Causal Powers* Bruno Gnessounou, 2016-05-23 Dispositions are everywhere We say that a wall is hard that water quenches thirst and is transparent that dogs can swim and oak trees can let their leaves fall and that acid has the power to corrode metals All these statements express attributions of dispositions be they physical physiological or psychological yet there is much philosophical debate about how far if at all dispositional predicates can have complete meaning or figure in causal explanations This collection of essays by leading international researchers examine the case for realism with respect to dispositions and causal powers in both metaphysics and science Among the issues debated in this book is whether dispositions can be analyzed in terms of conditionals whether all dispositions have a so called categorical basis and if they do what is the relation between the disposition and its basis

The Paradoxes of Action Daniel González Lagier, 2013-03-09 Through the combined effects of certain natural facts connected with the passage of time institutional acts performed at

various points within the university system and bonds of friendship forged over quite a number of years of academic life I have lately become an occasional writer of forewords. It is certainly not a kind of work that displeases me but it would be too much to say that I have learned to do it with ease. Quite to the contrary. Writing a foreword is it seems to me an example of a rather complex action although of course much less complex than writing the book it accompanies. In fact it is not even an action it is rather an activity carried out over a more or less prolonged period of time and typically including something like the following stages: deciding to write the foreword; carefully reading the book; taking notes; thinking about what would be appropriate aspects to be mentioned; sketching an outline; writing a first draft by hand; writing several corrected versions; typing the last of them into the computer; distributing it to several colleagues to see how they like it; correcting the text; once more sending it to the author of the book; delivering it to the publisher. In each of these actions leaving aside for a moment purely mental actions such as thinking we can in turn distinguish several components. These are basically bodily movements, intentions and intentionally or unintentionally produced changes in the world.

From Action to Ethics Constantine Sandis, 2024-01-11

Over the course of the last 15 years Constantine Sandis has advanced our understanding of the role that action plays in shaping our moral thought. In this collection of his best essays in the philosophy of action Sandis brings together updated versions of his writings accompanied by a new introduction. Read collectively they demonstrate the breadth of his interests and ability to relate to broader issues within the culture connecting debates in philosophical psychology about motivation, negligence and moral responsibility with Greek tragedy, social psychology and literature. Along this path from action to ethics Sandis engages with Hegel, Wittgenstein, Anscombe, Ricoeur, Davidson and Dretske together with contemporary authors such as Jennifer Hornsby and Jonathan Dancy. As he responds to each thinker and theme he develops his own philosophical position, the key thesis of which is that philosophy of action without ethics is empty, ethics without philosophy of action is blind.

*Central Works of Philosophy* v5 John Shand, 2014-12-18

*Central Works of Philosophy* is a major multi-volume collection of essays on the core texts of the Western philosophical tradition. From Plato's *Republic* to the present day the five volumes range over 2,500 years of philosophical writing covering the best, most representative and most influential work of some of our greatest philosophers. Each essay has been specially commissioned and provides an overview of the work, clear and authoritative exposition of its central ideas and an assessment of the work's importance. Together these books provide an unrivalled companion for studying and reading philosophy, one that introduces the reader to the masterpieces of the Western philosophical canon. This volume covers the central texts in the history of analytic philosophy from Quine's *Word and Object* 1960 to the present day. The texts range over political philosophy, ethics, metaphysics and the philosophies of language, mind and logic and represent some of the most important philosophical work of the last forty years. Students and non-specialists who may find the technicality of some of the texts forbidding will welcome the clarity of exposition and exegesis that the essays provide. Taken together the essays provide both a map and compass for the current

philosophical landscape and will prove a valuable resource not only for undergraduate and postgraduate philosophy students but for teachers and researchers in allied disciplines who need an understanding of the preoccupations of contemporary philosophy     Summary Measures of Population Health World Health Organization, 2002 As life expectancy rates continue to increase in many countries around the world comparative health assessments based on mortality rates alone give an increasingly inadequate picture of public health This publication addresses a wide range of key issues regarding the measurement of population health using comprehensive indices which combine data on mortality and ill health It considers the various uses of such summary measures as well as an appropriate measurement framework and specific ethical and social value choices involved The contributors to this book include leading experts in epidemiological methods ethics health economics health status measurement and the valuation of health states
