The idioms are chosen based on frequency of use in written Arabic as well as oral speech in Arabic literature and mass media. Part II includes 30 practice exercises structured around original texts which include the idioms covered in Part I. These practice exercises encourage students to review the meanings of idioms while improving their reading skills and familiarity with various text genres. Designed to be comprehensive, accurate, and easy to use, the book reflects the daily use of Arabic and draws on real and authentic use of the language. Suitable for use as a textbook or reader, this is an ideal resource for students at CEFR level B1 to C2 or Intermediate High to Advanced High on the ACTFL proficiency scale. **Arabic Dialogues** Rachel

Mairs, 2024-03-04 During the nineteenth century and into the early twentieth century more Europeans visited the Middle East than ever before as tourists, archaeologists, pilgrims, settlers, colonists, and soldiers. These visitors engaged with the Arabic language to differing degrees. While some were serious scholars of Classical Arabic in the Orientalist mould, many did not learn the language at all. Between these two extremes lies a neglected group of language learners who wanted to learn enough everyday colloquial Arabic to get by. The needs of these learners were met by popular language books which boasted that they could provide an easy route to fluency in a difficult language. **Arabic Dialogues** explores the motivations of Arabic learners and effectiveness of instructional materials principally in Egypt and Palestine by analysing a corpus of Arabic phrasebooks published in nine languages: English, French, German, Spanish, Portuguese, Italian, Yiddish, Hebrew, Russian, and in the territory of twenty-five modern countries. Beginning with Napoleon's Expedition to Egypt (1798-1801), it moves through the periods of mass tourism and European colonialism in the Middle East, concluding with the Second World War. The book also considers how Arab intellectuals understood the project of teaching Arabic to foreigners, the remarkable history of Arabic learning among Yiddish and Hebrew speaking immigrants in Palestine, and the networks of language learners, teachers, and plagiarists who produced these phrasebooks. **Everyday Arab Identity** Christopher Phillips, 2013

Whether through government propaganda or popular transnational satellite television channels, Arab citizens encounter a discourse that reinforces a sense of belonging to their own state and a broader Arab world on a daily basis. Looking through the lens of nationalism theory, this book examines how and why Arab identity continues to be reproduced in today's Middle East and how that Arab identity interacts with strengthening ties to religion and the state. Drawing on case studies of two ideologically different Arab regimes, Syria and Jordan, Christopher Phillips explores both the implications this everyday Arab identity will have on western policy towards the Middle East and its real-life impact on international relations. Offering an original

perspective on this topical issue this book will be of interest to academics and practitioners working on the Arab world and political affairs as well as students of International Relations Political Science and the Middle East notably Syria and Jordan and policymakers in the region
