Bourdieu and the Sociology of Music

Education Pamela Burnard, Ylva Hofvander Trulsson, 2016-04-15 Pierre Bourdieu has been an extraordinarily influential figure in the sociology of music. For over four decades his concepts have helped to generate both empirical and theoretical interventions in the field of musical study. His impact on the sociology of music taste in particular has been profound, his ideas directly informing our understandings of how musical preferences reflect and reproduce inequalities between social classes, ethnic groups and men and women. Bourdieu and the Sociology of Music Education draws together a group of international researchers, academics and artist practitioners who offer a critical introduction and exploration of Pierre Bourdieu's rich generative conceptual tools for advancing sociological views of music education. By employing perspectives from Bourdieu's work on distinction and judgement and his conceptualisation of fields, habitus and capitals in relation to music education, contributing authors explore the ways in which Bourdieu's work can be applied to music education as a means of linking school institutional habitus and learning and curriculum and family class habitus. The volume includes research perspectives and studies of how Bourdieu's tools have been applied in industry and educational contexts including the primary, secondary and higher music education sectors. The volume begins with an introduction to Bourdieu's contribution to theory and methodology and then goes on to deal in detail with illustrative substantive studies. The concluding chapter is an extended essay that reflects on and critiques the application of Bourdieu's work and examines the ways in which the studies contained in the volume advance understanding. The book contributes new perspectives to our understanding of Bourdieu's tools across diverse settings and practices of music education.

Social Justice Education in European Multi-ethnic Schools Cinzia Pica-Smith, Rina Manuela Contini, Carmen N. Veloria, 2018-11-20 Europe is a multi-ethnic society experiencing a rise of anti-immigration, racist, xenophobic discourses and right-wing political rhetoric and movements proposing legislation to further solidify structural inequality and institutionalized systems of oppression that fuel educational inequities. *Social Justice Education in European Multi-ethnic Schools* brings together researchers in the fields of sociology and education to examine debates in multicultural education. Drawing on critical theory, the book takes an in-depth look at how these challenges are being addressed or not addressed in educational contexts and in the proposed framework of intercultural education adopted as a conceptual and educational framework by the European Union over the last two decades. The book begins with an analysis of the sociological models and theories of migration and their connection to multiculturalism and interculturalism. It engages in the current debate between multiculturalism and interculturalism, bringing to light the political rhetoric that fueled narratives about the failures of multiculturalism which ushered in the intercultural framework. It puts forth a critical analysis of interculturalism, linking it to neoliberalism and policies of civic integration and the concept of governmentality. Advocating for a transformative framework informed in social justice education that aims to promote more equity in schools, it critically analyzes and discusses intercultural education, the pedagogical extension of interculturalism as per the European

Participatory Action Research in Latin America Danilo Romeu Streck, 2005 The Educational Philosophy of Luis Emilio Recabarren María Alicia Rueda, 2020-12-29 This text offers a unique philosophical and historical inquiry into the educational vision of Luis Emilio Recabarren and his pivotal role in securing independent education for Chile's working classes in the early 20th century. Through close analysis of the textual archives and press writings, *The Educational Philosophy of Luis Emilio Recabarren* offers comprehensive insight into Recabarren's belief in education as essential to the empowerment, emancipation, and political independence of the working class, and emphasises the importance he placed on the education of workers through experiential learning in their organizations and press. By situating his work amongst broader political and educational movements occurring in Latin America in an era of imperialism, the text also demonstrates the progressive nature of Recabarren's work and maps the development of his philosophy amid Socialist, Marxist, and Communist movements. Making an important contribution to our understanding of the aims and value of adult education in light of neoliberalism today, this text will be of interest to scholars, researchers, activists, and postgraduate students with an interest in education, social movements, and Latin America. The text also addresses key issues raised in studies of Recabarren and the history of education in Chile.

All the chapters are written from an international perspective.

On the Politics of Educational Theory Tomasz Szukdlarek, 2016-11-03 *On the Politics of Educational Theory* considers the political significance of educational theory as a specific genre of public discourse. Rather than understanding educational theories solely as addressing issues of childrearing and instruction, this book aims to view educational theories in a broader socio-political context. It explores the role of educational theories in the construction of collective and political identities and analyses them as rhetorical strategies operating as political discourses. Defining the methodological framework through the perspectives of Michel Foucault and Ernesto Laclau, each chapter examines the ways in which theories of education contribute to the creation of social realities and identities. Such issues as the construction of

visibility and invisibility of power the tropes of temporality or the use of postulational language where theorists say what should be done in and by education are some of the threads that weave through particular theories from Rousseau to the discourse of education in the knowledge based society analysed as ontological rhetorics constitutive of political identities This book suggests a direction for a more conscious way of dealing with the political in education As such it will appeal to researchers academics and postgraduate students in the fields of educational research philosophy of education curriculum studies social and political theory and theory of education The Open Access version of this book available at <http://www.taylorfrancis.com/books/e/9781315712505> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license
