A particular feature is the focus on different units of analysis. Individual chapters compare places, systems, times, cultures, values, policies, curricula, and other units. These chapters are contextualised within broader analytical frameworks which identify the purposes and strengths of the field. The book includes a focus on intra national as well as cross national comparisons and highlights the value of approaching themes from different angles. As already demonstrated by the first edition of the book, the work will be of great value not only to producers of comparative education research but also to users who wish to understand more thoroughly the parameters and value of the field.

China's Macao Transformed Eilo W.Y.YU, Ming K.CHAN, 2014-10-01. The return of Macao from the Portuguese administration to the People's Republic of China (PRC) in 1999 marks the beginning of its transformation in the 21st century. Macao was confronted with various issues concerning then existing political system, economic downturn, and gangland violence during the transition period. Beijing put Macao under the One country Two Systems and implemented a wide variety of measures in order to restore its law and order as well as to recover its tourism dependent economy. Gradually Macao transformed itself to Las Vegas of the East. This volume of 18 essays highlights the key dimensions of Macao's remarkable One country Two Systems actualisation experience in its first 15 years and discusses how Macao transformed and what challenges it encountered during its post handover transformation. The volume has several focuses. It first investigates the political and electoral issues in a critical manner. Post handover Macao suffered from maladministration and limited democratization and the chief executives selected lacked representativeness due to restricted public participation in the electoral process. Overall speaking, the government lacked legitimacy and popular support. From a socio-economic point of view, this book looks into the business model in running Macao's casinos and the emerging culture of mass participation and youth participation in political affairs. The education reformation and changes in civic identity of local Macao Chinese are also addressed. Finally, the volume looks into how post handover Macao relates itself in the international politics affair.

*Social Studies Education in East Asian Contexts* Kerry J. Kennedy, 2020-07-28. The book explores the state of social studies education within selected East Asian societies and provides some insights into distinctive classroom practices. In an increasingly volatile and unpredictable world, the education of young people who both understand the contexts in which they are growing up and see the need for engaging with them is a top priority. This task falls to social studies education which carries the responsibility for inducting young people into their social world and helping them to see the role they can play within it. This is particularly important in East Asia where strong economic growth, long held cultural values, and diverse political systems create an environment that challenges young people on multiple fronts. This book, with its team of regional authors, shows how different societies in the region are dealing with these challenges and what can be expected from future citizens. The book will appeal to policy makers, researchers, and teachers interested in the current state of social studies.
