Edmonton Portrait Of A City:

Edmonton, Portrait of a City Dennis Person, Carin Routledge, 1981 Edmonton's Urban Villages Ron Kuban, 2005-07-08

How did a collection of neighborhood volunteer organizations come to influence the development of a major Canadian city? Few other North American cities have embraced the community league movement with the vigor of Edmonton. For 87 years, tens of thousands of volunteers from the Edmonton Federation of Community Leagues (EFCL) have often acted as a counterweight to large private and institutional interests shaping municipal development by providing a voice and a training ground for grassroots civic participation. In its wake, the EFCL has left a host of sports, cultural, and civic initiatives for the improvement of Edmonton and an important lesson on how to create community. *I Was There* Ellen Schoeck, 2006-10-01

I Was There shares the insights and experiences of the generations of students, professors, and staff who lived and worked at the U of A for the past 100 years. First person stories and period photographs present a unique insight into university lore from the vantage point of those who were most intimately involved in making the university what it is today: the students and alumni. Foreword by Hon. Jim Edwards, P.C. *The Vision Zero Handbook* Karin Edvardsson Björnberg, Sven Ove Hansson, Matts-Åke Belin, Claes Tingvall, 2022-11-30

This open access handbook provides a comprehensive treatment of Vision Zero, an innovative policy on public road safety developed in Sweden. Covering all the major topics of the subject, the book starts out with a thorough examination of the philosophy, ideas, and principles behind Vision Zero. It looks at conditions for the effectiveness of the policy, principles of safety and responsibility, as well as critique on the policy. Next, the handbook focuses on how the Vision Zero ideas have been received and implemented in various legislations and countries worldwide. It takes into account the way Vision Zero is looked at in the context of international organizations such as the WHO, the UN, and the OECD. This allows for a comparison of systems, models, and effects. The third part of the handbook discusses the management and leadership aspects, including ISO standards, equity issues, other goals for traffic and transportation, and opportunities for the car industry. Part four delves into tools, technologies, and organizational measures that contribute to the implementation of Vision Zero in road traffic. Examples of specific elements discussed are urban and rural road designs, human factor designs, and avoiding drunk and distracted driving. The final part of the handbook offers perspectives on the transfer of Vision Zero policy to other areas, ranging from air traffic to suicide prevention and nuclear energy. Vision Zero is a public road safety policy including both a long-term goal that no one shall be killed or seriously injured as a consequence of accidents in road traffic and a safety principle stating that the design and function of the road transport system shall be adapted to meet the requirements that follow from that goal. It is a new road safety paradigm which has resulted in new types of responsibilities among stakeholders, technological innovations, and new strategies and organizational measures to achieve a safe system. The road safety work based on Vision Zero has shown promising results, and although Sweden has not yet reached a safe system, the number of fatalities and severe injuries has decreased substantially. This is an open access book.
